Public Comment - Item 6 Local Ordinance Applications

Hello, I am a California citizen, born and bred. California has been a leading voice in addressing a sustainable future. Your work, as the California Energy Commission, is to ensure that our energy plan is sustainable. Not somewhere out there in the distant future, but within sight by Californians and the world NOW. Please make our building codes be all-electric. This is essential. It will help drive alternative energy solutions while it will ensure a future - a sustainable future - for all of us.

Thank you,
Kim Stryker
