We need 100% energy by 2023

The State should consider accelerating their actions to commit to 100% clean energy. We find ourselves to be in the very center of climate change. The Earth is only getting increasingly hotter, each year breaking previous set records. There have been a crazy amount of wildfires and I personally know many students that have had to evacuate their campuses for their safety. Arctic seas continue to melt due to our earth's increasing temperatures. Climate change is very urgent and I, along with many others who advocate for this would like to see change made. As a 19 year old, I hope to grow up in a cleaner and safer environment. Please consider the urgency of this topic. Thank you.
