## **More Hydrogen Car Fueling Stations Needed in North Orange County**

I have been a Hydrogen Car driver since January 2018 (I drive a Toyota Mirai). As you can see by my address, I live in the city of Orange. Currently there is only 1 SINGLE STATION (in Anaheim) North of the 405 Freeway (as seen on the attached map), which is problematic since one of the biggest sellers of hydrogen cars (Toyota of Orange) in the United States is at the far north end of the city of Orange. It is close to the Anaheim station, and as a result, the station is out of fuel almost constantly, or is broken from the excess stress put on the station from being used by so many drivers. I am writing this in the hope that there will be more infrastructure for hydrogen fueling stations built in North Orange County.
