EXECUTIVE SUMMARY

TRC Solutions, Inc. (TRC) was retained by Vantage Data Centers (Vantage, hereinafter referred to as "Client" or "User") to perform a Phase I Environmental Site Assessment (ESA) of the property located at 2590 Walsh Avenue, Santa Clara, CA 95051 (herein referred to as the "Site"). TRC conducted the ESA in connection with the Client's planned business transaction involving the Site. The Phase I ESA described in this report was performed in accordance with the scope and limitations of the American Society for Testing and Materials Practice E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-13). Limiting conditions and/or deviations from the ASTM E 1527-13 standard are described in Sections 1.3 and 7.7 of this report.

The Property is located in a commercial, residential, and light industrial portion of Santa Clara. The approximately 6.69-acre Site is currently owned by Stephens & Stephens (Walsh Avenue), LLC and is leased by Mia Sole for operation as a solar panel manufacturing facility. The property consists one one-story building, totaling approximately 111,585 square feet (assessor's parcel number 216-28-112). The exterior of the subject property consists of paved parking, landscaping, and concrete sidewalks.

Adjacent parcels include a railroad right of way owned by Peninsula Corridors Joint Power to the south, a software research and development facility to the east, Vantage Data Centers to the northeast, a microelectronics testing facility to the northwest, and an electrical substation to the west. Surrounding properties to the north, east and west were historically used for agricultural orchard operations or were undeveloped until the early 1980's, when the area was developed for light industrial and commercial use. Surrounding properties to the south share a similar historical use but were developed in the early 1980's for residential use.

RECs

TRC has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527 of the property located at 2590 Walsh Avenue in Santa Clara, the Site. Any exceptions to, or deletions from, this practice are described in Sections 1.3 and 7.7 of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) and/or controlled recognized environmental conditions (CRECs) in connection with the Site.

Findings

The following additional findings have been identified during the course of this Phase I ESA that have not been determined to be RECs but may be of importance to the User:

Finding No. 1

Historic operations on the Site as a semiconductor and related technology manufacturing facility may have involved the use and/or generation of hazardous wastes (predominantly metals and solvents). While there are no reported leaks or spills documented for the Site, an evaluation of soil vapor conditions is recommended.

Finding No. 2

Eight properties within a one mile radius of the Target Property with a shared history of agricultural orchard operations have cited historical pesticide use as the source of elevated concentrations of arsenic, lead, and organochlorine pesticides in soil, which has led to ongoing oversight and

management as well as land use restrictions. Additionally, the eastern portion of the Site was formerly operated as an orchard. Accordingly, an evaluation of shallow soil conditions for the potential presence of arsenic, lead, and organochlorine pesticides is recommended.

Additionally, dust observed in the machine shop is considered a *de minimis* condition in connection with the Site.

Conclusions and Recommendations

Although this assessment has revealed no evidence of recognized environmental conditions (RECs) and/or controlled recognized environmental conditions (CRECs) in connection with the Site, we understand that future Site redevelopment may include renovations and/or new construction for commercial land uses. Given the Site's historic operations as both a semiconductor and related technology manufacturing facility and an agricultural orchard, the Site's proximity to various operations with similar historical and current uses, and our experience with similar operations in the area, TRC recommends completing a limited subsurface investigation to evaluate soil, and/or soil vapor conditions at the Site. In the event that construction activities will require dewatering, a groundwater investigation is also recommended. Investigation results should be compared to the Screening Levels (SLs) and Environmental Screening Levels (ESLs) established by the Department of Toxic Substances Control and the Regional Water Quality Control Board, respectively. Findings will useful for future redevelopment considerations.

This Executive Summary is part of this complete report; any findings, opinions, or conclusions in this Executive Summary are made in context with the complete report. TRC recommends that the User read the entire report for supporting information related to findings, opinions, and conclusions.

Legal Notice

TRC has prepared this Phase I ESA for the City of Pittsburg (hereinafter "Client" or "User"). This document was prepared by TRC solely for the benefit of the Client and the User. With regard to third-party recipients of this document, neither TRC, nor the Client, nor the User, nor any of their respective parents, affiliates, or subsidiaries, nor any person acting on their behalf: (a) makes any warranty, expressed or implied, with respect to the use of any information or methods disclosed in this document. Any third-party recipient of this document, by its acceptance or use of this document, releases TRC, the Client, the User, and their parents, affiliates, and subsidiaries from any liability for direct, indirect, economic, incidental, consequential, or special loss or damage whether arising in contract, warranty, express or implied, tort, or otherwise, and irrespective of fault, negligence, and strict liability.

1.0 INTRODUCTION

TRC Solutions (TRC) has prepared this Phase I Environmental Site Assessment (ESA) for Vantage Data Centers (Vantage, hereinafter referred to as "Client" or "User").

This report was prepared for and may be relied upon by Client and User for the purposes set forth herein; it may not be relied on by any party other than the Client and User. TRC will consider authorization for third-party reliance on this report if requested by the Client. TRC reserves the right to deny reliance on this report by third parties.

1.1 Purpose and Scope of Services

The following Phase I ESA was performed for the property located at 2590 Walsh Avenue, Santa Clara, California, 95051 (hereinafter the "Site"). A Vicinity Map is included as **Figure 1**. This Phase I ESA has been prepared by TRC in accordance with the American Society for Testing and Materials E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I ESA Process* (ASTM E 1527-13) and is intended for the sole use of the City of Pittsburg.

The purpose of this assessment is to identify *Recognized Environmental Conditions* (RECs) at the Site, as defined by the ASTM E 1527-13 standard. The completion of this Phase I ESA report may be used to satisfy one of the requirements for the User to qualify for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* liability protections pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), thereby constituting *all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial or customary practice* as defined by 42 U.S.C. §9601(35)(B) of CERCLA.

TRC understands that this assessment is not funded with a federal grant awarded under the United States Environmental Protection Agency (U.S. EPA) Brownfields Assessment and Characterization program or for lending under the guidance of the Small Business Administration.

The Scope of Services for this Phase I ESA included the following tasks:

- Site and vicinity reconnaissance;
- Site and vicinity description and physical setting;
- Historical source review and description of historic Site conditions;
- Interviews with owners, operators, and/or occupants of the Site, and/or local officials;
- Review of environmental databases and regulatory agency records;
- Review of previous environmental reports/documentation, as applicable;
- Review of environmental liens, if provided or authorized to obtain by the User;
- Review of the site and surrounding area for controlled substances; and
- Preparation of a report summarizing findings, opinions, and conclusions.

1.2 Additional Services

Items outside the scope of the ASTM E 1527-13 standard include but are not limited to the following:

- Asbestos-containing building materials
- Radon
- Lead-based paint
- Lead in drinking water
- Wetlands
- Regulatory compliance
- Cultural and historic resources
- Industrial hygiene
- Emerging contaminants

- Health and safety
- Ecological resources
- Endangered species
- Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment
- Biological agents
- Mold

No additional services were performed outside the scope of the ASTM E 1527-13 standard.

1.3 Deviations to ASTM E 1527-13 Standard

No significant deviations or deletions to the ASTM standard were made during this Phase I ESA.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The Site is located at 2590 Walsh Avenue, Santa Clara, California, 95051 in a light industrial and commercial business land use area. The Site is described by the Santa Clara County tax assessor as Assessor Parcel Number (APN) 216-28-112 and is zoned as light industrial. The approximately 6.69-acre Site is currently owned by Stephens & Stephens (Walsh Avenue), LLC and is leased by Mia Sole for operation as a solar panel manufacturing facility. A Vicinity Map is included as **Figure 1**.

2.2 Site Improvements

Current on-Site improvements are listed in the following table. A Site Plan is included as **Figure 2**.

Site Feature	Description
Buildings (stories)	One one-story buildings with loading docks in each end and exterior enclosures for propane, liquid nitrogen, and liquid argon/metallic dust storage.
Construction date(s)	c.1982
Exterior areas	Paved or landscaped
On-Site roads/rail lines	N/A
Other large equipment	A liquid argon AST is present within the exterior enclosure southeast of the building.
Potable water supply	Santa Clara Valley Water District
Sewage disposal system(s)	Santa Clara Sewer Services
Heating/cooling system fuel source(s)	Pacific Gas & Electric (PG&E)
Back-up fuel source(s)	NA
Electricity supplier(s)	Pacific Gas & Electric (PG&E)

Table 2.1 - Site Improvements

Table 2.1 - Site	e Improvements
------------------	----------------

Site Feature	Description
Stormwater system	City of Santa Clara

2.3 Current and Historic Site Use

2.3.1 Current Site Use(s)

The Property is located in a light industrial and commercial business area and of Santa Clara. The approximately 6.69-acre Site is currently owned by Stephens & Stephens (Walsh Avenue), LLC and is leased by Mia Sole for operation as a solar panel manufacturing facility. The property consists one one-story building, totaling approximately 111,585 square feet (assessor's parcel number 216-28-112). The exterior of the subject property consists of paved parking, landscaping, and concrete sidewalks.

2.3.2 Previous Owner and Operator Information

Based on information provided by the User (Section 3.0), the historical record review (Section 4.0), and/or interviews conducted during this Phase I ESA (Section 6.0), historic Site ownership and operator information are provided in the tables below.

Site Owner/Operator (Operations)	From	То
Private Residence and Agricultural Orchards	c. 1939	c. 1968
Owner – KOLLREAL, a California Partnership – per Preliminary Title Report (PTR)	c. 1970	1977
Owner(s) – Richard T. Peery & John Arrillaga – per PTR	1977	c.1982
Operator – Versatec Inc Corporate Headquarters (technology manufacturing and consulting) – per city directories	1985	Unknown
Operator – Stryker Endoscopy (medical equipment supplier, manufacturing abilities unknown) – per city directories	1996	2001
Owner – Limar Realty Corp. #8 – per PTR	Unknown	2007
Owner - Stephens & Stephens (Walsh Avenue), LLC – per PTR Operator – MiaSole Inc. (Semiconductor, Thin Film Solar, and Related Electronic Manufacturing) – per city directories	2007	Present

Table 2.2 - Previous Owner/Operator Information

2.4 Physical Setting

According to the United States Geological Survey, 2012, 7.5-Minute Topographic Map for San Jose West, the Site is located approximately 3.54 miles south of the San Francisco Bay, the Site topographic elevation is approximately 48 feet above mean sea level, and local topography slopes toward the north and east. The subject property itself has no discernible slope other than for surface water drainage and for the loading docks. Based on local topography and historical environmental reports reviewed by TRC, the assumed direction of shallow groundwater flow is northeastward, toward the San Francisco Bay; however, a subsurface investigation would be required to determine actual depth to groundwater, flow direction, and water quality conditions.

The nearest surface water body is the Guadalupe River, a south-to-north flowing river located approximately 2 miles northeast of the subject property. The previous Phase 1 for the Site noted that the City of Santa Clara Planning Department indicated that no wetlands or riparian habitats (current or historical) exist within the boundaries of the subject property.

The database radius report, supplied by Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut, was reviewed to obtain information regarding the dominant soil composition in the Site vicinity. This information is summarized below:

Hydric Status:	Not hydric
Soil Surface Texture:	Clay Loam
Soil Component Name:	Botella
Deeper Soil Types:	Silty clay loam and sandy clay loam

Please refer to the GeoCheck Physical Setting Source Summary of the EDR report presented in **Appendix A** for further information regarding the soil composition in the Site vicinity. According to EDR, the subject property is located within a 500-year flood zone.

3.0 USER PROVIDED INFORMATION

According to the ASTM E 1527-13 standard, certain tasks that may help identify the presence of RECs associated with the Site are generally conducted by the Phase I ESA User. These tasks include providing or authorizing the *environmental professional* to obtain recorded land title records for environmental liens or activity and use limitations (AULs); providing specialized knowledge related to RECs at the Site (e.g., information about previous ownership or environmental litigation); providing commonly known or *reasonably ascertainable* information within the local community about the *property* that is material to RECs in connection with the *property*; and informing the *environmental professional* if, as believed by the User, the purchase price of the *property* is lower than the fair market value due to contamination. Information provided by the User pursuant to that request is listed in Section 3.0. A copy of the completed User questionnaire is included in **Appendix B**.

3.1 Title and Judicial Records for Environmental Liens or AULs

In addition to reviewing the EDR report (discussed in Section 4.2), local municipal records (Section 4.4), the Regional Water Quality Control Board's (RWQCB) GeoTracker and the Department of Toxic Substances Control's (DTSC) EnviroStor online search features were also reviewed (Section 4.4). TRC obtained supplemental information regarding AUL-listed properties within Pittsburg from EDR. No evidence of environmental liens or AULs associated with the Site were identified.

3.2 Specialized Knowledge

The User was not aware of specialized knowledge related to RECs at the Site.

3.3 **Property Value Reduction Issues**

The User was not aware of property valuation reduction issues regarding the Site.

3.4 Commonly Known or Reasonably Ascertainable Information

Commonly known or reasonably ascertainable information was provided to TRC by the User and is incorporated into other sections of this report. A copy of the User Questionnaire is included in **Appendix B**.

3.5 Reason for Conducting Phase I ESA

TRC understands the User requires a Phase I for due diligence purposes.

4.0 **RECORDS REVIEW**

4.1 Historic Use Information

Information regarding Site and vicinity historic uses was obtained from various publicly available and practically reviewable sources including:

- Aerial photographs (scale: 1" = 500') dated 1939, 1948, 1950, 1956, 1963, 1968, 1974, 1982,1993,1998, 2006, 2009, 2012, and 2016;
- Historical Sanborn® Fire Insurance Maps (Sanborn Maps);
- Topographic maps dated 1889, 1897, 1899, 1953, 1961, 1968, 1973, 1980, and 2012;
- City directories dated 1922, 1925, 1926, 1930, 1931, 1935, 1936, 1940, 1942, 1945, 1946, 1950 1955, 1957, 1960, 1962, 1963, 1964, 1965, 1966, 1968, 1970, 1974, 1975, 1978, 1980, 1982, 1985, 1986, 1991, 1994, 1996, 1999, 2000, 2001, 2004, 2006, 2009, 2014, and 2017;
- Local municipal records;
- An environmental database report; and
- Interviews with Site representative(s) and regulatory agency official(s), as necessary.

Historical research documentation is included in Appendix C.

Sanborn Maps were originally produced for assessing fire insurance liability in urban areas in the United States. The maps provide detailed information (e.g., building construction, facility occupants, storage tank locations, and hazardous material storage areas), which can be used as a resource to document land use and structural change over time. EDR researched the availability of Sanborn Maps in the vicinity of the Site; however, EDR stated that Sanborn Map coverage does not exist for the Site or nearby surrounding area.

4.1.1 Site History

Operational History

Table 4.1 - Site History

Year	Site History
1939 – c. 1968	Beginning with the 1939 aerial photograph (aerial) the eastern portion of the Site was covered by agricultural orchards and the western portion of the Site was undeveloped. A narrow creek was visible extending north to south through approximately the center of the Site, creating the natural boundary between the two Site operations. A small residential structure was also apparent near the center of the Site. No other development was apparent. Site conditions remained consistent through the 1968 aerial.
1974	The 1974 aerial depicted the Site being completely cleared of all agricultural orchards and residences, with no site improvements, and the Site appeared to be dirt covered.
c.1982 – c. 2005	Beginning with the 1982 aerial, the Site had been redeveloped as a commercial property. One commercial building was located on the Site; The buildings appears to be consistent with the current location and orientation of the current building. The remainder of the site appeared to be asphalt covered parking with landscaped areas. A road consistent with Walsh Avenue was visible along the northern Site boundary. On-Site conditions remained consistent through the 1998 aerial provided by EDR and the December 2005 aerial available on Google Earth.
c.2006 – Present	The 2006 aerial depicted the previously described building still on-Site, and paved parking areas similar to previous aerial photographs; however, structures consistent with the current improvements (i.e liquid nitrogen and liquid argon storage areas to the southwest and southeast, respectively, and dust collection area to the southeast).

It does not appear that topographic contours in the Site area have significantly changed during the time period reviewed. If significant changes had been noted, it could indicate significant filling or excavation activity.

Hazardous Substances

Based on our review of the EDR listings for the Site, a list of hazardous substances including raw materials; finished products and formulations; hazardous wastes; hazardous constituents and pollutants including intermediates and byproducts that were historically present at the Site are included in **Appendix A** and are summarized in the following table:

WASTE CODE	RCRA WASTE DESCRIPTION
D001	IGNITABLE WASTE
D002	CORROSIVE WASTE

Table 4.2 – Target Property Historic Hazardous Substances

WASTE CODE	RCRA WASTE DESCRIPTION
D003	REACTIVE WASTE
D004	ARSENIC
D006	CADMIUM
D007	CHROMIUM
D008	LEAD
D010	SELENIUM
D011	SILVER
F001	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1- TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F002	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO- DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F003	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F005	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Table 4.2 – Target Property Historic Hazardous Substances

Site manufacturing operations are very limited, and most materials are not present. A small hazardous materials cabinet with small containers (<1 gallon) is present in the manufacturing area. Current hazardous substances and petroleum products observed during the Site reconnaissance, if any - including unidentified substance containers (when open or damaged,

and containing unidentified substances suspected of being hazardous or petroleum products) - are discussed in Section 5.2.

4.1.2 Adjoining Property History

1939 – 1968 Aerial Photographs

Beginning with the 1939 aerial, adjoining properties to the north and east were developed as agricultural orchards. A rail line consistent with the current alignment was visible adjoining to the southern portion of the Site. The adjoining property to the west was undeveloped. Conditions remained consistent through the 1968 aerial photograph.

1974 Aerial Photograph

The 1974 aerial depicted adjoining properties as undeveloped similar to the target property, having agricultural orchard operations removed.

1982 – 2016 Aerial Photographs

Beginning with the 1982 aerial adjoining properties were developed with apparent commercial structures and paved parking areas in their current orientations. Walsh Avenue and Bowers Avenue were visible adjoining to the north of the Site and west of the western adjacent property, respectively. Conditions on adjoining properties remained consistent throughout subsequent aerial years reviewed.

4.1.3 Surrounding Property History

Direction	Surrounding Property History Based on Aerial Photos
North and East	From 1939 through 1968 surrounding areas to the north and east were developed with agricultural orchards. Beginning in 1974 through 2012 surrounding areas to the north and east became increasingly developed with various commercial uses.
West	From 1939 through 1968 surrounding areas to the west were undeveloped. Beginning in 1974 through present, surrounding areas to the west became increasingly developed with various commercial and light industrial uses.
South	From 1939 through 1950 areas to the south were developed with agricultural orchards. Beginning in 1956 through 1968, the surrounding areas to the south and southwest depicted the introduction of residential developments, while the remainder of the surrounding area to the south remained as agricultural orchards. By 1974, most surrounding areas south of the existing railroad lines, constructed prior to 1889, were depicted as residential developments.

4.2 Database Report and Environmental Record Review

A database search report that identifies properties listed on State and Federal databases within the ASTM-required radii of the Site was obtained from EDR and is included in **Appendix A**. The environmental database report identified 19 records/listings for the Site and 216 other records/listings within the search radii of the Site. These properties included those that could be mapped and those that could not (i.e., orphan properties).

4.2.1 Subject Site

Site information included in the database search report is summarized in the following table:

Site Facility Name(s) and/or Listed Address(es)	MiaSole HI Tech Inc. 2590 Walsh Avenue
EDR Map No(s).	1, 2, 3, 5 - 11
Database(s)	HAZNET, RCRA-LQG, HWTS, EMI, CERS, FINDS, ECHO, CERS HAZ WASTE, NPDES, CIWQS
Description/ID No(s).	 HAZNET: California Department of Toxic Substance Control (DTSC) Hazardous Waste Facility and Manifest Data. RCRA-LQG is the Environmental Protection Agency's Resource Conservation and Recovery Act, the database includes information on sites which generate, transport, store, treat and/or dispose over 1,000 kilograms (kg) of hazardous, or 1 kg of acutely hazardous waste per month. HWTS: DTSC Hazardous Waste Tracking System. EMI: California Air Resources Board Emissions Inventory Data (EMI) CERS: California Environmental Reporting System FINDS: Facility Index System/Facility Registry System ECHO: US EPA Environmental Compliance History Online Database. HAZ WASTE: CERS Hazardous Waste sites. NPDES: National Pollutant Discharge Elimination System Permits Listing CIWQS: State and Regional Water Quality Control Boards (RWQCB) Integrated Water Quality System
Database Review Summary	The target property is listed as a large quantity generator of inorganic and organic hazardous wastes and solvents. No violations were noted, and no releases were identified.
Site Facility Name(s) and/or Listed Address(es)	Stryker Endoscopy 2590 Walsh Avenue
EDR Map No(s).	4
Database(s)	California CUPA Listings
Description/ID No(s).	CUPA: Certified Unified Program Agency
Database Review Summary	The listing was administrative in nature. The listing indicated that the property generates hazardous solvent wastes. No violations or releases were noted, and therefore it is not anticipated to affect the Site.

