**Napa Climate NOW! Comment Re Item 5 Local Ordinance Applications**

*Additional submitted attachment is included below.*

I am commenting on behalf of Napa Climate NOW!, residents of Napa County who work to slow global warming. We support adoption of these reach codes. We also urge the CEC to build off local leadership and take electrification further by setting an all-electric baseline for new construction in the 2022 building code.

All-electric buildings are less expensive to build, making "affordable housing" more affordable. All-electric buildings are healthier--for the planet by reducing methane emissions and for people by reducing pollutants from natural gas appliances.

Take action that will benefit Californians for years to come and adopt an all-electric baseline in the 2022 code.

Thank you,  
Chris Benz
