-----  
Dear Chair and Commissioners,

On behalf of Climate Action Campaign, we urge the Commission to move toward adopting a single, all-electric baseline to support all-electric buildings that are cheaper to build, healthier to live in and reduce carbon emissions.

All-electric buildings are more affordable to construct, helping to ease new home construction. They do not have dangerous methane gas creating indoor air pollution that has proven to increase asthma and other diseases. All-electric buildings will also reduce emissions to help us fight the climate crisis.

The Commission has a unique and pivotal role in decarbonizing our businesses, homes and communities. We urge you to take the necessary step toward all-electric buildings by adopting a single, all-electric baseline.

Thank you.

--
