To whom it may concern,

I am writing this email to submit written comments in regard to the proposed Offshore Renewable Project.

In my view three critical components to consider in evaluating the impacts of this proposal are the following:

- 1) Consistency with the Big Sur Land Use Plan
- 2) Evaluation of visual impact from perspective of driving on Highway 1 as the driving experience will provide both a series of potential individual viewing points and also a cumulative visual impact.
- 3) Visual impact in the evenings, if lighting beacons or other light sources are included in the installation.

Thank you for your consideration.

Regards,

Kirk
