## **Supporting all-electric new construction**

Dear CEC committee,

I am writing in support of stronger requirements to decarbonize new construction.

My firm has worked in many green buildings and I strongly advocate for all-electric new construction. It is not only reachable with the new technology, but it can also be less expensive, more flexible in the design, promotes grid resiliency and adaptability, it is safer, and it brings undisputable benefits to help fight climate change.

Thank you,

Adhamina Rodriguez
