Only Large Transit Agencies

I'm very disappointed that the CEC is not considering smaller rural transit agencies as part of this proposed grant program. Smaller rural agencies, particularly in DACS are in need of transit funding, perhaps even more so than their larger counterparts. The cost of alternative fuel vehicles is cost-prohibitive. I urge you to consider a fund for small transit agencies as most of our funding is limited by census population data. Large transit agencies already get a larger pot of funding as a general rule.