4.2.2 Adjoining and Surrounding Property Record Review

TRC evaluated the following factors to determine whether additional environmental records should be reviewed with respect to the potential for contaminant migration from the adjoining and surrounding properties:

- (1) Whether the property is upgradient or downgradient of the Site related to potential groundwater migration based on the local topography, and the assumed (or known) groundwater depth and northward shallow groundwater flow direction;
- (2) Whether the property is upgradient or downgradient of the Site related to potential vapor migration based on readily available information pursuant to the ASTM E 1527-13 standard including soil and geological characteristics; contaminant characteristics; contaminated plume migration data; and significant conduits that might provide preferential pathways for vapor migration such as major utility corridors, sanitary sewers, storm sewers, and significant natural conduits such as Karst terrain (vapor migration may also be influenced by the age and design of infrastructure features associated with these conduits);
- (3) Property case status (i.e., whether the state environmental agency or applicable regulatory authority has issued a No Further Action letter or other similar closure document);
- (4) Type of database and whether the presence of contamination is known; and
- (5) The distance between the listed property and the Site.

Based on this evaluation, TRC limited the review of additional environmental records to the properties listed below because the potential for contamination to be migrating to the Site from the other properties identified by the database search is considered low.

4.2.2.1 Adjoining Properties

Information regarding adjoining properties (those which share a common property boundary with the Site) included in the database search report is summarized in the following table(s):

Facility Name(s) and/or Listed Address(es)	International Diagnostic Technology 2552 WALSH AVE
EDR Map No(s).	12
Approximate Location Relative to Site	102 feet east
Elevation Relative to Site	Higher
Database(s)	FINDS, RCRA-SQG, ECHO
Description/ID No(s)	RCRA-SQG: RCRA small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. (Also see previous definitions)
Presumed Hydrogeologic Setting Relative to Site	Cross-Gradient
Database Review Summary	The listing was administrative in nature. The listing indicated that the property generates hazardous wastes. No violations were noted, and therefore it is not anticipated to affect the Site.
Facility Name(s) and/or Listed Address(es)	Vantage Data Centers 4 LLC. 2565 Walsh Avenue

EDR Map No(s).	13, 14
Approximate Location Relative to Site	205 feet east
Elevation Relative to Site	Higher
Database(s)	AST, CERS TANKS, CERS
Description/ID No(s)	AST: Above ground storage tank (AST) listings CERS TANKS: California AST and underground petroleum storage tank (UST) facilities (Also see previous definitions)
Presumed Hydrogeologic Setting Relative to Site	Cross-Gradient
Database Review Summary	The listing was administrative in nature. The listing indicated that the property contains ASTs. No violations were noted, nor was there any indication of a release, and therefore it is not anticipated to affect the Site.

Facility Name(s) and/or	Uranium Substation
Address(es)	2705 Bowers Avenue
EDR Map No(s).	15
Approximate Location	229 feet west
Relative to Site	
Elevation Relative to Site	Higher
Database(s)	CERS HAZ WASTE, CERS
Database(s)	CERS HAZ WASTE, CERS
Description/ID No(s).	(see previous definitions)
Presumed	
Hydrogeologic Setting	Cross-gradient
Relative to Site	
	The listing was administrative in nature, indicating that the property stores
Database Review	hazardous wastes and acts as an electric power substation. Identified
Summary	violations refer to reporting and implementation of a Hazardous Materials
ounnary	Business Plan (HMBP), and are not indicative of a release, therefore it is
	not anticipated to affect the Site.
Facility Name(s) and/or	Intel Corporation
Address(es)	2625 Walsh Avenue
EDR Map No(s).	16, 17, 18
	,
Approximate Location	
Relative to Site	315 feet north

Elevation Relative to Site

Higher

Database(s)	LUST, HIST CORTESE, HIST LUST, HIST UST, AST, CERS,
Database(s)	
Description/ID No(s).	 LUST: refers to a Leaking Underground Storage Tank and is regulated by the RWQCB. HIST LUST: refers to a historic listing of LUST and is regulated by the RWQCB. HIST LUST: refers to a historic listing of underground storage tanks. HIST CORTESE: RWQCB Hazardous Waste & Substance Site List. (Also see previous definitions)
Presumed Hydrogeologic Setting	Downgradient
Relative to Site Database Review Summary	The listing indicated a LUST (case closed) site, for unidentified contaminants from a leak detected in 1987. According to the listing, the case was remediated and was granted a case closure/no further action as of 1996. Due to the downgradient location and case closure from the RWQCB, this case is not anticipated to have impacted the Site.
Facility Name(s) and/or Address(es)	Apple Inc. 2630 Walsh Avenue
EDR Map No(s).	19, 20, 21, 22
Approximate Location Relative to Site	340 feet north
Elevation Relative to Site	Higher
Database(s)	CERS HAZ WASTE, CERS, RCRA-LQG, FINDS, CUPA LISTINGS, RCRA-SQG
Description/ID No(s).	(See previous definitions)
Presumed Hydrogeologic Setting Relative to Site	Downgradient
Database Review Summary	The listing was administrative in nature, indicating that the property generates hazardous meatal wastes (cadmium, chromium, lead, silver) and solvents. No violations were noted, nor was there any indication of a release, and therefore it is not anticipated to affect the Site.

Based on the above listing(s), TRC conducted a review of available files for adjacent properties on Envirostor and Geotracker. These files are included in the summaries in the table above.

4.2.2.2 Surrounding Properties

TRC evaluated the following factors to determine whether additional environmental records should be reviewed with respect to the potential for contaminant migration from the adjoining and surrounding properties:

1. Whether the property is upgradient or downgradient of the Site with respect to potential ground water migration based on the local topography, and the assumed ground water depth and southeast shallow ground water flow direction;

- 2. Whether the property is upgradient or downgradient of the Site with respect to potential vapor migration based on readily available information pursuant to the ASTM E 1527-13 standard including soil and geological characteristics; contaminant characteristics; contaminated plume migration data; and significant conduits that might provide preferential pathways for vapor migration such as major utility corridors, sanitary sewers, storm sewers, and significant natural conduits such as Karst terrain (vapor migration may also be influenced by the age and design of infrastructure features associated with these conduits);
- 3. Property case status (i.e., whether the California Department of Toxic Substance Control or Regional Water Quality Control Board has issued a No Further Action letter or other similar document);
- 4. Type of database and whether the presence of contamination is known; and
- 5. The distance between the listed property and the Site.

Based on this evaluation, TRC limited the review of additional environmental records to the properties listed below, based on their presumed hydrogeologic setting, since the potential for contamination to be migrating to the Site from the other properties identified by the database search is considered low.

4.2.2.1.1 Federal Superfund Sites

The database search report identified National Priorities Listings for three surrounding properties within the general vicinity of the Site; information regarding this property is summarized in the following tables:

Facility Name(s) and/or Address(es)	INTEL MAGNETICS, 3000 OAKMEAD VILLAGE
EDR Map No(s).	Reg
Approximate Location Relative to Site	2115 feet northwest
Database(s)	NPL, SEMS, RCRA-SQG, US ENG CONTROLS, US INST CONTROLS, CA HIST Cal-Sites, ROD, PRP, CONSENT, NY MANIFEST

Description/ID No(s).	 NPL: US EPA National Priorities Listing, identifying Federal Superfund Sites under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) SEMS: Superfund Enterprise Management System Archive US ENG CONTROLS: A listing of sites with engineering controls in place. US INST CONTROLS: A listing of sites with institutional controls in place CA HIST Cal-Sites: DTSC Database of known and potential hazardous substance sites. ROD: Record of Decision documents mandate a permanent remedy at an NPL (Superfund) site. PRP: A listing of verified Potentially Responsible Parties (PRPs). CONSENT: Superfund (CERCLA) Consent Decrees NY MANIFEST: US Department of Environmental Conservation Facility and Manifest Data. (Also see previous definitions)
Database Review Summary	The Intel Magnetics facility produced and tested magnetic products and computer memories on site. Micro Storage occupied the site from 1985 to 1986 and used the facility for research and development and pilot manufacturing. Monitoring wells on the site are contaminated with volatile organic compounds (VOCs) and semi-volatile organic compounds (VOCs), believed to have resulted from surface spills and a leak from an underground storage tank. In February 1989, the RWQCB issued a cleanup order for the Site. EPA then issued a ROD for the Site on August 26, 1991. The ROD remedial action objectives are to prevent any further migration of contaminants in the groundwater, to prevent any further exposure to the public of contaminated groundwater, and to restore the A-zone groundwater to drinking water quality. According to the EPA's fifth 5 year review, completed in September 2017, the contaminant concentrations in the shallow A-zone plume are decreasing and that there has been no contaminant migration into the underlying B-zone of the shallow aquifer; however, cleanup standards at the Site have not been met in all wells. Institutional controls and two deed restrictions are in place, which are intended to prevent the use of the groundwater beneath the site, and verification monitoring is ongoing.

Facility Name(s) and/or Address(es)	APPLIED MATERIALS, 3050 BOWERS AVE
EDR Map No(s).	Reg
Approximate Location Relative to Site	2389 feet north, northwest
Database(s)	NPL, SEMS, RCRA-LQG, US ENG CONTROLS, US INST CONTROLS, ROD, PRP, FINDS, ECHO, NY MANIFEST
Description/ID No(s).	(See previous definitions)

Database Review Summary	The Applied Materials facility has manufactured equipment for the fabrication of semiconductor wafers from 1974 to the present. During the 1970s, acids, caustics and other chemicals were in use at the facility, including VOCs used as industrial solvents for cleaning and degreasing. Facility operations led to groundwater contamination. As of July 7, 2006, the Water Board oversees this and about 20 other federal Superfund sites with the expressed consent of the U.S. Environmental Protection Agency (US EPA), the federal agency responsible for implementing the Superfund law (CERCLA). After construction of the site's remedy, operation and maintenance activities and verification monitoring are ongoing since at least May 27, 2009.
Facility Name(s) and/or Address(es)	SYNERTEK, INC. (BUILDING 1) 3050 CORONADO BLVD
EDR Map No(s).	Reg
Approximate Location Relative to Site	1944 feet north
Database(s)	NPL, SEMS, RCRA-LQG, US ENG CONTROLS, US INST CONTROLS, ROD, PRP, FINDS, ECHO
Description/ID No(s).	(See previous definitions)
Database Review Summary	Synertek Inc, a subsidiary of Honeywell Inc, manufactured semiconductor products in the Synertek #1 facility from 1978 to 1988. Between 1974 and 1982, one 200-gallon solvent tank and three neutralization tanks were installed at the Site. These tanks were found to be the source of VOC soil and groundwater contamination. The tanks and contaminated soil were removed in 1985. Synertek #1 was added to the National Priorities List (NPL) in September 1989 and is currently under the oversight of the San Francisco Regional Water Quality Control Board. The site is currently under monitored natural attenuation status, and the use of engineering controls, including enhanced in-situ bioremediation (EISB), and land use covenants are in place to prevent the use of the groundwater beneath the site.

4.2.2.1.2 Upgradient Properties

The database search report identified one surrounding upgradient property within the general vicinity of the Site; information regarding this property is summarized in the following table:

Facility Name(s) and/or Address(es)	ALHAMBRA GARDEN APARTMENTS, 2729 CHROMITE DR APT A
EDR Map No(s).	51
Approximate Location Relative to Site	0.19 miles
Elevation Relative to Site	Higher

Database(s)	HWTS, DRYCLEANERS
Description/ID No(s).	DRYCLEANERS : A list of drycleaner related facilities that have EPA ID numbers. (Also see previous definitions)
Database Review Summary	The listing was administrative in nature. The listing incorrectly indicated that the Site operates as a dry cleaner; however, additional records indicate the property operates coin-operated laundry for tenants. Therefore, it is not anticipated to affect the site.

4.2.2.1.3 Cross-Gradient Properties

The database search report identified five (5) sites located hydraulically cross-gradient to the target property at which a known or suspected release has occurred. Information regarding surrounding cross-gradient properties (those within the general vicinity of the Site) included in the database search report is summarized in the following table(s):

Facility Name(s) and/or Address(es)	APPLIED MATERIALS, 2940-2950 KIFER ROAD
EDR Map No(s).	76
Approximate Location Relative to Site	0.311
Elevation Relative to Site	Lower
Database(s)	CPS-SLIC, CERS
Description/ID No(s).	CPS-SLIC: RWQCB's list of Cleanup Program Sites (CPS), formerly known as Spills, Leaks, Investigations, and Cleanups (SLIC) sites. (Also see previous definitions)
Database Review Summary	The listing indicated that minor concentrations of 1,1,1-Trichloroethane (TCA) and trichloroethene (TCE) beneath RWQCB ESLs were found in soil during closure activities of the former Applied Materials manufacturing facility. Low concentrations did not warrant additional subsurface investigations and the case was closed by the RWQCB in a letter dated December 19, 1994. Due to the issuance of a closure document from the RWQCB, this case is not anticipated to have impacted the Site.
Facility Name(s) and/or Address(es)	FAYETTE PROPERTIES, 111 URANIUM DR
EDR Map No(s).	85
Approximate Location Relative to Site	0.393
Elevation Relative to Site	Higher

	1	
Database(s)	LUST, HIST LUST, CORTESE, HIST CORTESE, CERS	
Description/ID No(s).	(See previous definitions)	
Database Review Summary	The listing identified low levels of total petroleum hydrocarbons as gasoline (TPHg) contamination in groundwater at the property resulting from a leaking underground storage tank (LUST). File review of available case documents on the Geotracker webpage revealed there was no indication of off-site migration, and the RWQCB issued a case-closure, no further action letter on April 1, 1994; therefore, it is not anticipated to affect the Site.	
Facility Name(s) and/or Address(es)	PACIFIC MAINTENENCE CO., 2294 WALSH AVE	
EDR Map No(s).	103	
Approximate Location Relative to Site	0.482	
Elevation Relative to Site	Higher	
Database(s)	HWTS, LUST, HIST LUST, CERS HAZ WASTE, CORTESE, HAZNET, HIST CORTESE, CERS	
Description/ID No(s).	(See previous definitions)	
Database Review Summary	The listing identified elevated concentrations of TPHg, and low levels of tolulene, xylenes, and ethylbenzene contamination in soil and groundwater at the property resulting from a LUST. File review of available case documents on the Geotracker webpage revealed there was no indication of off-site migration, and the RWQCB issued a case-closure, no further action letter on December 8, 1997; therefore, it is not anticipated to affect the Site.	
Facility Name(s) and/or Address(es)	BOISE CASCADE, 1290 KIFER RD	
EDR Map No(s).	133	
Approximate Location Relative to Site	0.818	
Elevation Relative to Site	Higher	
Database(s)	ENVIROSTOR, LUST, CPS-SLIC, EMI, HIST CORTESE, CERS	
Description/ID No(s).	ENVIROSTOR : CA DTSC's online listing of regulated hazardous waste sites. (Also see previous definitions)	

Facility Name(s) and/or Address(es)	SANMINA CORPORATION, 1881 MARTIN AVE
EDR Map No(s).	137
Approximate Location Relative to Site	0.851
Elevation Relative to Site	Higher
Database(s)	CA ENVIROSTOR, CA CPS-SLIC
Description/ID No(s).	(See previous definitions)
Database Review Summary	The listing identified elevated concentrations of solvents and metals in soil and groundwater at the property resulting from former circuit board manufacturing operations in the 70's and early 80's. File review of available case documents on the Geotracker webpage revealed there was no indication of off-site migration, and the RWQCB granted case closure on April 5, 2019; therefore, it is not anticipated to affect the Site.

All additional listings for properties located hydraulically cross-gradient to the target property were administrative in nature and, therefore, are not anticipated to affect the Site.

4.2.2.1.4 Down-Gradient Properties

Properties located hydraulically downgradient of the Site are not likely to affect the Target Property but are useful in determining general regional trends.

There are 30 listings for properties located hydraulically downgradient within one mile of the Target Property included in the database search report which identified solvent contamination in soil and/or groundwater resulting from historic site operations relating to tech manufacturing:

EDR Map No.	Facility Name(s)	Address(es)	Distance (miles)	Database(s)

4.3 **Previous Reports**

The following environmental and geotechnical reports regarding the Site were provided for TRC's review by Andres Montoya, Property Manager:

- January 26, 2007, PHASE I ENVIRONMENTAL SITE ASSESSMENT, 2590 WALSH AVENUE SANTA CLARA, CALIFORNIA, Prepared by Stellar Environmental Solutions
- July 17, 2020, *LIMITED PRE-PURCHASE INVESTIGATION, COMMERCIAL PROPERTY, 2590 WALSH AVENUE, SANTA CLARA, CALIFORNIA*, Prepared by Murray Engineers Inc. (Geotech Report)

Information provided in these reports is summarized throughout this report.

4.4 Other Environmental Record Sources

Per the ASTM standard, local or additional state records were reviewed to enhance and supplement the ASTM-required federal and state records reviewed and discussed earlier in this report. These additional records include state agency lists of waste disposal facilities; hazardous waste/contaminated facilities; registered storage tanks; records of emergency release reports; and records of contaminated public wells. Local sources that were contacted to obtain this information include the Santa Clara County Department of Environmental Health, Santa Clara County Fire Protection District, City of Santa Clara Hazardous Materials Compliance Division, the California Department of Toxic Substance Control (DTSC), the Regional Water Quality Control Board (RWQCB), and the California Environmental Protection Agency (CalEPA). Information from these sources is discussed below:

Regulatory Agency/Department	Available Information
Santa Clara County Department of Environmental Health (SCCDEH)	Submitted a records request via online portal on July 15, 2020 for files regarding the Site. The City of Santa Clara responded on July 27, indicating that no files from the SCCDEH were available for review.

Table 4.3 - Other	Environmental	Record Sources
-------------------	---------------	-----------------------

Regulatory Agency/Department	Available Information		
City of Santa Clara Fire Department, Hazardous Materials Devision	Submitted a records request via online portal on July 15, 2020 for files regarding the Site. The City of Santa Clara responded on July 27 providing 34 digital files in connection with the Site. TRC reviewed all files, which included 3 fire inspection violations dated September 9, 2018, May 21, 2019, and June 4, 2019; 17 CERS Hazardous Materials And Wastes Inventory Matrix Reports for Miasole Hi-Tech between 2006 and 2018; and hazardous materials business plans, permits, and inspection reports/responses for Miasole (2007-2019), Stryker Endoscopy (2002), and XES Inc. (1992). Additionally, one record from Water and Sewage (retained by the Fire Department) regarding work orders related to city staff being dispatched to the property to conduct inspections and address sewage leaks and leaking waterlines in 2007 and 2014 was reviewed. Violations included in these files are not indicative of any hazardous materials release at the property, and information included therein is integrated into other sections of this report. All records are retained by TRC and are available upon request.		
Regional Water Quality Control Board (RWQCB)	The RWQCB's GeoTracker online database was accessed on July 14, 2020 to review any files pertaining to the Site and/or adjoining and surrounding properties. No cases were listed for the Site and information on adjacent and surrounding properties is included in section 4.2.		
Department of Toxic Substances Control (DTSC)	The DTSC's EnviroStor online database was accessed on July 14, 2020 to review any files pertaining to the Site and/or adjoining and surrounding properties. No cases were listed for the Site and information on adjacent and surrounding properties is included in section 4.2.		
California Environmental Protection Agency (CalEPA)	The CalEPA's online regulated site portal was accessed on July 14, 2020 to review any files pertaining to the Site and/or adjoining and surrounding properties. Two listings were identified for the Site regarding annual reporting of generated hazardous wastes, and there was no evidence of a release at the property. Information on the target property, as well as adjacent and surrounding properties, is included in section 4.2.		

