Comment - 041521 - O'Farrell Charter Schools

Our school really needs the SEES financial assistance for ventilation and plumbing improvements to upgrade and improve the infrastructure and provide better ventilation and more efficient plumbing that will improve health and safety as well as cut costs.

We have been and are presently extremely busy with school re-opening requirements, so we are utilizing a consultant to help us develop the program grant application, public-works requirements, as well as manage the program implementation and reporting tasks to completion.

We ask that the grant include compensation for our consultant (to a limited fixed amount or percentage of the total), so that our charter school is not burdened with those extra administrative costs.
