Docket No. 19-BSTD-06

Application for Approval of
Locally Adopted Building Energy Standards
in Accordance with Section 10-106 of
the California Code of Regulations, Title 24, Part 1

Local Jurisdiction Name: County of San Mateo

Date of Local Adoption: February 25, 2020

Purpose

The California Energy Commission (CEC) has posted this locally adopted energy standard for a mandatory public review period, per California Code of Regulations, Title 24, Part 1, Chapter 10, Section 10-106 and Section 10-110. The application has been determined to be complete by CEC staff, including all the supporting information necessary to meet the requirements of Section 10-106. The CEC seeks public comments on whether the locally adopted energy standard will consume less energy than the 2019 California Energy Code, California Code of Regulations, Title 24, Part 6 (Energy Code).

The full application is available for download on the CEC’s website at https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=19-BSTD-06.

Background

Statutory provisions in Public Resources Code Section 25402.1(h)(2) and regulatory provisions in Section 10-106 of Title 24, Part 1 (2019 California Administrative Code) establish a process that allows local governmental agencies to adopt and enforce energy standards for newly constructed buildings, additions, alterations, and repairs to existing buildings provided the CEC finds that the local standards will require buildings to be designed to consume no more energy than permitted by the Energy Code.

Local governmental agencies are required to apply to the CEC for approval prior to enforcement of such standards, and their application must include the basis of the local government’s determination that its standards are cost effective and the supporting analysis for how the local government has determined their proposed energy standards will consume less energy than the current Energy Code. The CEC must then find, based on the submitted application materials, that the standards will result in a reduction in energy consumption compared to the statewide Energy Code.
