Ms. Worrall, i attended a meeting with San Jose City representatives regarding concerns that I and others in my neighborhood have about the Great Oaks Backup Generating Facility.

My neighbors and I have a long list of concerns, including air quality, seven years of construction noise, 331 thousand gallons of diesel fuel storage, and an adverse impact on our home values.

The most glaring failure by the planning commission is that not one neighbor was notified of the proposed facility in 2017 when the project was approved. This fact was verified in today's meeting by Patrick Kelly of the planning committee. This is wrong on all accounts, and may even be grounds for litigation.

I'm reaching out to you in the hope that you will help in stopping this project from moving forward.

Regards, Nick Renna
