**2021\_02 Valentine Requesting CEC Public Expression on CEC reasons for delaying Elec New Res Constrn Bldg Code w Exceptions**

Attached is a 2021 Valentine's postcard made especially for the California Energy Commissioners requesting CEC Public Expression on CEC reasons for delaying a 2022 New Construction Electric Residential Building Code with Exceptions (which seems not to be exactly what recent climate activists have requested).

*Additional submitted attachment is included below.*

2021 Valentine's postcard front and back, made especially for the California Energy Commissioners. This requests CEC Public Expression on CEC reasons for delaying a 2022 New Construction Electric Residential Building Code with Exceptions (a slant)

February 14, 2021

Hey Commissioners,

I like you because you are typically word-expressive. Sometimes you are seemingly loving your own expressions, clichés & rhetoric. You can make California's energy work & life sing.

'OPPORTUNITY KNOCKS !!!'  
(And unfortunately, might sometimes keep knocking and knocking and knocking...  
UGH huh. NOTE: This is not a threat in any way, shape or form.)

Can you please talk, write and/or sing publicly on the [possibly many] CEC reasons for delaying adoption of a 2022 new residential construction standard building code with exceptions. (note a personal slant) and possibly your feelings on delaying?

Listening to many recent climate activists reiterate their wants of a California 2022 all-electric building code to be accomplished in this next code cycle, at many meetings, not only vortexes their desire, but also can discount other relevant energy agenda items and public commenter issues, e.g., Co+. Meetings seem lengthier and might be less tolerable for some relevant CEC staff, patient and usually kind audience members, i.e., myself.

It often makes sense every public commenter is heard and not ignored.

If a 2022 all-electric building code cannot be constructed for certain reasons,  
(It is easy to guess at many possible reasons and still believe a new code is possible.)  
another song might be appreciated, especially if that is the only legal expression method which can make sense.  
Maybe the CEC's Building Decarbonization staff can sing soon.

Happy Valentine's Day 2021 California Energy Commissioners!

Love from one of your listening and reading 'groupies', (so far anyways, I might quit),  
Claire Warshaw
