<sup>1</sup> Energy Commissioners Karen Douglas, Presiding Member, and Janea A. Scott, Associate Member. The full Commission made this Committee assignment on August 27, 2013.

## **Background**

On November 20, 2012, AES Southland, LLC (AES) submitted the AFC to the California Energy Commission seeking permission to construct and operate a power generation facility, the RBEP, located at 1100 North Harbor Drive, in the city of Redondo Beach, Los Angeles County. The site is southeast of the intersection of North Harbor Drive and Herondo Street. The project would be located entirely within the footprint of the existing AES Redondo Beach Generating Station, an operating power plant.

Energy Commission staff published the PSA on July 28, 2014. Shortly before the PSA was published, the Committee learned that AES had submitted an initiative petition to the city of Redondo Beach. The initiative sought the approval of the electorate in Redondo Beach for a land use plan for the RBEP site as a mixed-use development of 600 new residences, 250 hotel rooms, and 85,000 square feet of commercial space. During the pendency of the election on that initiative petition, work on the AFC was suspended until April 1, 2015.

On March 3, 2015, the initiative failed. AES submitted a letter on March 20, 2015, asking that work resume on the AFC and seeking a new scheduling order from the Committee. The Committee held a status conference on April 10, 2015, to discuss the status of the application and to hear from the parties and the public on the scheduling of future activities in the case.

On May 5, 2015, the Committee filed a Scheduling Order and Order Regarding the Filing of Record of Conversation.<sup>2</sup> A Revised Scheduling Order was filed on May 8, 2015.<sup>3</sup> Under the Revised Scheduling Order, Energy Commission staff was directed to file its Final Staff Assessment (FSA) no later than September 4, 2015.

In the months since the Revised Scheduling Order was issued, Energy Commission staff, the California Coastal Commission (Coastal Commission), and the South Coast Air Quality Management District (the District), and other parties have continued to work toward the issuance of the FSA. As noted in the May 5, 2015, Scheduling Order and the May 8, 2015, Revised Scheduling Order, the District and the Coastal Commission determinations are essential to the complete review and analysis of this project.

### Air Quality:

On June 25, 2015, the District conducted a public meeting<sup>4</sup> on the Preliminary Determination of Compliance (PDOC) for RBEP. The City of Redondo Beach, an intervenor in this proceeding, has objected to the method by which the District provided notice of the meeting, as well as various substantive issues it feels need to be

addressed before the District may issue the Final Determination of Compliance (FDOC).<sup>5</sup>

On June 30, 2015, the District informed the Committee that the FDOC would likely be published within 30 days after the June 25, 2015, public meeting. However, the District also indicated that the timing for issuance of the FDOC could change based on the extent and contents of the air quality related comments and public input received.<sup>6</sup> Therefore, the current FDOC filing date and the balance of the schedule for preparation of the FSA, is uncertain and still in progress.

#### Coastal Commission Section 30413(d) Report:

On July 8, 2015, the Coastal Commission held a public hearing in Ventura, California to consider the Coastal Act section 30413(d) report on RBEP. At that time, the Coastal Commission unanimously voted to send the section 30413(d) report to the Energy Commission.<sup>7</sup>

The Coastal Commission's section 30413(d) report identifies areas in which it believes the PSA requires additional analysis, including alternatives; land use; wetlands; biological resources; and flooding, tsunamis, and sea level rise. Underlying the discussion of these sections, particularly alternatives, is a request that the Energy Commission consider the "need" for the project.

The Coastal Commission has also recommended certain coastal zone impact mitigation measures. By law, the Energy Commission must adopt these measures unless it finds that these measures are (1) infeasible or (2) that the proposed mitigation would cause greater environmental impacts.<sup>8</sup>

### **Closed Sessions**

The Committee may temporarily adjourn into closed session to deliberate pursuant to Government Code section 11126.
