H2 Fueling Infrastructure

We drive both an H2 Fuel Cell Car (Honda Clarity) and a full EV (Tesla Model 3).

Our experience of over two years with both vehicles has shown us that the EV model is much more desirable. Desirable from the point of view of fuel economy, ease of use, reliability, maintenance costs, performance and bang for the buck.

I believe that funds for an H2 fueling infrastructure should be refocused toward an EV charging infrastructure.

To put it another way, experience has shown us the H2 is metaphorical BetaMax of the video tape evolution.
