RE: NEBB ATTCP 2019 Annual Status Report

Dear Mr. Loyer,

This letter is to provide the California Energy Commission with a status update of the NEBB ATTCP program pursuant to 10-103.2(d)1 of the 2019 Building Energy Efficiency Standards

TRAINING, CERTIFICATION & REPORTING ACTIVITY:

To date, NEBB has certified 1 employer and 1 technician for this reporting period (January 2019 – December 2019).

Currently 16 technicians have applied to become certified, and 7 of them are scheduled to take written exam test.

Currently 9 employers have applied to become certified, but none have been certified at this time.

The quality assurance and accountability activities, including the compliance forms review and the onsite audits per 10-103.2(c)3Fii, were not performed during the reporting period.

No projects or acceptance tests have been performed under the NEBB program during this reporting period. This is not to say that no tests have been performed, but none have been done through the Document Registry at this time since there is no mandate in place.

NEBB has had to take no action regarding any administrative actions to correct problems with Mechanical Acceptance Test Technician field performance per 10-103.2(c)3D and 10-103.2(c)3F.

The NEBB continues to meet the requirements of §10-103.2 as ATTCP.

Please do not hesitate to contact us if you have any questions regarding this report.

Best regards,

Tiffany J. Suite
NEBB Executive Vice President
