We need 100% clean electricity by 2030

I am sure you have felt the effects of this years' wildfires and so have the rest of us Californians. We have been ill-equipped with fighting the many wild fires that ravaged this year as well as previous years so I implore you to consider this position. I want you to adopt these positions and be proactive about doing the right thing. Accordingly, we urge you to:

Adopt as statewide goals in the SB 100 report zero-carbon energy by 2030 and zero greenhouse gas emissions in the electricity sector in 2030.

Again this is important for not only your life but also the lives of your family and the lives of your fellow Californians. Thank you for your consideration!
