# Attracting Private Capital + New Business Models for EV Charging Infrastructure

Marc Monbouquette, Regulatory Affairs Manager  
CEC IEPR Panel – June 24, 2020

# Enel X Ecosystem

An open system ensuring interoperability

# Recommendations

- Public / private EV infrastructure fund, as an extension of I-Bank or CalCAP (or standalone), to attract and deploy institutional capital
  - Similar to rooftop solar securitization, plus a state-backed loan guarantee
  - Challenge is to deliver on utilization
- On-tariff cost recovery: utility capitalization without the need for ratepayer dollars
- Monetizing VGI services
- Market mechanisms, tariffed solutions, and open standards are key!

enel x

thank you!
