## **Request for more stations**

I hope that as more and more people in addition to public vehicles are using Hydrogen to fuel their fuel cell cars, buses and trucks that we will have more stations coming online at a much faster rate than they have in the past and stations with additional capacity to fuel more than one car at once. Currently it reminds me of when I started driving my electric car and the stations were few and far between and if the station was down you had to drive out of your way to find an open station and wait in line. Hopefully the hydrogen station infrastructure will grow more quickly.