Table 4.3 - Other Environmental Record Sources

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

Mr. Glenn Young conducted a Site reconnaissance of accessible areas on and around the Site on July 30, 2020 for the purpose of identifying potential RECs. He was accompanied during the reconnaissance by Mr. Mike Ma, Vice President for Miasole.

Due to certain Covid-19 restrictions, the facility is operating with a skeleton crew with very limited manufacturing being conducted. Based on discussion with Mr. Ma, we understand that the liquid nitrogen and liquid argon tanks have been removed or are empty. The machine shop was not operating.

Photographs taken during the Site reconnaissance are provided in **Appendix D**. A Site Plan is included as **Figure 2**.

5.2 Interior and Exterior Site Observations

Unless otherwise noted, the items listed in the table below appeared in good condition with no visual evidence of staining, deterioration, or a discharge of hazardous materials; and there are no records of a release in these areas. Items where further description is warranted are discussed in the section(s) following the table.

Item	Present (Current/ Historic/ Not Observed)	Description
Hazardous material storage or handling areas	Present	(see Section 5.2.1)
Solid and liquid wastes including municipal wastes	Present	Clean Harbors waste bin for solid waste was present in eastern parking lot.
USTs and associated piping	Not Observed	NA
ASTs and associated piping	Present	AST for Liquid Argon is present in enclosure located outside the southeastern corner of the building.
Drums and containers (≥5 gallons)	Present	Several empty 55-gallon drums were present in the machine shop. Several 55-gallon drums were also present in the Liquid argon/ metallic dust enclosure.
Odors	Not Observed	N/A
Pools of liquid, including surface water bodies and sumps (handling hazardous substances or substances likely to be hazardous only)	Not Observed	N/A
PCBs/transformers	Not Observed	A pad mounted transformer is present in the eastern parking lot. The transformer was not labelled as containing PCBs.
Stains or corrosion	Not Observed	N/A
Drains and sumps	Not observed with building.	Storm drains are present in the exterior parking areas.
Pits, ponds, and lagoons	Not Observed	N/A
Stressed vegetation	Not Observed	N/A
Historic fill or other fill material	Not Observed	N/A
Wastewater (including stormwater or discharge into a drain, ditch, underground injection system, or stream on or adjacent to the Site)	Not Observed	N/A
Wells (including dry wells, irrigation wells, injection wells, abandoned wells, or other wells)	Not Observed	N/A
Septic systems or cesspools	Not Observed	N/A

Table 5.1 - Interior and Exterior Site Observations

A small x-ray laboratory with lead curtains is present next to the manufacturing area. We understand the x-ray work was used for quality control purposes and is a permitted operation.

5.2.1 Hazardous Substances

Hazardous substances including raw materials; finished products and formulations; hazardous wastes; hazardous constituents and pollutants including intermediates and byproducts; and unidentified substance containers (when open or damaged, and containing unidentified substances suspected of being hazardous or petroleum products) were limited to a small cabinet located within the manufacturing area at the Site.

5.2.2 Solid and Liquid Wastes

No solid or liquid wastes are observed during the reconnaissance. Several empty 55-gallon drums were present in the machine shop. Additionally, several 55-gallon drums were observed within the Liquid argon / Metallic dust enclosure. No staining or leaks from those drums were observed. Black dust, presumably metallic dust, was observed in minor amounts within in the machine shop. Adhesive floor mats were installed at the doorways to the shop to reduce tracking dust beyond the machine shop.

According to facility representatives, the facility is not presently generating hazardous waste.

5.2.3 USTs

No USTs were identified by the Key Site Manager or observed during the Site visit.

5.2.4 ASTs

No fuel or solvent ASTs were identified by the Key Site Manager or observed during the Site visit. A liquid argon AST is present within the exterior enclosure southeast of the building.

5.3 Adjoining and Surrounding Properties Reconnaissance

5.3.1 Adjoining Properties

During the Site reconnaissance, TRC viewed the adjoining properties from the Site and publicly accessible areas (e.g., public roadways, etc.).

Direction from Site	Current Land Use Description
North	A light industrial/office building with parking lot and landscaped areas is present at 2360 Walsh Avenue and the Vantage Data Centers campus is present across Walsh Avenue.
East	The parcel to the east of the Site, 2552 Walsh Avenue, comprises a light industrial/office building with parking lot and landscaped areas.
South	SamTrans railroad tracks are present next to the southern property line.

Table 5.2 - Adjoining Properties Reconnaissance

Direction from Site	Current Land Use Description	
West	The City of Santa Clara Uranium Substation is present immediately west of the Site.	

Table 5.2 - Adjoining Properties Reconnaissance

5.3.2 Surrounding Properties

Surrounding properties generally include residential areas to the south and light industrial and commercial entities in all other directions. TRC representatives observed those properties described in **Section 4.2** and did not identify visual evidence of RECs to the target property.

6.0 INTERVIEWS

The following persons were interviewed to obtain historically and/or environmentally pertinent information regarding RECs associated with the Site:

• Michael Stoner, Agent for Client- Key Site Manager (as defined by the ASTM standard);

The information provided by each is discussed and referenced in the text or provided below. Interview documentation is included in **Appendix B.** Other references and sources of information are included in **Appendix E**.

7.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Potential findings can include RECs, including CREC, HRECs, and *de minimis* conditions, pursuant to the ASTM E 1527-13 standard.

RECs are defined as the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property*: (1) due to any *release* to the environment; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*.

CRECs are defined as RECs resulting from past *releases* of *hazardous substances* or *petroleum products* that have been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting riskbased criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (e.g., *property* use restrictions, *AULs, institutional controls*, or *engineering controls*).

HRECs are defined as past *releases* of any *hazardous substances* or *petroleum products* that have occurred in connection with the *property* and have been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property* use restrictions, *AULs, institutional controls*, or *engineering controls*).

De minimis conditions are defined as conditions that generally do not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis conditions* are not RECs nor CRECs.

TRC has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 1527-13 at the City-owned parcel APN 073-042-023 located at Industry Road in Pittsburg, California 94565 (Site), see **Appendices F** and **G**. Deviations from this standard are described in Sections 1.3 and 7.7 of this report.

7.1 Findings

The following conditions were noted during the preparation of this report. TRC has provided the Environmental Professional's rationale for concluding that a condition is or is not currently a REC.

Finding No. 1

Historic operations on the Site as a semiconductor and related technology manufacturing facility may have involved the use and/or generation of hazardous wastes (predominantly metals and solvents). While there are no reported leaks or spills documented for the Site, an evaluation of soil vapor conditions is recommended.

Finding No. 2

Eight properties within a one mile radius of the Target Property with a shared history of agricultural orchard operations have cited historical pesticide use as the source of elevated concentrations of arsenic, lead, and organochlorine pesticides in soil, which has lead to ongoing oversight and management as well as land use restrictions. Additionally, the eastern portion of the Site was

formerly operated as an orchard. Accordingly, an evaluation of shallow soil conditions for the potential presence of arsenic, lead, and organochlorine pesticides is recommended.

7.2 RECs and CRECs

This assessment has revealed no evidence of RECs (including CRECs) in connection with the Site.

7.3 HRECs

This assessment has revealed no evidence of HRECs in connection with the Site.

7.4 *De Minimis* Conditions

The dust observed in the machine shop is considered a *de minimis* condition in connection with the Site.

7.5 Data Gaps

TRC has made an appropriate inquiry into the commonly known and reasonably ascertainable resources concerning the historic ownership and use of the Site back to the first development per 40 CFR Part 312.24 (*Reviews of Historical Sources of Information*). TRC identified no data gaps during this assessment.

7.6 Conclusions and Recommendations

Although this assessment has revealed no evidence of recognized environmental conditions (RECs) and/or controlled recognized environmental conditions (CRECs) in connection with the Site, we understand that future Site redevelopment may include renovations and/or new construction for commercial land uses. Given the Site's historic operations as both a semiconductor and related technology manufacturing facility and an agricultural orchard, the Site's proximity to various operations with similar historical and current uses, and our experience with similar operations in the area, TRC recommends completing a limited subsurface investigation to evaluate soil, and/or soil vapor conditions at the Site. In the event that construction activities will require dewatering, a groundwater investigation is also recommended. Investigation results should be compared to the Screening Levels (SLs) and Environmental Screening Levels (ESLs) established by the Department of Toxic Substances Control and the Regional Water Quality Control Board, respectively. Findings will useful for future redevelopment considerations.

7.7 Limiting Conditions and Deviations

7.7.1 Accuracy and Completeness

The ASTM E 1527-13 standard recognizes inherent limitations for Phase I ESAs that apply to this report, including:

• Uncertainty Not Eliminated – No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Data gaps identified during this Phase I ESA are listed in Section 7.4.

- Not Exhaustive A Phase I ESA is not an exhaustive investigation.
- Past Uses of the Property A review of standard historical sources at intervals less than 5 years is not required.

The Client is advised that the Phase I ESA conducted at the Site is a <u>limited inquiry</u> into a property's environmental status, cannot wholly eliminate uncertainty, and is not an exhaustive assessment to discover every potential source of environmental liability at the Site. Therefore, TRC does not make a statement i) of warranty or guarantee, express or implied for any specific use; ii) that the Site is free of RECs or environmental impairment; iii) that the Site is "clean;" or iv) that impairments, if any, are limited to those that were discovered while TRC was performing the Phase I ESA. This limiting statement is not meant to compromise the findings of this report; rather, it is meant as a statement of limitations within the ASTM standard and intended scope of this assessment. Specific limiting conditions identified during the Site reconnaissance are described in Section 5.1. Subsurface conditions may differ from the conditions implied by surface observations and can be evaluated more thoroughly through intrusive techniques that are beyond the scope of this assessment. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other construction purposes.

This report presents TRC's Site reconnaissance observations, findings, and conclusions as they existed at the time of the Site reconnaissance. TRC makes no representation or warranty that the past or current operations at the property are or have been in compliance with applicable federal, state, and local laws, regulations, and codes. TRC makes no guarantees as to the accuracy or completeness of information obtained from others during the course of this Phase I ESA report. It is possible that information exists beyond the scope of this assessment, or that information was not provided to TRC. Additional information subsequently provided, discovered, or produced may alter findings or conclusions made in this Phase I ESA report. TRC is under no obligation to update this report to reflect such subsequent information. The findings presented in this report are based upon reasonably ascertainable information and observed Site conditions at the time of the assessment.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not assessed. Regardless of the findings stated in this report, TRC is not responsible for consequences or conditions arising from facts that were not fully disclosed to TRC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information regarding surrounding area properties was requested for approximate minimum search distances and was assumed to be correct and complete unless obviously contradicted by TRC's observations or other credible referenced sources reviewed during the assessment.

TRC is not a professional title insurance or land surveyor firm and makes no guarantee, explicit or implied, that any land title records acquired or reviewed, or any physical descriptions or depictions of the property in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

7.7.2 Warranties and Representations

This report does not warrant against: (1) operations or conditions which were not evident from visual observations or historical information provided; (2) conditions which could only be determined by physical sampling or other intrusive investigation techniques; (3) locations other than the client-provided addresses and/or legal parcel description; or (4) information regarding off-Site location(s) (with possible impact to the Site) not published in publicly available records.

7.7.3 Continued Validity/User Reliance

This report is presumed to be valid, in accordance with, and subject to, the limitations specified in the ASTM E 1527-13 standard, for a period of 180 days from completion, or until the Client obtains specific information that may materially alter a finding, opinion, or conclusion in this report, or until the Client is notified by TRC that it has obtained specific information that may materially alter a finding, opinion, or conclusion in this report. Additionally, pursuant to the ASTM E 1527-13 standard, this report is presumed valid if completed less than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction.

7.7.4 Significant Assumptions

During this Phase I ESA, TRC relied on database information; interviews with Site representatives, regulatory officials, and other individuals having knowledge of Site operations; and information provided by the User as requested in our authorized Scope of Work. TRC has assumed that the information provided is true and accurate. Reliance on electronic database search reports is subject to the limitations set forth in those reports. TRC did not independently verify the information provided. TRC found no reason to question the validity of the information received unless explicitly noted elsewhere in this report. If other information is discovered and/or if previous reports exist that were not provided to TRC, our conclusions may not be valid.

8.0 **REFERENCES**

Description/Title of Document(s) Received or Agency Contacted	Date Information Request Filled/Date of Agency Contact	Information Updated	Reference Source
Regulatory database search and historical sources discussed herein	July 13, 2020	N/A	EDR Inquiry Number: 6118785.2s
Interview with Michael Stoner	August 5, 2020	N/A	User questionnaire in Appendix B
Santa Clara County Department of Environmental Health (SCCDEH)	July 27, 2020	July 27, 2020	Submitted a records request via online portal on July 15, 2020 for files regarding the Site. The City of Santa Clara responded on July 27, indicating that no files from the SCCDEH were available for review.
City of Santa Clara Fire Department, Hazardous Materials Division	July 27, 2020	July 27, 2020	Submitted a records request via online portal on July 15, 2020 for files regarding the Site. The City of Santa Clara responded on July 27 providing 34 digital files in connection with the Site. TRC reviewed all files, which included 3 fire inspection violations dated September 9, 2018, May 21, 2019, and June 4, 2019; 17 CERS Hazardous Materials And Wastes Inventory Matrix Reports for Miasole Hi-Tech between 2006 and 2018; and hazardous materials business plans, permits, and inspection reports/responses for Miasole (2007-2019), Stryker Endoscopy (2002), and XES Inc. (1992). Additionally, one record from Water and Sewage (retained by the Fire Department) regarding work orders related to city staff being dispatched to the property to conduct inspections and address sewage leaks and leaking waterlines in 2007 and 2014 was reviewed. Violations included in these files are not indicative of any hazardous materials release at the property, and information included therein is integrated into other sections of this report. All records are retained by TRC and are available upon request.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 04/27/2020 has revealed that there are 3 NPL sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
INTEL MAGNETICS Cerclis ID:: 901661 EPA Id: CAD092212497	3000 OAKMEAD VILLAGE	NW 1/4 - 1/2 (0.401 mi.)	0	120
APPLIED MATERIALS Cerclis ID:: 901344 EPA Id: CAD042728840	3050 BOWERS AVE	NNW 1/4 - 1/2 (0.452 mi.)	0	138
SYNERTEK, INC. (BUIL Cerclis ID:: 902620 EPA Id: CAD990832735	3050 CORONADO BLVD	N 1/4 - 1/2 (0.368 mi.)	0	161

Federal Delisted NPL site list

Delisted NPL: The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may deleted from the NPL where no further response is appropriate.

A review of the Delisted NPL list, as provided by EDR, and dated 04/27/2020 has revealed that there is 1 Delisted NPL site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/27/2020 has revealed that there are 4 SEMS sites within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2020 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/23/2020 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 14 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/27/2020 has revealed that there are 50 CA ENVIROSTOR sites within approximately 1 mile of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CA HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the CA HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there are 4 CA HIST Cal-Sites sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/23/2020 has revealed that there are 11 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

		st/Information System: TSCA SUBMITTER AIR EMISSIONS CLASSIFICATION UNKNOWN US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site. RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCR/ program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. Hazardous Waste Summary:		
. Waste code:	121	
. Waste name:	Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium,	
	beryllium, cadmium, chromium, cobalt, copper, lead, mercury,	
	molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)	
. Waste code:	122	
. Waste name:	Alkaline solution without metals (pH > 12.5)	
. Waste code:	132	
. Waste name:	Aqueous solution w/metals (< restricted levels and see waste code 121	
	for a list of metals)	
. Waste code:	135	
. Waste name:	Unspecified aqueous solution	
Waste code:	141	
. Waste name:	Off-specification, aged, or surplus inorganics	
. Waste code:	172	
. Waste name:	Metal dust (see 121) and machining waste	
. Waste code:	181	
. Waste name:	Other inorganic solid waste	
. Waste code:	211	
. Waste name:	Halogenated solvents (chloroform, methyl chloride, perchloroethylene,	
	etc.)	
. Waste code:	212	
. Waste name:	Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)	
. Waste code:	213	
. Waste name:	Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)	
Wasto codo:	221	
. Waste code:	221 Waste oil and mixed oil

For Commercial Reuse: 0 0 For Industrial Reuse: 0 For Residential Reuse: Unknown Type: 0 Alternate Address: 3000 OAKMEAD VILLAGE DRIVE Alternate City, St, Zip: SANTA CLARA, CA 95051 Background Info: Intel Corporation operates a microprocessor testing facility at this one-acre site. The site is located adjacent to other industrial and commercial development. Chemicals used in the manufacturing process and wastes generated from this process were handled and stored onsite in drums and in an underground storage tank. Soil and shallow groundwater at the site are contaminated with trichloroethane (TCA), trichloroethylene (TCE), Freon-113, dichloroethane (DCA), and dichloroethylene (DCE). Approximately 300,000 people residing within a three-mile radius of this site depend on local groundwater for their drinking water. This groundwater is derived from a deep aquifer. While there are no reported impacts on public or private wells, four City of Sunnyvale municipal wells and twenty of the twenty-seven City of Santa Clara municipal wells are located within a three-mile radius of the site. The closest municipal well to the site is City of Santa Clara Well #21. This well is located approximately 2800 feet from the nearest contaminated monitoring well. Comments Date: 01101990 Comments: Site has been referred to the RWQCB. Comments Date: 03311993 The site is being overseen by the SFRWQCB pursuant to Order Comments: Comments Date: 03311993 Comments: No. 91-119. The report which was the basis for this Comments Date: 03311993 Comments: screening was produced pursuant to this order. Comments Date: 03311993 The groundwater is contaminated with organic solvents. Comments: Comments Date: 03311993 Comments: The following chemicals are listed followed by the highest Comments Date: 03311993 resultfor the last round of analysis.(March or June '92): Comments: Comments Date: 03311993 Comments: Dichlorethane(1.8 ppm), Dichloroethylene(13 ppm), Comments Date: 03311993 Perchloroethylene(<2 ppm), Trichloroethane(17ppm), Comments: Comments Date: 03311993 Comments: Trichloroethylene(140 ppm), and Freon 113(90ppm). VOC Comments Date: 03311993 Comments: concentrations have decreased approximately 40 to 70 Comments Date: 03311993 Comments: percent since groundwater extraction began in Jan. 1991. CAD042728840 Conditions at proposal October 15, 1984): Applied Materials produces equipment for manufacturing wafers for the electronics industry at a plant in Santa Clara, Santa Clara County, California. The facility occupies about 2.5 acres and is surr

CAD042728840 ed no information that prevents placing the site on the NPL. Therefore, it is being placed on the NPL.

CAD042728840 ounded by business and industrial areas. Monitoring wells on the site are contaminated with Freon 113, tetrachloroethylene, 1,1,1-trichloroethane, 1,1-dichloroethylene, and trichloroethylene, according to analyses conducted by a consultan

CAD042728840 t to Applied Materials. Contamination is believed to have resulted from leaking tanks. About 300,000 people depend on wells within 3 miles of the site as a source of drinking water. Applied

Annual Waste Handled:		

Annual Waste Hanuleu.	
Waste code: Waste name:	D001 IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs):	2877
Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs):	126470
Waste code:	D003
Waste name:	A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs):	657
Waste code:	D004

Environmental Interest/Information System:

	California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site. SUPERFUND NPL California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities. HAZARDOUS AIR POLLUTANT MAJOR RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. STATE MASTER

Environmental Interest/Information System:

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. SUPERFUND NPL RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. HAZARDOUS WASTE BIENNIAL REPORTER STATE MASTER

Environmental Interest/Information System:

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

<u>Click this hyperlink</u> while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

<u>Click this hyperlink</u> while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Not reported Not reported Not reported 000/000 Not reported 2880 NORTHWESTERN PARKWAY 2880 NORTHWESTERN PKWY Approximately 300,000 people residing within a three-mile radius of this site depend on local groundwater for their drinking water. This groundwater is derived from a deep While there are no reported impacts on public or private wells, four City of Sunnyvale municipal wells and twenty-

three of the twenty-seven City of Santa Clara municipal wells are located within a three-mile radius of the site. The twenty-seven City of Santa Clara municipal wells supply about eight percent of the City's water. The closest municipal well to the site is City of Santa Clara Well #21, which is 4,000 feet from the nearest contaminated monitoring well at the site.

