All Electric Building Code

Hello. I am writing to ask you to create an all-electric building code. Our state, especially in communities of color and other marginalized communities, are being poisoned by fossil fuels. We must decarbonize as fast as possible to address the climate crisis. An all-electric building code would create thousands of good-paying clean energy jobs and improve the health of millions of Californians. Let's leave fossil fuels in the past. Please consider an all-electric building code.
