## **OIR-18-01 Use of and-or**

OIR-18-01 Use of "and/or"

It appears that Section 1302. Rules of Construction and Definitions. (a) (2) removes the use of "and/or" in Title 20, Chapter 3.

Pursuant to Section 1302. Rules of Construction and Definitions. (a) (2) The use of "and" in a conjunctive position means that all elements in the provision must be complied with, or must exist to make the provision applicable. Where compliance with one or more elements suffices, or where existence of one or more elements make the provision applicable, "or" (rather than "and/or") is used.

The following existing section contains "and/or":

Section 1302. Rules of Construction and Definitions. (b)(56) "Premise identification number" means the unique identification number assigned by a utility to a collection of buildings and/or meters serving an individual customer at a contiguous location.

The following proposed amended section contains "and/or":

Section 1302. Rules of Construction and Definitions. (b)(54) "Power plant" means a plant located in California or a California control area that contains one or more prime movers, and/or one or more electric generators, and appropriate auxiliary equipment.

The following proposed sections contains "and/or":

Section 1384. Biodiesel and Renewable Diesel Production Data. (b) (1) (B) The type and amount of feedstock and/or California Air Resources Board Low Carbon Fuel Standard pathway used to produce biodiesel.

Section 1384. Biodiesel and Renewable Diesel Production Data. (b) (2) (B) The type and amount of feedstock and/or California Air Resources Board Low Carbon Fuel Standard pathway used to produce renewable diesel.

Authority cited is missing from 1384.

Please correct or clarify the use of "and/or" and provide references for authority.
