Central California wind energy will displace commercial fishermen

I am a commercial fisherman in Morro Bay and my crew and I sustainably fish for sablefish other federally managed groundfish species in the call areas being considered. These areas shown are vital fishing grounds and there is legitimate concern that the fishery I participate in will no longer be financially viable if we lose this important access. I request that any impacts to fishermen be considered and mitigated for as a condition of any lease or construction in the areas under consideration.

Thank you for the opportunity to comment,

Owen Hackleman,
Owner, fishing vessel Provision
