CALCTP ACCEPTANCE TEST TECHNICIAN CERTIFICATION PROVIDER ANNUAL REPORT

PERIOD ENDING DECEMBER 31, 2020

Prepared by: The California Advanced Lighting Controls Training
Program (CALCTP)

Submitted by: Mark V. Ouellette, CALCTP Administrator on Behalf of the CALCTP Board
Revised – May 27, 2020

Lighting Controls Acceptance Test Technician Certification Provider (LCATTCP) Annual Report

Introduction

The 2013 California Building Energy Efficiency Standards (“2013 Code”) requires lighting control acceptance tests to be performed by trained and certified Lighting Control Acceptance Test Technicians.¹

The California Advanced Lighting Control Training Program (CALCTP) received interim approval as a lighting control acceptance test technician certification provider (LCATTCP) on April 1, 2014 and final approval as a LCATTCP on November 17, 2014. Furthermore, CALCTP demonstrated that the industry threshold certification of at least 300 lighting control acceptance test technicians was met and approved by the California Energy Commission (CEC) on June 16, 2014.

Pursuant to 2013 Code tit. 24 Part 6, § 130.4, subd (d) the LCATTCP shall provide an annual report to the CEC summarizing the certification services provided over the reporting period and to date. As outlined in a letter dated January 6, 2021 from Mr. Daniel Wong of the CEC, this report is to include the following elements:

- A summary of the certification services provided over the reporting period, including the total number of Acceptance Test Technicians and Employers certified by the ATTCP during the reporting period and to date.
- A summary of all actions taken against any certified technician or employer, as a result of the complaint or quality assurance procedures described by the ATTCP as required under Section 10-103.1(c)(3)(D) and 10-103.1(c)(3)(F).
- A summary of the quality assurance and accountability activities conducted over the reporting period, including the compliance forms reviewed and the on-site audits performed as required under Section 10-103.1(c)3F(ii) during the reporting period and to date.
- A summary of the number and type of acceptance tests performed in each local jurisdiction over the reporting period and to date.
- A signed certification to the CEC that the ATTCP continues to meet the requirements of Section 10-103.1.

Answering these questions, the annual report covers the period from January 1, 2020 until December 31, 2020. As requested, CALCTP has also provided a list of the acceptance test projects completed during the reporting period.

¹ Cal. Code Regs., tit. 24 Part 6, § 130.4, subd (c).

Bullet One: A summary of the certification services provided over the reporting period, including the total number of technicians and employers certified by the ATTCP during the reporting period and to date.

As of December 31, 2020, CALCTP has certified 1,793 Lighting Controls Acceptance Test Technicians to perform the acceptance tests in Building Energy Efficiency Standards, Section 130.4. This includes 10 Lighting Controls Acceptance Test Technicians certified from January 1, 2020 through December 31, 2020. There was a significant drop in new technicians due to COVID-19, which forced most training centers to close early in 2020. Because the training is hands-on, it could not be offered using virtual technologies.

Each of these technicians has met the minimum pre-qualifications requirements, completed the classroom and hands-on training requirements, and passed the certification exam. These existing and newly certified technicians include electrical contractors, general electricians, lighting controls engineers, lighting architects, and commissioning agents. Of these certified acceptance test technicians, 567 have maintained their certification and are updated to the 2019 Code.

Attached as Appendix A is a list of the names and certification identification numbers for each of the active CALCTP-AT certified Lighting Controls Acceptance Test Technicians.

Attached as Appendix B is a list of the names and certification identification numbers of each of the 376 businesses² that are currently certified as Lighting Controls Acceptance Test Technician Employers. This includes the 19 Lighting Controls Acceptance Test Employers certified from January 1, 2020 through December 31, 2020. These 19 employers are comprised of energy efficiency consultants, building contractors, electricians, and engineering firms.

Bullet Two: All actions taken against any certified technician or employer as a result of the ATTCP's complaint or quality assurance procedures as required under §10-103.1(c)3D and §10-103.1(c)3F.

CALCTP's guidance on failures states that if a lighting controls acceptance test technician has failed either a paper quality assurance (QA) audit or an on-site-quality audit, the CALCTP-AT Technician will receive additional QA oversight. All QA issues resulting from audits were addressed through an education campaign with the ATT. As explained under Bullet Three, most issues were caused by ATTs misunderstanding how changes to the 2019 code impacted form completion. CALCTP conducted one-on-one education emails and phone calls with these technicians. Per the QA guidelines, CALCTP worked with the technician to remediate all paper and on-site issue and then retested the project. Exhibit 1 outlines future actions that will be taken for technicians that failed a QA audit.

² As of December 31, 2020, 579 employers had been certified as ATE employers (this includes the 19 new employers added in 2020). Of all employers, 222 are no longer certified either because their ATE certification was revoked or suspended due to a License lapse or a C-10 License cancellation, leaving 357 active employers.

