## **I support SB100 - Let's Do It**

California is always been in the forefront of environmental protection and conservation. We Californian have set ourselves apart from many states in legislation and rule-making to improve air, water and soil quality. Under former Government Jerry Brown's leadership in America Pledge, cities and other actors in California and across the US continues to aggressively act on GHG emission reduction and many other environmental preservation initiatives, even the disappointing Trump administration tries to reverse our nation's achievement and involvement in planet protecting activities. Let's pass SB100, a visionary pursuit and a template for other cities and states to contribute more to a more just, hopeful and cleaner future.
