## **We must adopt an all-electric building code**

We must stop burning fossil fuels. There is no way around this. Natural gas has been proposed as a "bridge" to a fossil-free future, but continued use of natural gas merely worsens our climate change crisis and renewable, sustainable sources of energy are now economically competitive, if not cheaper, than fossil fuels. You must do the right thing in this crisis. We face a calamity. Our future depends on moving as quickly as possible away from fossil fuels.