Intel Corporation operates a microprocessor testing facility at this four-acre site. The site is located adjacent to other industrial and commercial development. Chemicals used in the manufacturing process and wastes generated from this process were handled and stored onsite in above-ground drums and an underground storage tank.

Comments:	DTSC performed a site screening to determine whether any releases of
	hazardous substances or wastes have occurred at the site that require
	corrective actions. Intel Corporation used the Site to perform
	guality control of chemicals and electrical testing of
	semiconductors. The Site was listed on the National Priorities List
	in 1986 and the U.S. Environmental Protection Agency (EPA) issued a
	Record of Decision (ROD), which selected a remedy for the site with
	groundwater extraction and treatment as a primary component. The
	groundwater extraction and treatment system was operated nine years
	up through 1994. A trial monitored natural attenuation (MNA) program
	was initiated after groundwater extraction and treatment ceased. The
	Regional Water Quality Control Board provided oversight of the
	cleanup activities until EPA assumed oversight in 2006. EPA changed
	the remedy to MNA in a September 2010 ROD Amendment and continues to
	oversee the cleanup of the Site. DTSC recommended that the Site
	status be identified as Refer to EPA.

	review and approval of a RAP and will seek to recover all costs from the
Site Description:	responsible party. Intel Corporation operates a microprocessor testing facility at this four acre
	site. The site is located adjacent to other industrial and commercial
	development. Chemicals used in the manufacturing process and wastes generated from this process workbandled and stored onsite in above ground drums and an
	from this process werehandled and stored onsite in above-ground drums and an underground storage tank.
Hazardous Waste Desc:	Soil and shallow ground water at the site are contaminated with trichloroethane
	(TCA), trichloroethylene (TCE), Freon-113, dichloroethane (DCA) and dichloroethylene (DCE). The source of contamination has not been identified.
Threat To Public Health & Env:	Approximately 300,000 people residing within a three-mile radius of this site
	depend on local ground water for drinking water. This ground water is derived
	from a deep aquifer. It is not known if this deep aquifer is hydraulically connected to the contaminated shallow zone at the site. While there are no
	reported impacts on public or private wells, four City of Sunnyvale municipal
	wells and 23 of the 27 City of Santa Clara municipal wells are located within a
	3-mile radius of the site. The 27 City of Santa Clara municipal wells supply about 8 percent of the City's water. The closest municipal well to the site is
	City of Santa Clara well No. 21, which is 4,000 feet from the nearest
	contaminated monitoring well at the site.
Site Activity Status:	Use of the acid neutralization system for waste solvents has been discontinued.
	Ground water monitoring wells and extraction wells have been installed. Contaminated ground water is currently being pumped at a rate of 23,000 gallons
	per day and is subjected to carbon adsorption treatment prior to discharge into
	the San Tomas Aquino Creek and the South San Francisco Bay. The RWQCB has
	requested additional investigations to identify contamination sources.

	Environmental Intere	est/Information System: US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site. RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

TOPPAN PHOTOMASKS, INC. (Continued) 1000348715 **Biennial Reports:** Last Biennial Reporting Year: 2017 Annual Waste Handled: Waste code: D001 IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF Waste name: LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE. Amount (Lbs): 499 D002 Waste code: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS Waste name: CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE. Amount (Lbs): 16380.4 D003 Waste code: Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE. REACTS VIOLENTLY WITH WATER. GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER. Amount (Lbs): 905 Waste code: D007 CHROMIUM Waste name: Amount (Lbs): 23260 Waste code: D009 Waste name: MERCURY Amount (Lbs): 10 Waste code: D011 Waste name: SILVER Amount (Lbs): 5 Waste code: D018 Waste name: BENZENE Amount (Lbs): 45 Waste code: D035 Waste name: METHYL ETHYL KETONE Amount (Lbs): 185 Waste code: F003 Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT

drinking water.

Soil borings in the vicinity of underground storage tanks indicated leakage from the tanks. In 1985, Honeywell (the owner of Synertek) removed underground collection, receiving and processing tanks. The tanks and contaminated soils were disposed of offsite. The RWQCB issued site cleanup requirements on July 15, 1987 for this site. In June, 1987 Honeywell began operating an onsite ground water extraction and treatment system.

Potential COC: Arsenic Lead Confirmed COC: Arsenic Lead Potential Description: SOIL Alias Name: 21648026 Alias Type: APN Alias Name: CAD982402570 Alias Type: **EPA Identification Number** Alias Name: 110000784937 Alias Type: EPA (FRS #) Alias Name: SL720621213 GeoTracker Global ID Alias Type: 71003022 Alias Name: Alias Type: Envirostor ID Number Completed Info: Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported Completed Document Type: Phase 1 Addendum Completed Date: 04/17/2014 Comments: DTSC performed a site screening to determine whether any releases of hazardous substances or wastes have occurred at the site that require corrective actions. The U.S. Environmental Protection Agency (EPA) placed the Site on the National Priorities in May 1986. Groundwater at the Site is contaminated with volatile organic compounds, which is believed to have resulted from surface spills and a leak from an underground storage tank. EPA selected a remedy for the Site with groundwater pump and treat as the primary component in a 1991 Record of Decision. A groundwater extraction treatment system was operated until 1996 and monitored natural attenuation (MNA) has been the de facto remedy at the Site since system operation ceased. The Regional Water Quality Control Board was lead agency overseeing cleanup at the Site until July 2006, when EPA took over as the lead agency. EPA has not yet formally documented the change in the remedy to MNA in an Explanation of Significant Differences or ROD amendment. DTSC concluded that the site status should be "Refer to EPA". Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported Completed Document Type: Phase 1 Addendum Completed Date: 06/08/2016 DTSC updated the site screening completed in 2014 based on new Comments: information included in a Facility Closure Report and provided by California Environmental Management Service Company, Inc., the consultant for Micro-Chem. Micro-Chem ceased operations in October 2015 and surface wipe samples and soil samples were collected in March and April 2016 as part of facility closure activities that were overseen by the City of Santa Clara Fire Department. One section of drywall was removed and disposed as hazardous waste due to copper (8,000 micrograms per wipe). The concentrations of lead, arsenic, and cyanide detected in soil samples were below the applicable DTSC screening levels or U.S. EPA Regional Screening Levels for residential (i.e. unrestricted) land use. The Santa Clara Fire Department signed off on both the final hazardous materials closure of the Micro-Chem facility and the final closure of the wastewater treatment unit that had been operated under permit-by-rule. The Site is located on a property that is part of the Intel Magnetics/Micro Storage Corporation (IM/MSC) Superfund Site, but Micro-Chem has not been identified by the U.S. Environmental Protection Agency as a

MICRO STORAGE/INTEL MAG (Continued)

responsible party for the IM/MSC Superfund Site. The updated site screening recommended a "No Further Action" status for the site/facility.

This has not been verified by DTSC. PROJECT WIDE Completed Area Name: Completed Sub Area Name: Not reported Completed Document Type: Phase 1 Addendum Completed Date: 05/07/2014 Comments: In 1974, Synertek leased the Site for semiconductor manufacturing. The Site is currently occupied by Crystal Solar. Groundwater contamination was discovered at the Site in 1982. The identified sources of the groundwater contamination were solvent and neutralization tanks. The U.S. Environmental Protection Agency (U.S. EPA) listed the Site on the National Priorities List in 1989; however, the Regional Water Quality Control Board (RWQCB) has been overseeing the cleanup of the Site. Honeywell, who acquired Synertek in 1979, operated a groundwater extraction and treatment from 1987 to 2001, when a trial period of monitoring natural attenuation was begun. U.S. EPA's 2012 Fourth Five-Year Review stated that 1,1-TCA and Freon-113 were below cleanup standards in all wells. The Report concluded that TCE is the main contaminant of concern. The Five-Year Review recommended that alternative remedies be evaluated for the Site. The 2013 CH2M Hill Focused Feasibility Study recommended

3050 CORONADO, SYNERTEK B-1 (Continued)

enhanced in-situ bioremediation followed by monitored natural attenuation. The Site s history indicates that it is actively being managed by U.S. EPA and RWQCB. In the site screening, DTSC made a "Refer to RWQCB" status recommendation.

Potential Contaminants of Concern:	Not reported
Site History:	No Water Board oversight of cleanup at this site. This case is
·	included in Geotracker because the site is covered by the Water
	Boards NPDES general permits for discharges from pump and treat
	systems to surface waters (one each for fuels- and VOC-impacted
	sites). This can happen for two reasons: (i) the site is overseen by
	another agency (e.g., USEPA or DTSC) and needs coverage under one of
	the NPDES general permits or (ii) construction dewatering in an area
	of groundwater contamination necessitates NPDES general permit
	coverage. Including this case in Geotracker helps staff to receive
	and review required NPDES reports. Discharger received a Notice of

Termination on March 12, 2009.

Case Type:	Cleanup Program Site
Case Worker:	MD
Local Agency:	Not reported
RB Case Number:	43S0124
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	* Volatile Organic Compounds (VOC)
Site History:	The pollutants released to groundwater at the site are the volatile
	organic compounds (VOCs), trichloroethene, dichloroethene,
	trichloroethene and several other VOCs. The VOC concentrations in
	groundwater have been significantly reduced through groundwater
	extraction and treatment. The site is currently under monitored
	natural attenuation status. A pilot test of enhanced in-situ
	bioremediation (EISB) has been carried out. The results of the pilot
	test show that EISB is effective in breaking down VOCs. A proposal
	for expanding the EISB treatment to further reduce VOC concentrations
	in groundwater has been submitted.

The Regional Water Quality Control Board (RWQCB) issued cleanup requirements in 1987 and rescinded the cleanup order in 2001. The 2001 order noted that vinyl chloride was present in groundwater at concentrations up to 3 parts per billion (ppb), exceeding the cleanup level of 0.5 ppb; however, shallow groundwater at the site was not extracted for drinking water or any other use. A drive-by inspection of the site by DTSC in October 2013 revealed that the one building on the site was currently occupied and paved around the perimeter. There were no observations indicating that there had been a release of hazardous waste. DTSC concluded that the site status should be "Refer to RWQCB". Completed Document Ty	pe: Site Screening	
Completed Date:	10/27/1992	
Comments:	The present level of contamination at the site poses a significant	
	threat to public and environmental health. Therefore, PEA of high	
	priority is recommended. The site consists of two manufacturing	
	facilities operated by Kawasaki Wafer Technology (KAWATEC). Both	
	onsite soil and groundwater were contaminated. Soil was contaminated	
	by heavy soils and perchloroethylene (PCE) beneath the drum storage	
	area at the site. The solvents found were primarily perchloroethylene	
	(PCE) (440 ppb) and trichloroethylene TCE-(430 ppb), and some of their breakdown products. One of the solvents, PCE (100 ppb), has	
	migrated to the upper most aquifer in both identified source areas.	
	The current levels of contaminants at both soil and groundwater	
	exceeded the state action levels and pose a significant threat to	
	public and environmental health. Based on available information,	
	there is an observed release at the site. Therefore, PEA	
	investigation and risk assessment are required to determine the	
	current status of the site and evaluate the existing risk.

	Site Description:	 Applied Materials operates a semiconductor equipment manufacturing facility at this site. The site encompasses 9 acres and is surrounded by industrial and commercial development. Soil and ground water contamination were reported in 1984. The source of contamination were two acid neutralization tanks and one waste solvent tank. The following contaminants have been detected in soil and ground water: trichloroethane (TCA), trichloroethylene (TCE), dichloroethylene (DCE), dichloroethane (DCA). About 300,000 people living within 3 miles of the site depend on ground water as a source of drinking water. Contaminated ground water at the site represents a potential threat to the water supply system. City of Sunnyvale's municipal well, No. 21, is located 0.7 miles upgradient of the site. In 1985, the underground tanks were removed and approximately 60 cubic yards of contaminated soil surrounding the tanks were removed. A ground water extraction system has been installed. The extracted water is treated and discharged to a storm sewerleading to a tributary to San Thomas Aquino Creek.

Applied Materials, Inc. began operations in the building on the Site (Building 1) in 1970 as a semi-conductor wafer manufacturing facility. Applied Materials discovered volatile organic compounds downgradient from three underground storage tanks in November 1983 and implemented a full-scale groundwater monitoring, extraction, and treatment program in 1985. The United States Environmental Protection Agency (EPA) included the Site on the National Priorities List in 1987. EPA signed Records of Decision in 1990 and 1993. Groundwater extraction and treatment and institutional controls were selected as the remedy for groundwater. Groundwater extraction and treatment was implemented from 1985 through 2002. The Regional Water Quality Control Board was the lead regulatory agency overseeing investigation and cleanup until transferring the Site back to EPA in 2006. Limited groundwater extraction and treatment was implemented from April 2014 through March 2015.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order
	should cause a relatively minor impairment of beneficial uses compared
	to a major or minor threat. Not: All nurds without a TTWQ will be
	considered a minor threat to water quality unless coded at a higher
	Level. A Zero (0) may be used to code those NURDS that are found to
	represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as
	cooling water dischargers or thosewho must comply through best
	management practices, facilities with passive waste treatment and
	disposal systems, such as septic systems with subsurface disposal, or
	dischargers having waste storage systems with land disposal such as
	dairy waste ponds.

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site. California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal

facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. HAZARDOUS WASTE BIENNIAL REPORTER

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Paved parking areas on the southern and southeastern portion comprise approx. 6.75 acres. The remaining 23.45 acres are grass-covered, with well-maintained landscaped grass areas along the south side. Developed for agricultural use including orchards since as far back as 1937 until about 1977-78 when the Site was developed with a large commercial/industrial structure and occupied by Sperry Corp. (Sperry) from 1978-1983. Magnetic Peripherals, Inc. (MPI) took over operations from Sperry in 1983. The Site was used for the assembly of computer disk drives until 1986 and has been vacant of tenants since that time. The Site changed ownership several times due to business acquisitions, until approximately 1994 when Applied Materials, Inc. (Applied) purchased the Site. At that time it was occupied by a large manufacturing/commercial building occupying 410,000 square feet of land and surrounded by parking lots and landscaping. In 1983, VOCs

including trichloroethene (TCE) and Freon-113 were detected in groundwater in the vicinity of the former chemical storage; 1,1,1-trichloroethane (TCA), TCE, Freon-113, chloroform and methyl-ethyl ketone (MEK) were also detected in groundwater in the vicinity of the former Mendocino Tank Farm. Integrity testing of the underground piping indicated fluid loss in the pipe draining the former chemical storage building. In 1985 and 1986, the USTs and piping were removed. No sources of contamination were identified during removal of the USTs. Historically, three VOC groundwater plumes were associated with the Site. A narrow TCE plume (up to 40 g/L) extending from the vicinity of the chemical storage area to the northwest cornier of the main building. A wider cis-1,2-dichloroehtene (DCE) plume (100 to 300 g/L) on the north side of the main building extending up-gradient beneath the former building and downgradient to the northern property boundary. A Freon-113 plume (less than 1,200 g/L) extending from the former chemical storage building to the northern property boundary and beyond. Approximately 34 groundwater monitoring wells were installed between 1983 and 2003; a groundwater extraction and treatment system operated from August 1986 to May 1994, removing approximately 86 million gallons of groundwater and approximately 157 pounds of VOCs. The groundwater extraction system was discontinued with regulatory approval in 1994 because the remediation system was no longer cost effective. In 1993, the RWQCB issued Order No. 93-163 (1993 Order) for the Site. The soil and groundwater samples showed no detectable concentrations of VOCs except methylene chloride in two soil samples at concentrations up to 0.0064 milligrams per kilogram (mg/kg); methylene chloride is a typical laboratory contaminant. In addition, Freon was detected in groundwater at concentrations up to 75 '%g/L, which is below State of California action levels. In 1995, Applied demolished the improvements at the Site, and eleven additional wells were sealed and destroyed with concurrence of the RWQCB. As required by Task 5 of the 1993 Order, Applied investigated potential sources of soil and groundwater contamination beneath and adjacent to the former on-site building. Prior investigations have indicated no evidence of residual VOCs above regulatory screening levels in the soils underlying the Site. Thirty-two soil samples were collected from a total of 38 test pit excavations near the former Mendocino Tank Farm and chemical storage spill containment tank both beneath and adjacent to the former building (Table 1, Figure 2). In addition, a total of 23 grabgroundwater samples were collected to further delineate the extent of the cis-1,2-DCE groundwater plume. Unisys concluded that residual concentrations of VOCs (i.e. TCE and 1,2-DCE) do not exist in soils underlying the Site in concentrations greater than the laboratory method detection limit of 0.005 mg/kg and do not suggest that sources of VOCs remain in soil. Details are presented in Unisys Post-Demolition Investigation Report, dated July 20, 1995. In 2005, the RWQCB issued Order No. R2-2005-0027, Rescission of Site Cleanup Requirements Order No. 93-163 (2005 Order). The 2005 Order stated that the groundwater extraction system reduced groundwater pollution to asymptotic levels. Subsequent monitoring showed no evidence of a rebound in VOC concentrations in groundwater. Risk management measures are noted as sufficient to protect human health and the environment in the future. A deed restriction had been recorded with the County of Santa Clara on May 9, 1994. This risk-management measure is noted as needing to be in place % for an indefinite period of time to assure protection of human health and

MPI-3333 SCOTT BLVD (Continued)

1000726086

the environment%. The document indicates that natural processes will reduce concentrations of chemicals in groundwater to drinking water standards before groundwater may be needed for water supply purposes.

C	completed Info: Completed Area Name: Completed Sub Area N Completed Document T Completed Date: Comments:	ame:	PROJECT WIDE Not reported Phase 1 Addendum 11/27/2013 DTSC performed a site screening to determine whether any releases have occurred at the site that require corrective actions. Based on information gathered during the site screening, it was found that Varian Associates performed investigation and cleanup with oversight by the Regional Water Quality Control Board (RWQCB), including remediating groundwater contaminated with 1,1,1-trichloroethane. Therefore DTSC recommended no further action is required and that the site status be identified as refer to RWQCB.

Completed Date:	03/12/2014
Comments:	The proponent submitted an application in August 2013 that included
	both the properties comprising the Santa Clara Retail Square site and
	the Santa Clara Technology Campus 1 site (SCTC 1) as one site. Later
	proponent decided to split the project into two sites. Therefore, the
	Memorandum of Agreement decision for SCTC 1 also applied to this site.

Completed Area Name: Completed Sub Area Name: Completed Document Type: Completed Date: Comments:	PROJECT WIDE Not reported Removal Action Completion Report 09/15/2016 The selected response action identified in the Response Plan is relocation and consolidation of impacted shallow soil on-site beneath a cap (paved parking lots, buildings, or 2 feet of clean soil in landscaped areas) and recordation of a land use covenant. When the Response Plan was implemented, the consolidation was limited to paved parking lots, and excess soil that could not be placed below the parking lots was disposed at off-site permitted landfills. Impacted soil, inaccessible in a limited area surrounding a protected redwood tree, was left in-place.

ZEP MANUFACTURING COMPANY	(Continued)	S1002
Completed Sub Area Name: Completed Document Type: Completed Date: Comments:	PROJECT WIDE Not reported Site Screening 07/01/1991 Site Screening Done: LSI planned by EPA based on completed EPA SSI. Since 1965, Zep has manufactured hand soaps, degreasers, floor cleaners, detergents, and disinfectants at this three- acre facility comprised of two buildings. A 2000-gallon below-grade concrete sump that was used to collect waste- water until 1984 apparently leaked and contaminated sub- surface soil and the uppermost aquifer underlying the site with hazardous organic compounds including behenol, mineral spirits, methylene chloride, trichloroethane, tetrachloro- ethylene, chlorobenzene, dichloroethylene, and dichloro- ethane. Soil borings and subsequent groundwater investigations have identified the abandoned sump as the origin of contamination. Presence of TCA in a downgradient municipal drinking water well has confirmed the inter- connection between the uppermost and the lower aquifers and spread of the contaminant plume. Currently, evaluation of clean alternatives is in progress with oversight by the RWQCB. Documented release of hazardous chemicals in drinking water has been observed. The target population for groundwater use is significant, so is the potential of release of waste volume in the environment. RWQCB is current lead.

