To whom it may concern

We at Rapid Duct Testing would like to endorse California Energy Registry for the work they put into their registry. My office employees love the simplicity of their website. We work with both Cal Energy and Calcerts on a daily basis and have a great relationship with both companies. It is very important for this industry to have two dedicated providers which creates a competitive field for us to work with. Competition creates lower certificate fees and more innovative websites.

Sincerely,

Mike Torosyan
