Advancing 100% clean energy goals to 2030 with microgrid policy

Given our dire circumstances, I fully support moving our goal of reaching 100% clean energy by 2045 to doing so by 2030.

We can accelerate the timeline by wisely supporting local access to the behind the meter distribution grid, now being formulated in Track 2 proceedings at the CPUC, as mandated by SB 1339. Microgrids will accelerate the adoption of clean energy technology, promote local resiliency throughout the state, and lessen our dependence on vulnerable long-distance high frequency transmission lines.
