## **Hydrogen Stations**

I drive a 2017 Honda Clarity (Hydrogen). The car is as nice as any car I have every driven. That is completely offset with the lack of hydrogen stations and the lack of reliability of product and functional equipment. I can't count on either. Makes it very difficult when commuting to work. Add to this the lack of stations that make it almost impossible to access many parts of southern California. Unless something is done I will not pursue the hydrogen dream at the end of my lease.
