## **Public Comment - Item 6 Local Ordinance Applications**

I am a California physician writing in support of approval of these city ordinances promoting clean energy. I also urge the CEC to set an all-electric baseline for new construction in the 2022 building code. There is no compelling reason to delay requiring all-electric new construction. Such a bold shift will pay dividends in health, environmental quality and safety for years.

Thank you for your attention,  
Anne Simons, MD