Completed Date: 12/17/2014	
Comments: The selected response action identified in the Response Plan in	ncluded
relocation and consolidation of impacted shallow soil on-site, beneath the parking structure, buildings, parking lot, and lands	caned
areas and recordation of a land use covenant. The consolidation	
limited to the parking structure footprint, and excess soil that	
could not be placed below the parking structure was disposed a	at
off-site permitted landfill facilities. Impacted soil, inaccessible in limited areas surrounding protected redwood trees, was left	
in-place.

FILTRONIC SOLID STATE (FSS), SOLID STATE DIVISION (Continued) U001601929 Alias Name: CAT000625392 Alias Type: **EPA Identification Number** 110018987952 Alias Name: Alias Type: EPA (FRS #) Alias Name: 80001810 Alias Type: Envirostor ID Number Completed Info: PROJECT WIDE Completed Area Name: Completed Sub Area Name: Not reported Completed Document Type: Correspondence Completed Date: 12/22/1987 Comments: The Department of Health Services, Toxic Substances Control Division provided comments on the letter from Varian Solid State Microwave Division, dated November 9, 1987, in which Varian responded to a Report of Violations issued to the Varian facility located at 3251 Olcott Street. Copies of the Report of Violations and Varian's November 9, 1987 response letter are not available in DTSC's file. Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported Correspondence Completed Document Type: Completed Date: 09/07/1993 Comments: Varian submitted to DTSC on September 7, 1993 a letter with documentation intended to demonstrate that they used less than 1,000 pounds of acids on a monthly basis during their occupancy of the site. Varian submitted this documentation to support their argument that they should not have to pay fees for the facility based on the quantity of acids used and the quantity of discharge from their acid neutralization system. Included with the letter are four attachments with the amounts of acids stored, their waste water reports, off-site shipments of corrosive wastes, and their rinse water pH calculations. Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported Correspondence Completed Document Type: Completed Date: 03/18/1991 Varian submitted to the U.S. Environmental Protection Agency a Comments: request to transfer their EPA ID No. CAT000625392 for the facility located at 3251 Olcott St to Litton, Solid State Division following the sale of the facility on February 25, 1991. Varian requested that their name be removed from the registration for the facility, and stated that they no longer assumed any responsibility for operations at the site. Varian indicated that Litton would submit a request for transfer as well. A copy of the request from Litton is not available in DTSC's file. There is not a copy of a response from U.S. EPA in DTSC's file. PROJECT WIDE Completed Area Name: Completed Sub Area Name: Not reported Completed Document Type: Correspondence Completed Date: 05/11/1984 Comments: The Department of Health Services, Toxic Substances Control Division (DHS) sent a letter responding to the request from a variance from Varian Associates, Inc. Solid State Microwave Division (Varian) for a variance from the Hazardous Waste Permit requirements and to revoke their Interim Status Document (ISD). Varian made the request because they no longer stored wastes for more than 90 days at the facility.

EDR ID Number Database(s) EPA ID Number

FILTRONIC SOLID STATE (FSS), SOLID STATE DIVISION (Continued)

U001601929

DHS denied the variance request, stating that there was concern over possible leakage of the contents of the sumps used for wastewater neutralization. DHS did indicate that they would modify Varian's ISD to reflect that they were not storing hazardous waste for more than 90 days. A copy of the Varian's request for a variance and to revoke the the ISD, reportedly made on May 6, 1983, could not be found in DTSC's file.

Contact telephone: 408-983-3334 Contact email: Not reported EPA Region: 09 Land type: Facility is not located on Indian land. Additional information is not known. Classification: Small Small Quantity Generator Description: Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Handler Activities Summary:

	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Environmental Interest/Info	rmation System: PA TRIS (Toxics Release Invento
USE	

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site. RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. HAZARDOUS WASTE BIENNIAL REPORTER

SANMINA PLANT 3 (Continued)

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Site Screening. In 1980, Granger Associates, a tele- communications equipment manufacturer, became the first tenant of this fully fenced facility comprised of 3 buildings, with a total area of 78,870 sq. ft. Between 1980 and 1985, Varian relocated. Granger continued its operation until 1990 when Digital Switch Communication Corp. (DSC) bought them out. While information about Granger is process. Both have historically stored their waste at site for periodic transportation and disposal by specialty contractors. However, several accidental spillages have been recorded. Such spillages and probable leakage from a subsurface containment sump account for the detection of TCA, TCE, & PCE, along with various metals in soils groundwater at site. The site is underlain by two	to
aquifers of which the lower is used for drinking water.Future Area Name:Not reportedFuture Sub Area Name:Not reportedFuture Document Type:Not reportedFuture Due Date:Not reportedSchedule Area Name:Not reportedSchedule Sub Area Name:Not reportedSchedule Document Type:Not reportedSchedule Document Type:Not reportedSchedule Document Type:Not reportedSchedule Document Type:Not reportedSchedule Due Date:Not reportedSchedule Revised Date:Not reported

SANMINA CORPORATION (Continued)

Local Agency: RB Case Number: File Location: Potential Media Affected: Potential Contaminants of Concern: Site History:	On April 5, 2019, Celina Hernandez (Water Board staff) reviewed the data and concurred with the September 18, 1996, rescission of site cleanup requirements (Order 96-124) for 1871-1881 Martin Avenue in San Jose. Since issuance of the 1996 rescission, the property was redeveloped with a new commercial building with multiple office spaces. Ms. Hernandez received confirmation from the Santa Clara Valley Water District that the four groundwater monitoring were destroyed in 1996 and 1997. The case status was changed from
	open-site assessment to case closed." All records are under case file SL20220838.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Semiconductor, and STC Computer Research. An underground storage tank was used to store various waste solvents between 1981 and 1985. The UST was removed in July 1985. In September 1986, three groundwater monitoring wells were installed and sampled semi-annually between 1986 and 1990. Various volatile organic compounds (VOCs) were detected in groundwater. Another groundwater monitoring well was installed in 1990. The wells were resampled in 2009 and the VOCs were at or below the ESLs. The Regional Water Quality Control Board, San Francisco Bay Region, issued a no further action letter with a Case Closure Summary to the Sobrato Organization in October 2009.

ZORAN / SYNERGY 3450 CENTRAL EXPWY SANTA CLARA, CA 95051 STATE **Completed - Case Closed** 10/05/2009 T0608591689 SAN FRANCISCO BAY RWQCB (REGION 2) Not reported 37.3772338761159 -121.992015838623 Cleanup Program Site UUU Not reported 43S0786 **Regional Board** Indoor Air, Other Groundwater (uses other than drinking water) Three firms previously operated on the site, all in the semiconductor industry: Zoran Corporation (manufactured integrated circuits), Synergy Semiconductor (acquired by Micrel, Inc. in 1988), and STC Computer Research (no longer exists). Solvent UST located on south side of building and operated 1981-1985, stored various solvents including TCE, removed in 1985. Single soil boring next to UST in 1983 didn't detect VOCs in soil or groundwater. Four monitoring wells installed (MW-1 west of building, MW-2 on southern property boundary, MW-3 near UST, and MW-4 on northern property boundary). Initial groundwater gradient was to NW, 3Q09 gradient is to NE. 3Q09 depth to groundwater is 7-9 feet bgs. Four wells detected low VOC levels in groundwater (max 44 ppb - 1,1-DCA in MW-3). 3Q09 well sampling found all VOCs at or below drinking water standards. All four wells properly destroyed in Sep'09.

U	ompleted Info: Completed Area Name:	PROJECT WIDE
	Completed Sub Area Name:	Not reported
	Completed Document Type:	Site Inspections/Visit (Non LUR)
	Completed Date:	05/11/2005
	Comments:	Not reported
	Completed Area Name:	PROJECT WIDE
	Completed Sub Area Name:	Not reported
	Completed Document Type:	Certification
	Completed Date:	07/27/2004
	Comments:	A clean soil / gravel cap with a minimum thickness of 1 foot exists over the impacted soil on Parcels 1 and 2. An asphalt parking lot and single-story building exist over impacted soil on Parcel 3. This alternative allowed for the lowest short-term risk and provided high long-term protection by preventing direct exposure to impacted soil. The Department has determined that all appropriate removal/remedial actions have been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing operation and maintenance (O&M) and monitoring efforts.
	Completed Area Name: Completed Sub Area Name:	PROJECT WIDE Not reported
	Completed Document Type: Completed Date:	Voluntary Cleanup Agreement 11/20/2000
	Comments:	Intel Corporation entered into the VCA for DTSC to oversee site
	Commente.	characterization and remediation activities.
	Completed Area Name:	PROJECT WIDE
	Completed Sub Area Name:	Not reported
	Completed Document Type:	Risk Assessment Report
	Completed Date:	12/28/2001
	Comments:	No increased health risk posed by the Site under current conditions. However, there are areas onsite where soils deeper than one foot have arsenic concentrations above health-based action standards.

No breaches, holes in the clean soil/gravel and asphalt cap greater than one foot below the ground surface were observed.
Completed Area Name: Completed Sub Area Name: Completed Document Type: Completed Date: Comments:	PROJECT WIDE Not reported Operations and Maintenance Report 02/22/2016 The environmental consultant for Intel, the site owner, performed an annual site inspection in December 2015. The consultant observed during the inspection that all requirements of the Operation and Maintenance Agreement were met for Parcels 1 and 2. However, in Parcel 3 a hole was observed during the inspection that was excavated to repair an irrigation line and was filled in after the repair. DTSC approved the inspection report, but requested further information on the irrigation line repair because DTSC received no notification of the repair.

Comments:	A clean soil / gravel cap with a minimum thickness of 1 foot exists over the impacted soil on Parcels 1 and 2. An asphalt parking lot and single-story building exist over impacted soil on Parcel 3. This alternative allowed for the lowest short-term risk and provided high long-term protection by preventing direct exposure to impacted soil. The Department has determined that all appropriate removal/remedial actions have been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing operation and maintenance (O&M) and monitoring efforts.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2020 Date Data Arrived at EDR: 05/06/2020 Date Made Active in Reports: 05/28/2020 Number of Days to Update: 22 Source: EPA Telephone: N/A Last EDR Contact: 06/30/2020 Next Scheduled EDR Contact: 10/12/2020 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/27/2020 Date Data Arrived at EDR: 05/06/2020 Date Made Active in Reports: 05/28/2020 Number of Days to Update: 22 Source: EPA Telephone: N/A Last EDR Contact: 06/30/2020 Next Scheduled EDR Contact: 10/12/2020 Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019 Date Data Arrived at EDR: 04/05/2019 Date Made Active in Reports: 05/14/2019 Number of Days to Update: 39 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 07/02/2020 Next Scheduled EDR Contact: 10/12/2020 Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/27/2020 Date Data Arrived at EDR: 05/06/2020 Date Made Active in Reports: 05/28/2020 Number of Days to Update: 22 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 06/30/2020 Next Scheduled EDR Contact: 07/27/2020 Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/23/2020 Date Data Arrived at EDR: 03/25/2020 Date Made Active in Reports: 05/21/2020 Number of Days to Update: 57

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/01/2020 Date Data Arrived at EDR: 06/02/2020 Date Made Active in Reports: 06/09/2020 Number of Days to Update: 7 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 06/02/2020 Next Scheduled EDR Contact: 09/28/2020 Data Release Frequency: Semi-Annually

HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005 Date Data Arrived at EDR: 08/03/2006 Date Made Active in Reports: 08/24/2006 Number of Days to Update: 21 Source: Department of Toxic Substance Control Telephone: 916-323-3400 Last EDR Contact: 02/23/2009 Next Scheduled EDR Contact: 05/25/2009 Data Release Frequency: No Update Planned

SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 01/27/2020 Date Data Arrived at EDR: 01/28/2020 Date Made Active in Reports: 04/09/2020 Number of Days to Update: 72 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 04/28/2020 Next Scheduled EDR Contact: 08/10/2020 Data Release Frequency: Quarterly

CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 12/31/2018 Date Data Arrived at EDR: 02/05/2020 Date Made Active in Reports: 04/15/2020 Number of Days to Update: 70 Source: Department of Toxic Substances Control Telephone: 916-255-6504 Last EDR Contact: 07/09/2020 Next Scheduled EDR Contact: 10/19/2020 Data Release Frequency: Varies

TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995 Date Data Arrived at EDR: 08/30/1995 Date Made Active in Reports: 09/26/1995 Number of Days to Update: 27 Source: State Water Resources Control Board Telephone: 916-227-4364 Last EDR Contact: 01/26/2009 Next Scheduled EDR Contact: 04/27/2009 Data Release Frequency: No Update Planned

CERS HAZ WASTE: CERS HAZ WASTE

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 01/21/2020 Date Data Arrived at EDR: 01/22/2020 Date Made Active in Reports: 04/01/2020 Number of Days to Update: 70 Source: CalEPA Telephone: 916-323-2514 Last EDR Contact: 04/21/2020 Next Scheduled EDR Contact: 08/03/2020 Data Release Frequency: Quarterly

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/18/2020	Source: Drug Enforcement Administration

Local Land Records

LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 03/03/2020	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 03/05/2020	Telephone: 916-323-3400
Date Made Active in Reports: 05/14/2020	Last EDR Contact: 05/27/2020
Number of Days to Update: 70	Next Scheduled EDR Contact: 09/14/2020
	Data Release Frequency: Varies

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

Date of Government Version: 03/23/2020 Date Data Arrived at EDR: 03/24/2020 Date Made Active in Reports: 06/18/2020 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: 202-566-1917 Last EDR Contact: 06/22/2020 Next Scheduled EDR Contact: 10/05/2020 Data Release Frequency: Quarterly

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 05/04/2020 Next Scheduled EDR Contact: 08/17/2020 Data Release Frequency: Quarterly

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018 Number of Days to Update: 73 Source: Environmental Protection Agency Telephone: 703-308-4044 Last EDR Contact: 05/08/2020 Next Scheduled EDR Contact: 08/17/2020 Data Release Frequency: Varies

TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS) The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals: Source: American Hospital Association, Inc. Telephone: 312-280-5991 The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals. Medical Centers: Provider of Services Listing Source: Centers for Medicare & Medicaid Services Telephone: 410-786-3000 A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services. Nursing Homes Source: National Institutes of Health Telephone: 301-594-6248 Information on Medicare and Medicaid certified nursing homes in the United States. **Public Schools** Source: National Center for Education Statistics Telephone: 202-502-7300 The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states. **Private Schools** Source: National Center for Education Statistics Telephone: 202-502-7300 The National Center for Education Statistics' primary database on private school locations in the United States. **Daycare Centers: Licensed Facilities** Source: Department of Social Services Telephone: 916-657-4041

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Target Property Map: Version Date:	5640416 SAN JOSE WEST, CA 2012
Northeast Map:	5640070 MILPITAS, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

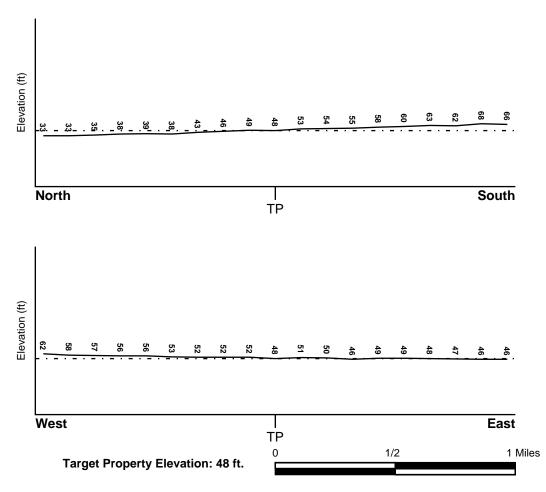

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>NWI Quad at Target Property</u> SAN JOSE WEST	Data Coverage YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile NNE
Site Name:	Integrated Device Technology, Inc
Site EPA ID Number:	CAD982464356
Groundwater Flow Direction:	Northeast
Measured Depth to Water:	approximately 15 feet in the "A" aquifer.
Hydraulic Connection:	An aquitard separates the near surface "A" and underlying "B" aquifers. An additional aquitard is located under the "B" aquifer and above the "C" aquifer.
Sole Source Aquifer: Data Quality:	No information about a sole source aquifer is available Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)
	o i ()

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

	LOCATION	GENERAL DIRECTION

Not Reported		

*©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation. TC6118785.2s Page A-3

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era:	Cenozoic Category:	Stratifed Sequence
System:	Quaternary	
Series:	Quaternary	
Code:	Q (decoded above as Era, System & Series)	

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA				
Soil Surface Texture:	clay loam				
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.				
Soil Drainage Class:	Not reported				
Hydric Status: Soil does not meet the requirements for a hydric soil.					
Corrosion Potential - Uncoated Steel:	MODERATE				
Depth to Bedrock Min:	> 60 inches				
Depth to Bedrock Max:	> 60 inches				

	Soil Layer Information							
	Boundary			Classification				
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)	
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60	
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60	
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60	

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

- Surficial Soil Types: No Other Soil Types
- Shallow Soil Types: No Other Soil Types
- Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS) This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database Source: Department of Water Resources Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Appendix B: User Questionnaire

PHASE I ENVIRONMENTAL SITE ASSESSMENT USER QUESTIONNAIRE

Pursuant to the American Society for Testing and Materials E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-13), in order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The User should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

The "User" is defined in the ASTM E 1527-13 standard as the party seeking to use Practice E 1527 to complete an environmental site assessment of the Site. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.

Thank you for taking the time to complete this questionnaire. If you have any questions, please call Glenn Young at 510.500.5574 or gyoung@trccompanies.com

	Date: 8/5/20

Yes No (d) Can you provide any information regarding specific chemicals that are present or once were p				
 (4.) Relationship of the purchase price to the fair market value of the Site property (40 CFR 312.29) Does the purchase price being paid for the Site property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? Mst that I am aware of. (5.) Commonly known or reasonably ascertainable information regarding the Site property (40 CFR 312.30) Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, (a.) Can you provide any information regarding the past uses of the Site? (b.) Can you provide any information regarding specific chemicals that are present or once were present at the Site? (c.) Can you provide any information regarding spills or other chemical releases that have occurred at the Site? (d.) Can you provide any information regarding any environmental cleanups that have occurred at the Site?	(3.)	Liability Protection (LLP) (40 CFR 312.28) Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Yes	No
 312.29) Does the purchase price being paid for the Site property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? Not that I and Aware of. (5.) Commonly known or reasonably ascertainable information regarding the Site property (40 CFR 312.30) Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, (a) Can you provide any information regarding the past uses of the Site? Yes were present at the Site? (b) Can you provide any information regarding specific chemicals that are present or once were present at the Site? (c) Can you provide any information regarding spills or other chemical releases that have occurred at the Site? (d) Can you provide any information regarding any environmental cleanups that have occurred at the Site? 		Not that I am awarr G'		
 (40 CFR 312.30) Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, (a.) Can you provide any information regarding the past uses of the Site? (b.) Can you provide any information regarding specific chemicals that are present or once were present at the Site? (c.) Can you provide any information regarding spills or other chemical releases that have occurred at the Site? (d.) Can you provide any information regarding any environmental cleanups that have occurred at the Site? 	(4.)	312.29) Does the purchase price being paid for the Site property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?		No
 (40 CFR 312.30) Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, (a.) Can you provide any information regarding the past uses of the Site? (b.) Can you provide any information regarding specific chemicals that are present or once were present at the Site? (c.) Can you provide any information regarding spills or other chemical releases that have occurred at the Site? (d.) Can you provide any information regarding any environmental cleanups that have occurred at the Site? 				
	(5.)	 (40 CFR 312.30) Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, (a.) Can you provide any information regarding the past uses of the Site? (b.) Can you provide any information regarding specific chemicals that are present or once were present at the Site? (c.) Can you provide any information regarding spills or other chemical releases that have occurred at the Site? (d.) Can you provide any information regarding any environmental cleanups that have occurred at the Site? 	Yes	No

(6.)	The degree of obviousness of the presence or likely presence of contamination at the Site, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31) Based on your knowledge and experience related to the Site are there any obvious indicators that point to the presence or likely presence of releases at the Site?		No
	Not that I am aware of		
(7.)	Proceedings Involving the Site Are you aware of: (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Site; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the Site; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products at the Site? Not Mut I am uwave of	Yes	No
(8.)	Questions Regarding Helpful Documents Are you aware of the presence of any of the documents listed below and, if so, whether copies can and will be provided to TRC within reasonable time and cost constraints?	Yes	No
	- Environment site assessment reports	Ξ¥	
	- Environment compliance audit reports		ЦХ.
	 Environmental permits (e.g., solid waste disposal permits; hazardous waste disposal permits; wastewater permits; National Pollutant Discharge Elimination System [NPDES] permits; or underground injection permits) 		Ŗ

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by TRC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # A6C9-429D-B77D

PO # 403826

Project 2590 Walsh Ave

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results Certification #: A6C9-429D-B77D

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

TRC Solutions, Inc. (TRC) was retained by Vantage Data Centers (Vantage, hereinafter referred to as "Client" or "User") to perform a Phase I Environmental Site Assessment (ESA) of the property located at 2590 Walsh Avenue, Santa Clara, CA 95051 (herein referred to as the "Site"). TRC conducted the ESA in connection with the Client's planned business transaction involving the Site. The Phase I ESA described in this report was performed in accordance with the scope and limitations of the American Society for Testing and Materials Practice E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-13). Limiting conditions and/or deviations from the ASTM E 1527-13 standard are described in Sections 1.3 and 7.7 of this report.

