## **In Support of Adoption of Reach Codes**

I support adoption of these reach codes. I also urge the CEC to follow local leadership and take electrification further by setting an all-electric baseline for new construction in the 2022 building code. We are being ravaged by climate change. The cause of our pain has a name: it's fossil fuels. You can't "believe" in climate change and believe that we can continue burning gas at the same time. There's simply no excuse for continuing to build out fossil fuel infrastructure while our communities burn. We need you to do something about it. You can give us hope by illustrating you will do what must be done in the face of this crisis. There is no question - gas has got to go. Fossil fuels are the largest source of climate pollution in the U.S. They are dirty, dangerous, and it is driving the climate change that is perpetuating our constant trauma in California. Thank you.
