Docket Number: 19-OIR-01

Reliability

The utilities provide Smart Meter data on a day-after basis to third-party vendors that support utility operations, but not to CCAs. This is unlawful, and has led to the rolling blackouts, which is why the Final Root Cause Analysis recommended the CPUC take action to ensure that the utilities do not continue to withhold Smart Meter data from CCAs during Summer 2021. Please ensure this happens. Thank you.