The Property is located in a commercial, residential, and light industrial portion of Santa Clara. The approximately 6.69-acre Site is currently owned by Stephens & Stephens (Walsh Avenue), LLC and is leased by Mia Sole for operation as a solar panel manufacturing facility. The property consists one one-story building, totaling approximately 111,585 square feet (assessor's parcel number 216-28-112). The exterior of the subject property consists of paved parking, landscaping, and concrete sidewalks.

Adjacent parcels include a railroad right of way owned by Peninsula Corridors Joint Power to the south, a software research and development facility to the east, Vantage Data Centers to the northeast, a microelectronics testing facility to the northwest, and an electrical substation to the west. Surrounding properties to the north, east and west were historically used for agricultural orchard operations or were undeveloped until the early 1980's, when the area was developed for light industrial and commercial use. Surrounding properties to the south share a similar historical use but were developed in the early 1980's for residential use.

RECs

TRC has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527 of the property located at 2590 Walsh Avenue in Santa Clara, the Site. Any exceptions to, or deletions from, this practice are described in Sections 1.3 and 7.7 of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) and/or controlled recognized environmental conditions (CRECs) in connection with the Site.

Findings

The following additional findings have been identified during the course of this Phase I ESA that have not been determined to be RECs but may be of importance to the User:

Finding No. 1

Historic operations on the Site as a semiconductor and related technology manufacturing facility may have involved the use and/or generation of hazardous wastes (predominantly metals and solvents). While there are no reported leaks or spills documented for the Site, an evaluation of soil vapor conditions is recommended.

Finding No. 2

Eight properties within a one mile radius of the Target Property with a shared history of agricultural orchard operations have cited historical pesticide use as the source of elevated concentrations of arsenic, lead, and organochlorine pesticides in soil, which has led to ongoing oversight and

management as well as land use restrictions. Additionally, the eastern portion of the Site was formerly operated as an orchard. Accordingly, an evaluation of shallow soil conditions for the potential presence of arsenic, lead, and organochlorine pesticides is recommended.

Dust observed in the machine shop is considered a *de minimis* condition in connection with the Site.

Conclusions and Recommendations

Although this assessment has revealed no evidence of recognized environmental conditions (RECs) and/or controlled recognized environmental conditions (CRECs) in connection with the Site, we understand that future Site redevelopment may include renovations and/or new construction for commercial land uses. Given the Site's historic operations as both a semiconductor and related technology manufacturing facility and an agricultural orchard, the Site's proximity to various operations with similar historical and current uses, and our experience with similar operations in the area, TRC recommends completing a limited subsurface investigation to evaluate soil, and/or soil vapor conditions at the Site. In the event that construction activities will require dewatering, a groundwater investigation is also recommended. Investigation results should be compared to the Screening Levels (SLs) and Environmental Screening Levels (ESLs) established by the Department of Toxic Substances Control and the Regional Water Quality Control Board, respectively. Findings will useful for future redevelopment considerations.

This Executive Summary is part of this complete report; any findings, opinions, or conclusions in this Executive Summary are made in context with the complete report. TRC recommends that the User read the entire report for supporting information related to findings, opinions, and conclusions.

Legal Notice

TRC has prepared this Phase I ESA for the City of Pittsburg (hereinafter "Client" or "User"). This document was prepared by TRC solely for the benefit of the Client and the User. With regard to third-party recipients of this document, neither TRC, nor the Client, nor the User, nor any of their respective parents, affiliates, or subsidiaries, nor any person acting on their behalf: (a) makes any warranty, expressed or implied, with respect to the use of any information or methods disclosed in this document. Any third-party recipient of this document, by its acceptance or use of this document, releases TRC, the Client, the User, and their parents, affiliates, and subsidiaries from any liability for direct, indirect, economic, incidental, consequential, or special loss or damage whether arising in contract, warranty, express or implied, tort, or otherwise, and irrespective of fault, negligence, and strict liability.

1.0 INTRODUCTION

TRC Solutions (TRC) has prepared this Phase I Environmental Site Assessment (ESA) for Vantage Data Centers (Vantage, hereinafter referred to as "Client" or "User").

This report was prepared for and may be relied upon by Client and User for the purposes set forth herein; it may not be relied on by any party other than the Client and User. TRC will consider authorization for third-party reliance on this report if requested by the Client. TRC reserves the right to deny reliance on this report by third parties.

1.1 Purpose and Scope of Services

The following Phase I ESA was performed for the property located at 2590 Walsh Avenue, Santa Clara, California, 95051 (hereinafter the "Site"). A Vicinity Map is included as **Figure 1**. This Phase I ESA has been prepared by TRC in accordance with the American Society for Testing and Materials E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I ESA Process* (ASTM E 1527-13) and is intended for the sole use of the City of Pittsburg.

The purpose of this assessment is to identify *Recognized Environmental Conditions* (RECs) at the Site, as defined by the ASTM E 1527-13 standard. The completion of this Phase I ESA report may be used to satisfy one of the requirements for the User to qualify for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* liability protections pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), thereby constituting *all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial or customary practice* as defined by 42 U.S.C. §9601(35)(B) of CERCLA.

TRC understands that this assessment is not funded with a federal grant awarded under the United States Environmental Protection Agency (U.S. EPA) Brownfields Assessment and Characterization program or for lending under the guidance of the Small Business Administration.

The Scope of Services for this Phase I ESA included the following tasks:

- Site and vicinity reconnaissance;
- Site and vicinity description and physical setting;
- Historical source review and description of historic Site conditions;
- Interviews with owners, operators, and/or occupants of the Site, and/or local officials;
- Review of environmental databases and regulatory agency records;
- Review of previous environmental reports/documentation, as applicable;
- Review of environmental liens, if provided or authorized to obtain by the User;
- Review of the site and surrounding area for controlled substances; and
- Preparation of a report summarizing findings, opinions, and conclusions.

1.2 Additional Services

Items outside the scope of the ASTM E 1527-13 standard include but are not limited to the following:

- Asbestos-containing building materials
- Radon
- Lead-based paint
- Lead in drinking water
- Wetlands
- Regulatory compliance
- Cultural and historic resources
- Industrial hygiene
- Emerging contaminants

- Health and safety
- Ecological resources
- Endangered species
- Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment
- Biological agents
- Mold

No additional services were performed outside the scope of the ASTM E 1527-13 standard.

1.3 Deviations to ASTM E 1527-13 Standard

No significant deviations or deletions to the ASTM standard were made during this Phase I ESA.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The Site is located at 2590 Walsh Avenue, Santa Clara, California, 95051 in a light industrial and commercial business land use area. The Site is described by the Santa Clara County tax assessor as Assessor Parcel Number (APN) 216-28-112 and is zoned as light industrial. The approximately 6.69-acre Site is currently owned by Stephens & Stephens (Walsh Avenue), LLC and is leased by Mia Sole for operation as a solar panel manufacturing facility. A Vicinity Map is included as **Figure 1**.

2.2 Site Improvements

Current on-Site improvements are listed in the following table. A Site Plan is included as **Figure 2**.

Site Feature	Description
Buildings (stories)	One one-story buildings with loading docks in each end and exterior enclosures for propane, liquid nitrogen, and liquid argon/metallic dust storage.
Construction date(s)	c.1982
Exterior areas	Paved or landscaped
On-Site roads/rail lines	N/A
Other large equipment	A liquid argon AST is present within the exterior enclosure southeast of the building.
Potable water supply	Santa Clara Valley Water District
Sewage disposal system(s)	Santa Clara Sewer Services
Heating/cooling system fuel source(s)	Pacific Gas & Electric (PG&E)
Back-up fuel source(s)	NA
Electricity supplier(s)	Pacific Gas & Electric (PG&E)

Table 2.1 - Site Improvements

Table 2.1 - Site	e Improvements

Site Feature	Description
Stormwater system	City of Santa Clara

2.3 Current and Historic Site Use

2.3.1 Current Site Use(s)

The Property is located in a light industrial and commercial business area and of Santa Clara. The approximately 6.69-acre Site is currently owned by Stephens & Stephens (Walsh Avenue), LLC and is leased by Mia Sole for operation as a solar panel manufacturing facility. The property consists one one-story building, totaling approximately 111,585 square feet (assessor's parcel number 216-28-112). The exterior of the subject property consists of paved parking, landscaping, and concrete sidewalks.

2.3.2 Previous Owner and Operator Information

Based on information provided by the User (Section 3.0), the historical record review (Section 4.0), and/or interviews conducted during this Phase I ESA (Section 6.0), historic Site ownership and operator information are provided in the tables below.

Site Owner/Operator (Operations)	From	То
Private Residence and Agricultural Orchards	c. 1939	c. 1968
Owner – KOLLREAL, a California Partnership – per Preliminary Title c. 1970 1977 Report (PTR)		1977
Owner(s) – Richard T. Peery & John Arrillaga – per PTR	1977	c.1982
Operator – Versatec Inc Corporate Headquarters (technology 1985 Unknow manufacturing and consulting) – per city directories		Unknown
Operator – Stryker Endoscopy (medical equipment supplier, manufacturing abilities unknown) – per city directories	1996	2001
Owner – Limar Realty Corp. #8 – per PTRUnknown2007		2007
Owner - Stephens & Stephens (Walsh Avenue), LLC – per PTR Operator – MiaSole Inc. (Semiconductor, Thin Film Solar, and Related Electronic Manufacturing) – per city directories		Present

Table 2.2 - Previous Owner/Operator Information

2.4 Physical Setting

According to the United States Geological Survey, 2012, 7.5-Minute Topographic Map for San Jose West, the Site is located approximately 3.54 miles south of the San Francisco Bay, the Site topographic elevation is approximately 48 feet above mean sea level, and local topography slopes toward the north and east. The subject property itself has no discernible slope other than for surface water drainage and for the loading docks. Based on local topography and historical environmental reports reviewed by TRC, the assumed direction of shallow groundwater flow is northeastward, toward the San Francisco Bay; however, a subsurface investigation would be required to determine actual depth to groundwater, flow direction, and water quality conditions.

The nearest surface water body is the Guadalupe River, a south-to-north flowing river located approximately 2 miles northeast of the subject property. The previous Phase 1 for the Site noted that the City of Santa Clara Planning Department indicated that no wetlands or riparian habitats (current or historical) exist within the boundaries of the subject property.

The database radius report, supplied by Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut, was reviewed to obtain information regarding the dominant soil composition in the Site vicinity. This information is summarized below:

Hydric Status:	Not hydric
Soil Surface Texture:	Clay Loam
Soil Component Name:	Botella
Deeper Soil Types:	Silty clay loam and sandy clay loam

Please refer to the GeoCheck Physical Setting Source Summary of the EDR report presented in **Appendix A** for further information regarding the soil composition in the Site vicinity. According to EDR, the subject property is located within a 500-year flood zone.

3.0 USER PROVIDED INFORMATION

According to the ASTM E 1527-13 standard, certain tasks that may help identify the presence of RECs associated with the Site are generally conducted by the Phase I ESA User. These tasks include providing or authorizing the *environmental professional* to obtain recorded land title records for environmental liens or activity and use limitations (AULs); providing specialized knowledge related to RECs at the Site (e.g., information about previous ownership or environmental litigation); providing commonly known or *reasonably ascertainable* information within the local community about the *property* that is material to RECs in connection with the *property*; and informing the *environmental professional* if, as believed by the User, the purchase price of the *property* is lower than the fair market value due to contamination. Information provided by the User pursuant to that request is listed in Section 3.0. A copy of the completed User questionnaire is included in **Appendix B**.

3.1 Title and Judicial Records for Environmental Liens or AULs

In addition to reviewing the EDR report (discussed in Section 4.2), local municipal records (Section 4.4), the Regional Water Quality Control Board's (RWQCB) GeoTracker and the Department of Toxic Substances Control's (DTSC) EnviroStor online search features were also reviewed (Section 4.4). TRC obtained supplemental information regarding AUL-listed properties within Pittsburg from EDR. No evidence of environmental liens or AULs associated with the Site were identified.

3.2 Specialized Knowledge

The User was not aware of specialized knowledge related to RECs at the Site.

3.3 **Property Value Reduction Issues**

The User was not aware of property valuation reduction issues regarding the Site.

3.4 Commonly Known or Reasonably Ascertainable Information

Commonly known or reasonably ascertainable information was provided to TRC by the User and is incorporated into other sections of this report. A copy of the User Questionnaire is included in **Appendix B**.

3.5 Reason for Conducting Phase I ESA

TRC understands the User requires a Phase I for due diligence purposes.

4.0 **RECORDS REVIEW**

4.1 Historic Use Information

Information regarding Site and vicinity historic uses was obtained from various publicly available and practically reviewable sources including:

- Aerial photographs (scale: 1" = 500') dated 1939, 1948, 1950, 1956, 1963, 1968, 1974, 1982,1993,1998, 2006, 2009, 2012, and 2016;
- Historical Sanborn® Fire Insurance Maps (Sanborn Maps);
- Topographic maps dated 1889, 1897, 1899, 1953, 1961, 1968, 1973, 1980, and 2012;
- City directories dated 1922, 1925, 1926, 1930, 1931, 1935, 1936, 1940, 1942, 1945, 1946, 1950 1955, 1957, 1960, 1962, 1963, 1964, 1965, 1966, 1968, 1970, 1974, 1975, 1978, 1980, 1982, 1985, 1986, 1991, 1994, 1996, 1999, 2000, 2001, 2004, 2006, 2009, 2014, and 2017;
- Local municipal records;
- An environmental database report; and
- Interviews with Site representative(s) and regulatory agency official(s), as necessary.

Historical research documentation is included in Appendix C.

Sanborn Maps were originally produced for assessing fire insurance liability in urban areas in the United States. The maps provide detailed information (e.g., building construction, facility occupants, storage tank locations, and hazardous material storage areas), which can be used as a resource to document land use and structural change over time. EDR researched the availability of Sanborn Maps in the vicinity of the Site; however, EDR stated that Sanborn Map coverage does not exist for the Site or nearby surrounding area.

4.1.1 Site History

Operational History

Table 4.1 - Site History

Year	Site History
1939 – c. 1968	Beginning with the 1939 aerial photograph (aerial) the eastern portion of the Site was covered by agricultural orchards and the western portion of the Site was undeveloped. A narrow creek was visible extending north to south through approximately the center of the Site, creating the natural boundary between the two Site operations. A small residential structure was also apparent near the center of the Site. No other development was apparent. Site conditions remained consistent through the 1968 aerial.
1974	The 1974 aerial depicted the Site being completely cleared of all agricultural orchards and residences, with no site improvements, and the Site appeared to be dirt covered.
c.1982 – c. 2005	Beginning with the 1982 aerial, the Site had been redeveloped as a commercial property. One commercial building was located on the Site; The buildings appears to be consistent with the current location and orientation of the current building. The remainder of the site appeared to be asphalt covered parking with landscaped areas. A road consistent with Walsh Avenue was visible along the northern Site boundary. On-Site conditions remained consistent through the 1998 aerial provided by EDR and the December 2005 aerial available on Google Earth.
c.2006 – Present	The 2006 aerial depicted the previously described building still on-Site, and paved parking areas similar to previous aerial photographs; however, structures consistent with the current improvements (i.e liquid nitrogen and liquid argon storage areas to the southwest and southeast, respectively, and dust collection area to the southeast).

It does not appear that topographic contours in the Site area have significantly changed during the time period reviewed. If significant changes had been noted, it could indicate significant filling or excavation activity.

Hazardous Substances

Based on our review of the EDR listings for the Site, a list of hazardous substances including raw materials; finished products and formulations; hazardous wastes; hazardous constituents and pollutants including intermediates and byproducts that were historically present at the Site are included in **Appendix A** and are summarized in the following table:

WASTE CODE	RCRA WASTE DESCRIPTION
D001	IGNITABLE WASTE
D002	CORROSIVE WASTE

Table 4.2 – Target Property Historic Hazardous Substances

WASTE CODE	RCRA WASTE DESCRIPTION
D003	REACTIVE WASTE
D004	ARSENIC
D006	CADMIUM
D007	CHROMIUM
D008	LEAD
D010	SELENIUM
D011	SILVER
F001	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1- TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F002	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO- DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F003	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F005	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Table 4.2 – Target Property Historic Hazardous Substances

Site manufacturing operations are very limited, and most materials are not present. A small hazardous materials cabinet with small containers (<1 gallon) is present in the manufacturing area. Current hazardous substances and petroleum products observed during the Site reconnaissance, if any - including unidentified substance containers (when open or damaged,

and containing unidentified substances suspected of being hazardous or petroleum products) - are discussed in Section 5.2.

4.1.2 Adjoining Property History

1939 – 1968 Aerial Photographs

Beginning with the 1939 aerial, adjoining properties to the north and east were developed as agricultural orchards. A rail line consistent with the current alignment was visible adjoining to the southern portion of the Site. The adjoining property to the west was undeveloped. Conditions remained consistent through the 1968 aerial photograph.

1974 Aerial Photograph

The 1974 aerial depicted adjoining properties as undeveloped similar to the target property, having agricultural orchard operations removed.

1982 – 2016 Aerial Photographs

Beginning with the 1982 aerial adjoining properties were developed with apparent commercial structures and paved parking areas in their current orientations. Walsh Avenue and Bowers Avenue were visible adjoining to the north of the Site and west of the western adjacent property, respectively. Conditions on adjoining properties remained consistent throughout subsequent aerial years reviewed.

4.1.3 Surrounding Property History

Direction	Surrounding Property History Based on Aerial Photos
North and East	From 1939 through 1968 surrounding areas to the north and east were developed with agricultural orchards. Beginning in 1974 through 2012 surrounding areas to the north and east became increasingly developed with various commercial uses.
West	From 1939 through 1968 surrounding areas to the west were undeveloped. Beginning in 1974 through present, surrounding areas to the west became increasingly developed with various commercial and light industrial uses.
South	From 1939 through 1950 areas to the south were developed with agricultural orchards. Beginning in 1956 through 1968, the surrounding areas to the south and southwest depicted the introduction of residential developments, while the remainder of the surrounding area to the south remained as agricultural orchards. By 1974, most surrounding areas south of the existing railroad lines, constructed prior to 1889, were depicted as residential developments.

4.2 Database Report and Environmental Record Review

A database search report that identifies properties listed on State and Federal databases within the ASTM-required radii of the Site was obtained from EDR and is included in **Appendix A**. The environmental database report identified 19 records/listings for the Site and 216 other records/listings within the search radii of the Site. These properties included those that could be mapped and those that could not (i.e., orphan properties).

