## **Critical Emergency - A manufacturer's perspective in favor of policies**

Many of our clients won't invest in durable and resilient solutions without being forced to by legislation. From a manufacturer's perspective it feels really frustrating to start seeing the market change only because of Title 24, NY Law 97, Buy Clean California etc. Policies are the only way to move towards the urgent change we need in our industry and society. Please feel free to reach out if I can contribute any further.
