## **FDAS-20-01 promoting flexible demand capabilities**

FDAS-20-01 promoting flexible demand capabilities

Pursuant to Public Resources Code - PRC 25402. (f) (1), The Energy Commission shall, after one or more public hearings, adopt, by regulation, and periodically update, standards for appliances to facilitate the deployment of flexible demand technologies. These regulations may include labeling provisions to promote the use of appliances with flexible demand capabilities.

Perhaps the labeling should notify customers that are not served by a "load-serving entity" what advantage if any, they may find in purchasing and using flexible demand capable appliances.

Labeling should notify customers that are not served by a "load-serving entity" if there is no value in paying extra for flexible demand capable appliances.