4.2.1 Subject Site

Site information included in the database search report is summarized in the following table:

Site Facility Name(s) and/or Listed Address(es)	MiaSole HI Tech Inc. 2590 Walsh Avenue
EDR Map No(s).	1, 2, 3, 5 - 11
Database(s)	HAZNET, RCRA-LQG, HWTS, EMI, CERS, FINDS, ECHO, CERS HAZ WASTE, NPDES, CIWQS
Description/ID No(s).	 HAZNET: California Department of Toxic Substance Control (DTSC) Hazardous Waste Facility and Manifest Data. RCRA-LQG is the Environmental Protection Agency's Resource Conservation and Recovery Act, the database includes information on sites which generate, transport, store, treat and/or dispose over 1,000 kilograms (kg) of hazardous, or 1 kg of acutely hazardous waste per month. HWTS: DTSC Hazardous Waste Tracking System. EMI: California Air Resources Board Emissions Inventory Data (EMI) CERS: California Environmental Reporting System FINDS: Facility Index System/Facility Registry System ECHO: US EPA Environmental Compliance History Online Database. HAZ WASTE: CERS Hazardous Waste sites. NPDES: National Pollutant Discharge Elimination System Permits Listing CIWQS: State and Regional Water Quality Control Boards (RWQCB) Integrated Water Quality System
Database Review Summary	The target property is listed as a large quantity generator of inorganic and organic hazardous wastes and solvents. No violations were noted, and no releases were identified.
Site Facility Name(s) and/or Listed Address(es)	Stryker Endoscopy 2590 Walsh Avenue
EDR Map No(s).	4
Database(s)	California CUPA Listings
Description/ID No(s).	CUPA: Certified Unified Program Agency
Database Review Summary	The listing was administrative in nature. The listing indicated that the property generates hazardous solvent wastes. No violations or releases were noted, and therefore it is not anticipated to affect the Site.

4.2.2 Adjoining and Surrounding Property Record Review

TRC evaluated the following factors to determine whether additional environmental records should be reviewed with respect to the potential for contaminant migration from the adjoining and surrounding properties:

- (1) Whether the property is upgradient or downgradient of the Site related to potential groundwater migration based on the local topography, and the assumed (or known) groundwater depth and northward shallow groundwater flow direction;
- (2) Whether the property is upgradient or downgradient of the Site related to potential vapor migration based on readily available information pursuant to the ASTM E 1527-13 standard including soil and geological characteristics; contaminant characteristics; contaminated plume migration data; and significant conduits that might provide preferential pathways for vapor migration such as major utility corridors, sanitary sewers, storm sewers, and significant natural conduits such as Karst terrain (vapor migration may also be influenced by the age and design of infrastructure features associated with these conduits);
- (3) Property case status (i.e., whether the state environmental agency or applicable regulatory authority has issued a No Further Action letter or other similar closure document);
- (4) Type of database and whether the presence of contamination is known; and
- (5) The distance between the listed property and the Site.

Based on this evaluation, TRC limited the review of additional environmental records to the properties listed below because the potential for contamination to be migrating to the Site from the other properties identified by the database search is considered low.

4.2.2.1 Adjoining Properties

Information regarding adjoining properties (those which share a common property boundary with the Site) included in the database search report is summarized in the following table(s):

Facility Name(s) and/or Listed Address(es)	International Diagnostic Technology 2552 WALSH AVE
EDR Map No(s).	12
Approximate Location Relative to Site	102 feet east
Elevation Relative to Site	Higher
Database(s)	FINDS, RCRA-SQG, ECHO
Description/ID No(s)	RCRA-SQG: RCRA small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. (Also see previous definitions)
Presumed Hydrogeologic Setting Relative to Site	Cross-Gradient
Database Review Summary	The listing was administrative in nature. The listing indicated that the property generates hazardous wastes. No violations were noted, and therefore it is not anticipated to affect the Site.
Facility Name(s) and/or Listed Address(es)	Vantage Data Centers 4 LLC. 2565 Walsh Avenue

EDR Map No(s).	13, 14
Approximate Location Relative to Site	205 feet east
Elevation Relative to Site	Higher
Database(s)	AST, CERS TANKS, CERS
Description/ID No(s)	AST: Above ground storage tank (AST) listings CERS TANKS: California AST and underground petroleum storage tank (UST) facilities (Also see previous definitions)
Presumed Hydrogeologic Setting Relative to Site	Cross-Gradient
Database Review Summary	The listing was administrative in nature. The listing indicated that the property contains ASTs. No violations were noted, nor was there any indication of a release, and therefore it is not anticipated to affect the Site.

Facility Name(s) and/or Address(es)	Uranium Substation 2705 Bowers Avenue
EDR Map No(s).	15
Approximate Location Relative to Site	229 feet west
Elevation Relative to Site	Higher
Database(s)	CERS HAZ WASTE, CERS
Description/ID No(s).	(see previous definitions)
Presumed Hydrogeologic Setting Relative to Site	Cross-gradient
Database Review Summary	The listing was administrative in nature, indicating that the property stores hazardous wastes and acts as an electric power substation. Identified violations refer to reporting and implementation of a Hazardous Materials Business Plan (HMBP), and are not indicative of a release, therefore it is not anticipated to affect the Site.
Facility Name(s) and/or Address(es)	Intel Corporation 2625 Walsh Avenue
EDR Map No(s).	16, 17, 18
Approximate Location Relative to Site	315 feet north

Elevation Relative to Site

Higher

Database(s)	LUST, HIST CORTESE, HIST LUST, HIST UST, AST, CERS,
Dalabase(s)	
Description/ID No(s).	 LUST: refers to a Leaking Underground Storage Tank and is regulated by the RWQCB. HIST LUST: refers to a historic listing of LUST and is regulated by the RWQCB. HIST LUST: refers to a historic listing of underground storage tanks. HIST CORTESE: RWQCB Hazardous Waste & Substance Site List. (Also see previous definitions)
Presumed Hydrogeologic Setting Relative to Site	Downgradient
Database Review Summary	The listing indicated a LUST (case closed) site, for unidentified contaminants from a leak detected in 1987. According to the listing, the case was remediated and was granted a case closure/no further action as of 1996. Due to the downgradient location and case closure from the RWQCB, this case is not anticipated to have impacted the Site.
Facility Name(s) and/or Address(es)	Apple Inc. 2630 Walsh Avenue
EDR Map No(s).	19, 20, 21, 22
Approximate Location Relative to Site	340 feet north
Elevation Relative to Site	Higher
Database(s)	CERS HAZ WASTE, CERS, RCRA-LQG, FINDS, CUPA LISTINGS, RCRA-SQG
Description/ID No(s).	(See previous definitions)
Presumed Hydrogeologic Setting Relative to Site	Downgradient
Database Review Summary	The listing was administrative in nature, indicating that the property generates hazardous meatal wastes (cadmium, chromium, lead, silver) and solvents. No violations were noted, nor was there any indication of a release, and therefore it is not anticipated to affect the Site.

Based on the above listing(s), TRC conducted a review of available files for adjacent properties on Envirostor and Geotracker. These files are included in the summaries in the table above.

4.2.2.2 Surrounding Properties

TRC evaluated the following factors to determine whether additional environmental records should be reviewed with respect to the potential for contaminant migration from the adjoining and surrounding properties:

1. Whether the property is upgradient or downgradient of the Site with respect to potential ground water migration based on the local topography, and the assumed ground water depth and southeast shallow ground water flow direction;

- 2. Whether the property is upgradient or downgradient of the Site with respect to potential vapor migration based on readily available information pursuant to the ASTM E 1527-13 standard including soil and geological characteristics; contaminant characteristics; contaminated plume migration data; and significant conduits that might provide preferential pathways for vapor migration such as major utility corridors, sanitary sewers, storm sewers, and significant natural conduits such as Karst terrain (vapor migration may also be influenced by the age and design of infrastructure features associated with these conduits);
- 3. Property case status (i.e., whether the California Department of Toxic Substance Control or Regional Water Quality Control Board has issued a No Further Action letter or other similar document);
- 4. Type of database and whether the presence of contamination is known; and
- 5. The distance between the listed property and the Site.

Based on this evaluation, TRC limited the review of additional environmental records to the properties listed below, based on their presumed hydrogeologic setting, since the potential for contamination to be migrating to the Site from the other properties identified by the database search is considered low.

4.2.2.1.1 Federal Superfund Sites

The database search report identified National Priorities Listings for three surrounding properties within the general vicinity of the Site; information regarding this property is summarized in the following tables:

Facility Name(s) and/or Address(es)	INTEL MAGNETICS, 3000 OAKMEAD VILLAGE
EDR Map No(s).	Reg
Approximate Location Relative to Site	2115 feet northwest
Database(s)	NPL, SEMS, RCRA-SQG, US ENG CONTROLS, US INST CONTROLS, CA HIST Cal-Sites, ROD, PRP, CONSENT, NY MANIFEST

	NPL: US EPA National Priorities Listing, identifying Federal
	Superfund Sites under the Comprehensive Environmental
	Response, Compensation, and Liability Act (CERCLA)
	SEMS: Superfund Enterprise Management System Archive
	US ENG CONTROLS: A listing of sites with engineering controls in
	place.
	US INST CONTROLS: A listing of sites with institutional controls in
	place
Description/ID No(s).	CA HIST Cal-Sites: DTSC Database of known and potential
	hazardous substance sites.
	ROD: Record of Decision documents mandate a permanent
	remedy at an NPL (Superfund) site.
	PRP: A listing of verified Potentially Responsible Parties (PRPs).
	CONSENT: Superfund (CERCLA) Consent Decrees
	NY MANIFEST: US Department of Environmental Conservation
	Facility and Manifest Data.
	(Also see previous definitions)
	The Intel Magnetics facility produced and tested magnetic products and
	computer memories on site. Micro Storage occupied the site from 1985 to
	1986 and used the facility for research and development and pilot
	manufacturing. Monitoring wells on the site are contaminated with volatile
	organic compounds (VOCs) and semi-volatile organic compounds
	(SVOCs), believed to have resulted from surface spills and a leak from an
	underground storage tank. In February 1989, the RWQCB issued a
	cleanup order for the Site. EPA then issued a ROD for the Site on August
Database Review	26, 1991. The ROD remedial action objectives are to prevent any further
Summary	migration of contaminants in the groundwater, to prevent any future
	exposure to the public of contaminated groundwater, and to restore the A- zone groundwater to drinking water quality. According to the EPA's fifth 5
	year review, completed in September 2017, the contaminant
	concentrations in the shallow A-zone plume are decreasing and that there
	has been no contaminant migration into the underlying B-zone of the
	shallow aquifer; however, cleanup standards at the Site have
	not been met in all wells. Institutional controls and two deed restrictions
	are in place, which are intended to prevent the use of the groundwater
	beneath the site, and verification monitoring is ongoing.

Facility Name(s) and/or Address(es)	APPLIED MATERIALS, 3050 BOWERS AVE
EDR Map No(s).	Reg
Approximate Location Relative to Site	2389 feet north, northwest
Database(s)	NPL, SEMS, RCRA-LQG, US ENG CONTROLS, US INST CONTROLS, ROD, PRP, FINDS, ECHO, NY MANIFEST
Description/ID No(s).	(See previous definitions)

Database Review Summary	The Applied Materials facility has manufactured equipment for the fabrication of semiconductor wafers from 1974 to the present. During the 1970s, acids, caustics and other chemicals were in use at the facility, including VOCs used as industrial solvents for cleaning and degreasing. Facility operations led to groundwater contamination. As of July 7, 2006, the Water Board oversees this and about 20 other federal Superfund sites with the expressed consent of the U.S. Environmental Protection Agency (US EPA), the federal agency responsible for implementing the Superfund law (CERCLA). After construction of the site's remedy, operation and maintenance activities and verification monitoring are ongoing since at least May 27, 2009.
Facility Name(s) and/or Address(es)	SYNERTEK, INC. (BUILDING 1) 3050 CORONADO BLVD
EDR Map No(s).	Reg
Approximate Location Relative to Site	1944 feet north
Database(s)	NPL, SEMS, RCRA-LQG, US ENG CONTROLS, US INST CONTROLS, ROD, PRP, FINDS, ECHO
Description/ID No(s).	(See previous definitions)
Database Review Summary	Synertek Inc, a subsidiary of Honeywell Inc, manufactured semiconductor products in the Synertek #1 facility from 1978 to 1988. Between 1974 and 1982, one 200-gallon solvent tank and three neutralization tanks were installed at the Site. These tanks were found to be the source of VOC soil and groundwater contamination. The tanks and contaminated soil were removed in 1985. Synertek #1 was added to the National Priorities List (NPL) in September 1989 and is currently under the oversight of the San Francisco Regional Water Quality Control Board. The site is currently under monitored natural attenuation status, and the use of engineering controls, including enhanced in-situ bioremediation (EISB), and land use covenants are in place to prevent the use of the groundwater beneath the site.

4.2.2.1.2 Upgradient Properties

The database search report identified one surrounding upgradient property within the general vicinity of the Site; information regarding this property is summarized in the following table:

Facility Name(s) and/or Address(es)	ALHAMBRA GARDEN APARTMENTS, 2729 CHROMITE DR APT A
EDR Map No(s).	51
Approximate Location Relative to Site	0.19 miles
Elevation Relative to Site	Higher

Database(s)	HWTS, DRYCLEANERS
Description/ID No(s).	DRYCLEANERS : A list of drycleaner related facilities that have EPA ID numbers. (Also see previous definitions)
Database Review Summary	The listing was administrative in nature. The listing incorrectly indicated that the Site operates as a dry cleaner; however, additional records indicate the property operates coin-operated laundry for tenants. Therefore, it is not anticipated to affect the site.

4.2.2.1.3 Cross-Gradient Properties

The database search report identified five (5) sites located hydraulically cross-gradient to the target property at which a known or suspected release has occurred. Information regarding surrounding cross-gradient properties (those within the general vicinity of the Site) included in the database search report is summarized in the following table(s):

Facility Name(s) and/or Address(es)	APPLIED MATERIALS, 2940-2950 KIFER ROAD
EDR Map No(s).	76
Approximate Location Relative to Site	0.311
Elevation Relative to Site	Lower
Database(s)	CPS-SLIC, CERS
Description/ID No(s).	CPS-SLIC: RWQCB's list of Cleanup Program Sites (CPS), formerly known as Spills, Leaks, Investigations, and Cleanups (SLIC) sites. (Also see previous definitions)
Database Review Summary	The listing indicated that minor concentrations of 1,1,1-Trichloroethane (TCA) and trichloroethene (TCE) beneath RWQCB ESLs were found in soil during closure activities of the former Applied Materials manufacturing facility. Low concentrations did not warrant additional subsurface investigations and the case was closed by the RWQCB in a letter dated December 19, 1994. Due to the issuance of a closure document from the RWQCB, this case is not anticipated to have impacted the Site.
Facility Name(s) and/or Address(es)	FAYETTE PROPERTIES, 111 URANIUM DR
EDR Map No(s).	85
Approximate Location Relative to Site	0.393
Elevation Relative to Site	Higher

Database(s)	LUST, HIST LUST, CORTESE, HIST CORTESE, CERS
Description/ID No(s).	(See previous definitions)
Database Review Summary	The listing identified low levels of total petroleum hydrocarbons as gasoline (TPHg) contamination in groundwater at the property resulting from a leaking underground storage tank (LUST). File review of available case documents on the Geotracker webpage revealed there was no indication of off-site migration, and the RWQCB issued a case-closure, no further action letter on April 1, 1994; therefore, it is not anticipated to affect the Site.
Facility Name(s) and/or Address(es)	PACIFIC MAINTENENCE CO., 2294 WALSH AVE
EDR Map No(s).	103
Approximate Location Relative to Site	0.482
Elevation Relative to Site	Higher
Database(s)	HWTS, LUST, HIST LUST, CERS HAZ WASTE, CORTESE, HAZNET, HIST CORTESE, CERS
Description/ID No(s).	(See previous definitions)
Database Review Summary	The listing identified elevated concentrations of TPHg, and low levels of tolulene, xylenes, and ethylbenzene contamination in soil and groundwater at the property resulting from a LUST. File review of available case documents on the Geotracker webpage revealed there was no indication of off-site migration, and the RWQCB issued a case-closure, no further action letter on December 8, 1997; therefore, it is not anticipated to affect the Site.
Facility Name(s) and/or Address(es)	BOISE CASCADE, 1290 KIFER RD
EDR Map No(s).	133
Approximate Location Relative to Site	0.818
Elevation Relative to Site	Higher
Database(s)	ENVIROSTOR, LUST, CPS-SLIC, EMI, HIST CORTESE, CERS
Description/ID No(s).	ENVIROSTOR : CA DTSC's online listing of regulated hazardous waste sites. (Also see previous definitions)

Database Review Summary	The listing identified elevated concentrations of TPHg contamination in soil and groundwater at the property seemingly resulting from a LUST during removal; however, file review of available case documents on the Geotracker webpage revealed the tanks being removed contained diesel fuel, not gasoline, and verification monitoring confirmed there was no TPH contamination at the site. The RWQCB determined the elevated concentration of TPHg identified in groundwater was anomalous, and they issued a case-closure, no further action letter on January 17, 1992; therefore, it is not anticipated to affect the Site.
----------------------------	---

Facility Name(s) and/or Address(es)	SANMINA CORPORATION, 1881 MARTIN AVE
EDR Map No(s).	137
Approximate Location Relative to Site	0.851
Elevation Relative to Site	Higher
Database(s)	CA ENVIROSTOR, CA CPS-SLIC
Description/ID No(s).	(See previous definitions)
Database Review Summary	The listing identified elevated concentrations of solvents and metals in soil and groundwater at the property resulting from former circuit board manufacturing operations in the 70's and early 80's. File review of available case documents on the Geotracker webpage revealed there was no indication of off-site migration, and the RWQCB granted case closure on April 5, 2019; therefore, it is not anticipated to affect the Site.

All additional listings for properties located hydraulically cross-gradient to the target property were administrative in nature and, therefore, are not anticipated to affect the Site.

4.2.2.1.4 Down-Gradient Properties

Properties located hydraulically downgradient of the Site are not likely to affect the Target Property but are useful in determining general regional trends.

There are 30 listings for properties located hydraulically downgradient within one mile of the Target Property included in the database search report which identified solvent contamination in soil and/or groundwater resulting from historic site operations relating to tech manufacturing:

4.3 **Previous Reports**

The following environmental and geotechnical reports regarding the Site were provided for TRC's review by Andres Montoya, Property Manager:

- January 26, 2007, PHASE I ENVIRONMENTAL SITE ASSESSMENT, 2590 WALSH AVENUE SANTA CLARA, CALIFORNIA, Prepared by Stellar Environmental Solutions
- July 17, 2020, *LIMITED PRE-PURCHASE INVESTIGATION, COMMERCIAL PROPERTY, 2590 WALSH AVENUE, SANTA CLARA, CALIFORNIA*, Prepared by Murray Engineers Inc. (Geotech Report)

Information provided in these reports is summarized throughout this report.

4.4 Other Environmental Record Sources

Per the ASTM standard, local or additional state records were reviewed to enhance and supplement the ASTM-required federal and state records reviewed and discussed earlier in this report. These additional records include state agency lists of waste disposal facilities; hazardous waste/contaminated facilities; registered storage tanks; records of emergency release reports; and records of contaminated public wells. Local sources that were contacted to obtain this information include the Santa Clara County Department of Environmental Health, Santa Clara County Fire Protection District, City of Santa Clara Hazardous Materials Compliance Division, the California Department of Toxic Substance Control (DTSC), the Regional Water Quality Control Board (RWQCB), and the California Environmental Protection Agency (CalEPA). Information from these sources is discussed below:

Regulatory Agency/Department	Available Information
Santa Clara County Department of Environmental Health (SCCDEH)	Submitted a records request via online portal on July 15, 2020 for files regarding the Site. The City of Santa Clara responded on July 27, indicating that no files from the SCCDEH were available for review.

Table 4.3 - Other	Environmental	Record Sources
-------------------	---------------	-----------------------

Regulatory Agency/Department	Available Information
City of Santa Clara Fire Department, Hazardous Materials Devision	Submitted a records request via online portal on July 15, 2020 for files regarding the Site. The City of Santa Clara responded on July 27 providing 34 digital files in connection with the Site. TRC reviewed all files, which included 3 fire inspection violations dated September 9, 2018, May 21, 2019, and June 4, 2019; 17 CERS Hazardous Materials And Wastes Inventory Matrix Reports for Miasole Hi-Tech between 2006 and 2018; and hazardous materials business plans, permits, and inspection reports/responses for Miasole (2007-2019), Stryker Endoscopy (2002), and XES Inc. (1992). Additionally, one record from Water and Sewage (retained by the Fire Department) regarding work orders related to city staff being dispatched to the property to conduct inspections and address sewage leaks and leaking waterlines in 2007 and 2014 was reviewed. Violations included in these files are not indicative of any hazardous materials release at the property, and information included therein is integrated into other sections of this report. All records are retained by TRC and are available upon request.
Regional Water Quality Control Board (RWQCB)	The RWQCB's GeoTracker online database was accessed on July 14, 2020 to review any files pertaining to the Site and/or adjoining and surrounding properties. No cases were listed for the Site and information on adjacent and surrounding properties is included in section 4.2.
Department of Toxic Substances Control (DTSC)	The DTSC's EnviroStor online database was accessed on July 14, 2020 to review any files pertaining to the Site and/or adjoining and surrounding properties. No cases were listed for the Site and information on adjacent and surrounding properties is included in section 4.2.
California Environmental Protection Agency (CalEPA)	The CalEPA's online regulated site portal was accessed on July 14, 2020 to review any files pertaining to the Site and/or adjoining and surrounding properties. Two listings were identified for the Site regarding annual reporting of generated hazardous wastes, and there was no evidence of a release at the property. Information on the target property, as well as adjacent and surrounding properties, is included in section 4.2.

