## **10/8/2015**

Early evening on the 8th of October 2015 we heard a sound coming from the power plant that could best be described as a hissing sound. When we saw the fire trucks headed towards the plant, we knew that there was something amiss. A few minutes later as I was jogging down our hill, I could see a lot of odd looking smoke coming out of the plant. Also, as I turned onto the eucalyptus trail, I was overwhelmed by something that smelled like natural gas.
