## **OPPOSED to AES' AFC**

It's time to once and for all DENY AES Southland Corp's application for certification at their property in Redondo Beach. I live and own a condo directly across the street from the proposed new generating facility and strongly feel that this plan is located entirely too close to a densely populated neighborhood (literally right across the street).

Despite the current power plant being "there first" (before housing was developed around it), the use of the area has changed dramatically and this is now mostly a residential neighborhood. Having such an industrial operation located so close to homes and people is not the best use for this land.

Please DENY AES' application and let the City of Redondo and AES work out a deal to more effectively re-zone the property for an entirely different use.

Thank you for your consideration.
