## **Redondo Beach Power Plant**

I am not in favor of the construction or reopening of the power plant in Redondo Beach. It is my understanding the plant will generate more than 1.5 million tons of Greenhouse gases per year; and that the dangerous particulate emissions may rise from 3.3 to 49.7 tons per year and would well exceed the state standards. Hermosa and Redondo are family oriented cities with large numbers of children who play outside every day who would be breathing in these elements. This would place our children and all members of our communities at much greater risk for asthma and cancer. Please do not reopen the exiting power plant or construct a new one in this area.
