## **Public Comment - Item 6 Local Ordinance Applications**

Hello,

I am writing as a primary care physician and medical community climate organizer to share my Professional support for adoption of these reach codes. In order to protect health and solve the climate crisis to protect our children's health and safety we must engage the clean energy transition urgently and in earnest. Building electrification is a critical piece of this transition.

I also urge the CEC to build off local leadership and take electrification further by setting an all-electric baseline for new construction in the 2022 building code.

Thank you,  
Ashley McClure, MD  
Berkeley, CA
