Approve all-electric reach codes

I support adoption of these reach codes and also urge the CEC to build off local leadership and take building electrification further by setting an all-electric baseline for new construction in the 2022 building code.

We have little time left to try to prevent the worst impacts of climate change. The strategy is clear: we need to electrify everything!

Market forces, incentives and good intentions will not get us there in time. This climate emergency requires strong regulations now.

Thank you for your continued leadership in this area!

Steve Schmidt, Los Altos
