Affiliation: UC Davis Western Cooling Efficiency Center

Dear California Energy Commission,

The UC Davis Western Cooling Efficiency Center would like to thank the CEC and the EPIC program for the opportunity to help develop and demonstrate innovative, efficient, and environmentally friendly approaches to provide space conditioning, water heating, and load flexibility in residential buildings through low GWP heat pumps and load flexibility controls.

On behalf of ourselves and our partners, which include TRC Engineers, Rheem, ecobee, WattTime, Mutual Housing, RCD Housing, Yolo County Housing, and Eden Housing, we are grateful for this opportunity and are excited to work together to support and materialize the California Energy Commission's mission.

We hope that each of you and your families are safe and well.

Sincerely,

UC Davis Western Cooling Efficiency Center

Thank you,

Caton