Table 4.3 - Other Environmental Record Sources

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

Mr. Glenn Young conducted a Site reconnaissance of accessible areas on and around the Site on July 30, 2020 for the purpose of identifying potential RECs. He was accompanied during the reconnaissance by Mr. Mike Ma, Vice President for Miasole.

Due to certain Covid-19 restrictions, the facility is operating with a skeleton crew with very limited manufacturing being conducted. Based on discussion with Mr. Ma, we understand that the liquid nitrogen and liquid argon tanks have been removed or are empty. The machine shop was not operating.

Photographs taken during the Site reconnaissance are provided in **Appendix D**. A Site Plan is included as **Figure 2**.

5.2 Interior and Exterior Site Observations

Unless otherwise noted, the items listed in the table below appeared in good condition with no visual evidence of staining, deterioration, or a discharge of hazardous materials; and there are no records of a release in these areas. Items where further description is warranted are discussed in the section(s) following the table.

Item	Present (Current/ Historic/ Not Observed)	Description
Hazardous material storage or handling areas	Present	(see Section 5.2.1)
Solid and liquid wastes including municipal wastes	Present	Clean Harbors waste bin for solid waste was present in eastern parking lot.
USTs and associated piping	Not Observed	NA
ASTs and associated piping	Present	AST for Liquid Argon is present in enclosure located outside the southeastern corner of the building.
Drums and containers (≥5 gallons)	Present	Several empty 55-gallon drums were present in the machine shop. Several 55-gallon drums were also present in the Liquid argon/ metallic dust enclosure.
Odors	Not Observed	N/A
Pools of liquid, including surface water bodies and sumps (handling hazardous substances or substances likely to be hazardous only)	Not Observed	N/A
PCBs/transformers	Not Observed	A pad mounted transformer is present in the eastern parking lot. The transformer was not labelled as containing PCBs.
Stains or corrosion	Not Observed	N/A
Drains and sumps	Not observed with building.	Storm drains are present in the exterior parking areas.
Pits, ponds, and lagoons	Not Observed	N/A
Stressed vegetation	Not Observed	N/A
Historic fill or other fill material	Not Observed	N/A
Wastewater (including stormwater or discharge into a drain, ditch, underground injection system, or stream on or adjacent to the Site)	Not Observed	N/A
Wells (including dry wells, irrigation wells, injection wells, abandoned wells, or other wells)	Not Observed	N/A
Septic systems or cesspools	Not Observed	N/A

Table 5.1 - Interior and Exterior Site Observations

A small x-ray laboratory with lead curtains is present next to the manufacturing area. We understand the x-ray work was used for quality control purposes and is a permitted operation.

5.2.1 Hazardous Substances

Hazardous substances including raw materials; finished products and formulations; hazardous wastes; hazardous constituents and pollutants including intermediates and byproducts; and unidentified substance containers (when open or damaged, and containing unidentified substances suspected of being hazardous or petroleum products) were limited to a small cabinet located within the manufacturing area at the Site.

5.2.2 Solid and Liquid Wastes

No solid or liquid wastes are observed during the reconnaissance. Several empty 55-gallon drums were present in the machine shop. Additionally, several 55-gallon drums were observed within the Liquid argon / Metallic dust enclosure. No staining or leaks from those drums were observed. Black dust, presumably metallic dust, was observed in minor amounts within in the machine shop. Adhesive floor mats were installed at the doorways to the shop to reduce tracking dust beyond the machine shop.

According to facility representatives, the facility is not presently generating hazardous waste.

5.2.3 USTs

No USTs were identified by the Key Site Manager or observed during the Site visit.

5.2.4 ASTs

No fuel or solvent ASTs were identified by the Key Site Manager or observed during the Site visit. A liquid argon AST is present within the exterior enclosure southeast of the building.

5.3 Adjoining and Surrounding Properties Reconnaissance

5.3.1 Adjoining Properties

During the Site reconnaissance, TRC viewed the adjoining properties from the Site and publicly accessible areas (e.g., public roadways, etc.).

Direction from Site	Current Land Use Description
North	A light industrial/office building with parking lot and landscaped areas is present at 2360 Walsh Avenue and the Vantage Data Centers campus is present across Walsh Avenue.
East	The parcel to the east of the Site, 2552 Walsh Avenue, comprises a light industrial/office building with parking lot and landscaped areas.
South	SamTrans railroad tracks are present next to the southern property line.

Direction from Site	Current Land Use Description
West	The City of Santa Clara Uranium Substation is present immediately west of the Site.

5.3.2 Surrounding Properties

Surrounding properties generally include residential areas to the south and light industrial and commercial entities in all other directions. TRC representatives observed those properties described in **Section 4.2** and did not identify visual evidence of RECs to the target property.

6.0 INTERVIEWS

The following persons were interviewed to obtain historically and/or environmentally pertinent information regarding RECs associated with the Site:

• Michael Stoner, Agent for Client- Key Site Manager (as defined by the ASTM standard);

The information provided by each is discussed and referenced in the text or provided below. Interview documentation is included in **Appendix B.** Other references and sources of information are included in **Appendix E**.

7.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Potential findings can include RECs, including CREC, HRECs, and *de minimis* conditions, pursuant to the ASTM E 1527-13 standard.

RECs are defined as the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property*: (1) due to any *release* to the environment; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*.

CRECs are defined as RECs resulting from past *releases* of *hazardous substances* or *petroleum products* that have been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting riskbased criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (e.g., *property* use restrictions, *AULs, institutional controls*, or *engineering controls*).

HRECs are defined as past *releases* of any *hazardous substances* or *petroleum products* that have occurred in connection with the *property* and have been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property* use restrictions, *AULs, institutional controls*, or *engineering controls*).

De minimis conditions are defined as conditions that generally do not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis conditions* are not RECs nor CRECs.

TRC has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 1527-13 at the City-owned parcel APN 073-042-023 located at Industry Road in Pittsburg, California 94565 (Site), see **Appendices F** and **G**. Deviations from this standard are described in Sections 1.3 and 7.7 of this report.

7.1 Findings

The following conditions were noted during the preparation of this report. TRC has provided the Environmental Professional's rationale for concluding that a condition is or is not currently a REC.

Finding No. 1

Historic operations on the Site as a semiconductor and related technology manufacturing facility may have involved the use and/or generation of hazardous wastes (predominantly metals and solvents). While there are no reported leaks or spills documented for the Site, an evaluation of soil vapor conditions is recommended.

Finding No. 2

Eight properties within a one mile radius of the Target Property with a shared history of agricultural orchard operations have cited historical pesticide use as the source of elevated concentrations of arsenic, lead, and organochlorine pesticides in soil, which has lead to ongoing oversight and management as well as land use restrictions. Additionally, the eastern portion of the Site was

formerly operated as an orchard. Accordingly, an evaluation of shallow soil conditions for the potential presence of arsenic, lead, and organochlorine pesticides is recommended.

7.2 RECs and CRECs

This assessment has revealed no evidence of RECs (including CRECs) in connection with the Site.

7.3 HRECs

This assessment has revealed no evidence of HRECs in connection with the Site.

7.4 *De Minimis* Conditions

The dust observed in the machine shop is considered a *de minimis* condition in connection with the Site.

7.5 Data Gaps

TRC has made an appropriate inquiry into the commonly known and reasonably ascertainable resources concerning the historic ownership and use of the Site back to the first development per 40 CFR Part 312.24 (*Reviews of Historical Sources of Information*). TRC identified no data gaps during this assessment.

7.6 Conclusions and Recommendations

Although this assessment has revealed no evidence of recognized environmental conditions (RECs) and/or controlled recognized environmental conditions (CRECs) in connection with the Site, we understand that future Site redevelopment may include renovations and/or new construction for commercial land uses. Given the Site's historic operations as both a semiconductor and related technology manufacturing facility and an agricultural orchard, the Site's proximity to various operations with similar historical and current uses, and our experience with similar operations in the area, TRC recommends completing a limited subsurface investigation to evaluate soil, and/or soil vapor conditions at the Site. In the event that construction activities will require dewatering, a groundwater investigation is also recommended. Investigation results should be compared to the Screening Levels (SLs) and Environmental Screening Levels (ESLs) established by the Department of Toxic Substances Control and the Regional Water Quality Control Board, respectively. Findings will useful for future redevelopment considerations.

7.7 Limiting Conditions and Deviations

7.7.1 Accuracy and Completeness

The ASTM E 1527-13 standard recognizes inherent limitations for Phase I ESAs that apply to this report, including:

• Uncertainty Not Eliminated – No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Data gaps identified during this Phase I ESA are listed in Section 7.4.

- Not Exhaustive A Phase I ESA is not an exhaustive investigation.
- Past Uses of the Property A review of standard historical sources at intervals less than 5 years is not required.

The Client is advised that the Phase I ESA conducted at the Site is a <u>limited inquiry</u> into a property's environmental status, cannot wholly eliminate uncertainty, and is not an exhaustive assessment to discover every potential source of environmental liability at the Site. Therefore, TRC does not make a statement i) of warranty or guarantee, express or implied for any specific use; ii) that the Site is free of RECs or environmental impairment; iii) that the Site is "clean;" or iv) that impairments, if any, are limited to those that were discovered while TRC was performing the Phase I ESA. This limiting statement is not meant to compromise the findings of this report; rather, it is meant as a statement of limitations within the ASTM standard and intended scope of this assessment. Specific limiting conditions identified during the Site reconnaissance are described in Section 5.1. Subsurface conditions may differ from the conditions implied by surface observations and can be evaluated more thoroughly through intrusive techniques that are beyond the scope of this assessment. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other construction purposes.

This report presents TRC's Site reconnaissance observations, findings, and conclusions as they existed at the time of the Site reconnaissance. TRC makes no representation or warranty that the past or current operations at the property are or have been in compliance with applicable federal, state, and local laws, regulations, and codes. TRC makes no guarantees as to the accuracy or completeness of information obtained from others during the course of this Phase I ESA report. It is possible that information exists beyond the scope of this assessment, or that information was not provided to TRC. Additional information subsequently provided, discovered, or produced may alter findings or conclusions made in this Phase I ESA report. TRC is under no obligation to update this report to reflect such subsequent information. The findings presented in this report are based upon reasonably ascertainable information and observed Site conditions at the time of the assessment.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not assessed. Regardless of the findings stated in this report, TRC is not responsible for consequences or conditions arising from facts that were not fully disclosed to TRC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information regarding surrounding area properties was requested for approximate minimum search distances and was assumed to be correct and complete unless obviously contradicted by TRC's observations or other credible referenced sources reviewed during the assessment.

TRC is not a professional title insurance or land surveyor firm and makes no guarantee, explicit or implied, that any land title records acquired or reviewed, or any physical descriptions or depictions of the property in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

7.7.2 Warranties and Representations

This report does not warrant against: (1) operations or conditions which were not evident from visual observations or historical information provided; (2) conditions which could only be determined by physical sampling or other intrusive investigation techniques; (3) locations other than the client-provided addresses and/or legal parcel description; or (4) information regarding off-Site location(s) (with possible impact to the Site) not published in publicly available records.

7.7.3 Continued Validity/User Reliance

This report is presumed to be valid, in accordance with, and subject to, the limitations specified in the ASTM E 1527-13 standard, for a period of 180 days from completion, or until the Client obtains specific information that may materially alter a finding, opinion, or conclusion in this report, or until the Client is notified by TRC that it has obtained specific information that may materially alter a finding, opinion, or conclusion in this report. Additionally, pursuant to the ASTM E 1527-13 standard, this report is presumed valid if completed less than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction.

7.7.4 Significant Assumptions

During this Phase I ESA, TRC relied on database information; interviews with Site representatives, regulatory officials, and other individuals having knowledge of Site operations; and information provided by the User as requested in our authorized Scope of Work. TRC has assumed that the information provided is true and accurate. Reliance on electronic database search reports is subject to the limitations set forth in those reports. TRC did not independently verify the information provided. TRC found no reason to question the validity of the information received unless explicitly noted elsewhere in this report. If other information is discovered and/or if previous reports exist that were not provided to TRC, our conclusions may not be valid.

Regulatory database search and historical sources discussed herein	July 13, 2020	N/A	EDR Inquiry Number: 6118785.2s					
Interview with Michael Stoner	August 5, 2020	N/A	User questionnaire in Appendix B					
Santa Clara County Department of Environmental Health (SCCDEH)	July 27, 2020	July 27, 2020	Submitted a records request via online portal on July 15, 2020 for files regarding the Site. The City of Santa Clara responded on July 27, indicating that no files from the SCCDEH were available for review.					
City of Santa Clara Fire Department, Hazardous Materials Division	July 27, 2020	July 27, 2020	Submitted a records request via online portal on July 15, 2020 for files regarding the Site. The City of Santa Clara responded on July 27 providing 34 digital files in connection with the Site. TRC reviewed all files, which included 3 fire inspection violations dated September 9, 2018, May 21, 2019, and June 4, 2019; 17 CERS Hazardous Materials And Wastes Inventory Matrix Reports for Miasole Hi-Tech between 2006 and 2018; and hazardous materials business plans, permits, and inspection reports/responses for Miasole (2007-2019), Stryker Endoscopy (2002), and XES Inc. (1992). Additionally, one record from Water and Sewage (retained by the Fire Department) regarding work orders related to city staff being dispatched to the property to conduct inspections and address sewage leaks and leaking waterlines in 2007 and 2014 was reviewed. Violations included in these files are not indicative of any hazardous materials release at the property, and information included therein is integrated into other sections of this report. All records are retained by TRC and are available upon request.

Appendix F: TRC Staff and Environmental Professional Qualifications/Resumes

Glenn S. Young, PG, LEED AP

EDUCATION

M.S., Environmental Engineering, Purdue University, 1980

B.S., Environmental Engineering, Purdue University, 1974

PROFESSIONAL REGISTRATIONS/CERTIFICATIONS

Professional Geologist, California #6406

AREAS OF EXPERTISE

Mr. Glenn S. Young, PG, LEED AP, has program management and technical experience in the following general areas:

- Environmental Site Assessments, Phase I & Phase II
- Remedial Investigations and Site Characterization
- Vapor Intrusion and Soil Vapor Characterization
- Soil and Groundwater Remediation
- Brownfield Redevelopment
- Risk-Based Site Closures

REPRESENTATIVE EXPERIENCE

Mr. Young has over 25 years environmental consulting experience focusing on geologic and hydrogeologic characterization, risk management, and remediation for public, private, and governmental sector clients. He has a history of providing safe, timely, and fiscally responsible consulting services for contaminated soil, soil-vapor, and groundwater sites as well as geology, hydrology, hazardous materials, and water quality analyses for CEQA documents.

Mr. Young has managed a full range of environmental consulting projects, including large and small multidisciplinary projects, planning, estimating, contract procurement, construction management, public outreach, and the negotiations with both clients, regulatory, and various resource agencies. Projects typically involve Brownfield redevelopment, infrastructure support, facility improvement and/or closures, firing ranges, dry cleaners, UST sites, park lands, and wetland restoration. Mr. Young has also served as Program Manager for several high profile As-Needed environmental consultation projects, including contracts for SFDPW, SFPUC, and Oakland Public Works. Recent peer review services have required significant strategic and timely discussion with a variety of stakeholders, responsible parties, resource agencies (Coastal Commission, USDFW, NOAA, CDFG, USCOE), as well as State and local regulators (DTSC and RWQCB).

The following are example projects for Mr. Young.

San Francisco As-Needed Risk Management Services, SFDPW, California.

As Program Manager for several "on-call" contract with the City of San Francisco Department of Public Works, Mr. Young has managed hazardous materials investigations for water distribution, roadway improvement, library, school, park, and redevelopment projects. He was instrumental in negotiating the cleanup approach with DTSC and successfully managed the Remedial Action at the former Sharp Park Rifle Range Project in Pacifica. Other projects completed on behalf of the SFDPW include, the Octavia Boulevard Improvement Project; hydrogeologic and water quality investigation at the Upper Islais Valley and the Westside Basin for SFPUC's Groundwater Protection Division; stormwater program consultation, habitat restoration, and UST investigations and closure for a dozen SFFD stations. Recent investigations include Maher characterizations for the Civic Center Plaza and proposed Office of the Chief Medical Examiner.

Georgia Pacific Mill Site, Fort Bragg, California

Peer review services to the City of Fort Bragg regarding the hazardous materials investigation, remedial, risk assessment, remediation, and redevelopment activities at the former Mill Site. This property is approximately 25 percent of the total land currently incorporated within the City of Fort Bragg. Mr. Young is also participating in regular stakeholder meetings as well as community workshops designed to inform the general public of findings and answer questions regarding the chemicals detected at the site and assist with certain CEQA studies and determinations.

Oakland As-Needed Environmental Services, Oakland, California.

Conducted the comprehensive records review, site investigation, and risk assessment of this former open pit mercury mining operation. City and neighborhood groups were preparing to build a tot-lot within the City park when they discovered the historical mercury mine operations. Mr. Young fast-tracked the investigation by coordinating with the USGS, DTSC, and San Mateo County to confirm that residual mercury impacts in soil, sediment, and ambient air posed no significant risk to the community. Investigation included air monitoring for volatile mercury at the tot-lot and proposed ball fields as well as participation in public meetings.

Stulsaft Park Mercury Mine, Redwood City, California.

Conducted the comprehensive records review, site investigation, and risk assessment of this former open pit mercury mining operation. City and neighborhood groups were preparing to build a tot-lot within the City park when they discovered the historical mercury mine operations. Mr. Young fast-tracked the investigation by coordinating with the USGS, DTSC, and San Mateo County to confirm that residual mercury impacts in soil, sediment, and ambient air posed no significant risk to the community. Investigation included air monitoring for volatile mercury at the tot-lot and proposed ball fields as well as participation in public meetings.

SPECIALIZED TRAINING

- 40-hour Safety Training Course (29 CFR 1910.120)
- 8-hour Hazardous Materials Supervisory Course
- Bay Area Training Trust (BATT) dormant

Appendix G: Environmental Professional Statement

DEFINITION OF ENVIRONMENTAL PROFESSIONAL AND RELEVANT EXPERIENCE THERETO PURSUANT TO 40 CFR 312

(1) a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see §312.1[c]) on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f).

(2) Such a person must: (i) hold a current Professional Engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of 3 years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of 3 years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of 5 years of full-time relevant experience; or (iv) have the equivalent of 10 years of full-time relevant experience.

(3) An environmental professional should remain current in his or her field through participation in continuing education or other activities.

(4) The definition of environmental professional provided above does not preempt state professional licensing or registration requirements such as those for a professional geologist, engineer, or site remediation professional. Before commencing work, a person should determine the applicability of state professional licensing or registration laws to the activities to be undertaken as part of the inquiry identified in §312.21(b).

(5) A person who does not qualify as an environmental professional under the foregoing definition may assist in the conduct of all appropriate inquiries in accordance with this part if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional provided above when conducting such activities.

Relevant experience, as used in the definition of environmental professional in this section, means: participation in the performance of all appropriate inquiries investigations, environmental site assessments, or other site investigations that may include environmental analyses, investigations, and remediation which involve the understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions and for which professional judgment was used to develop opinions regarding conditions indicative of releases or threatened releases (see §312.1[c]) to the Site. TRC personnel resume(s) are included in **Appendix F**.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Signature of Environmental Professional:

Date: 08/20/2020
