Market Policy Improvements

Anna McKenna

Interim Vice President, Market Policy and Performance
California Independent System Operator

IEPR Joint Agency Workshop on Summer 2021 Reliability - Reliability Outlook
May 4, 2021

Summer 2021 reliability: market policy improvements

Pricing and supply incentives

- Incentives for hourly import offers during tight supply conditions
- Stronger price signals when in emergency conditions
- Management of emergency demand response through the market for more accurate pricing

Battery state of charge

- Interim measure to hold resource adequacy storage resources to their day-ahead market schedules only on tightest supply days, to meet reliability needs across critical evening peak hours

EIM sufficiency tests

- Include uncertainty amount in EIM resource sufficiency test to sufficient bids to meet its net load, including net load uncertainty
- Modelling of energy interchange schedules to ensure balanced resources and interchange schedules

Summer 2021 reliability: market policy improvements (con't)

Outage substitution

- Enhanced outage substitution procedures to ensure resource adequacy planned outages are substituted upfront

Exports and wheeling priorities

- Equilibrate market scheduling priorities for exports backed by designated non-resource adequacy capacity and higher priority wheels to CAISO native load
- New rules for designating non-resource adequacy
