## **Fuel Cell Vehicle**

I am a fuel cell vehicle driver for almost 3 years and my previous car was a fully electric vehicle for 5 years.

I am dedicated to alternative fuel vehicles and look forward to the advancements in technology and range each model year provides.

The fuel cell shortage of summer 2018 due to human error at the Santa Clara facility was an unfortunate event that forced the fragile distribution chain to a halt in Northern California for almost 6 months.

Please consider this feedback and a request to improve and stabilize the distribution centers and reliability of fueling stations.

Thank You
