100% by or before 2030 is the least we can, but must, do

We will be living in an increasingly disrupted climate for the rest of our lives. We need to forget about limitations and boldly do everything we can at every level of production and society to re-connect with this planet and encourage our survival.

Reaching 100% clean energy by 2030 is one of the least of what we need to do, so let's please at least pull that off. Thank you.