Exhibit 1. Overview of Future Actions Take for Failed QA Audits

| Result | % of Projects Audited | Action That Will Be Take |
|---|---|---|
| Failed either a paper or on-site QA Audit | 50% of future projects audited until they have passed two (2) on-site audits | On-site QA audit only |
| Failed a second QA audit, the second is an on-site audit | 100% of future projects audited, until they have passed four (4) on-site audits | On-site QA audit only |
| Failed a third QA audit, while still in the failed pool. | | Recommendation sent to CALCTP Board to terminate from CALCTP-AT program |

In addition to paper and on-site audits, CALCTP has set up a phone line and email system for complaints on technician and technician employers. The system also receives complaints on Authority Having Jurisdiction (AHJ's) not requiring acceptance tests. All ATT complaints are verified with an audit on the property with the building owner and manager. In 2020, two (2) ATT complaint were received. Below is a summary of the failed audit and the process for rectifying the complaint.

As outlined in the approved CALCTP handbook, the CALCTP-AT Technicians were notified that a complaint had been filed against them and was offered the opportunity to refute the complaint. Upon receiving a copy of the rebuttal, CALCTP investigated the issue. In one case, the issue was resolved with the property owner and the installing contractor. In the other case, the AHJ had improperly approved a plan and the ATT tested according to the improper plan per the code. No action was taken against the ATT.

Through the system, CALCTP also received five (5) complaints of an AHJ not requiring acceptance tests. CALCTP followed up and if the complaining individual provided specifics around a project, enforcement agency, or building permit number, the information was forwarded to the CEC hotline. Of the five complaints, one was formalized and sent to the CEC for review. No response was received on what, if any, actions were taken by the CEC.

In 2020, CALCTP did not revoke any licenses for individuals or employers resulting from the ATTCP's QA procedures. As noted below in Bullet Three, CALCTP conducted 350 audits following the approved audit processes outlined above.

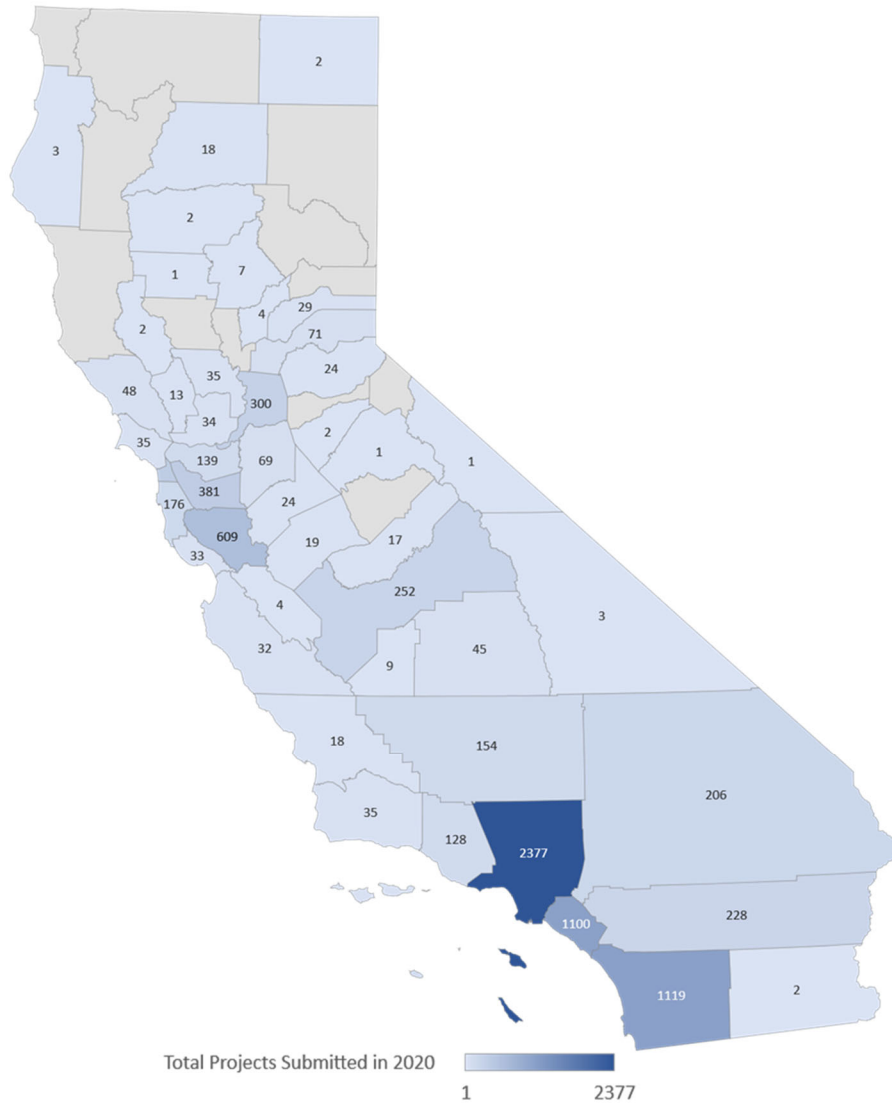

Bullet Three: A summary of the quality assurance and accountability activities conducted over the reporting period, including the compliance forms reviewed and the onsite audits performed as required under §10-103.1(c)3Fii during the reporting period and to date.

CALCTP's Quality Assurance Provider, ICF, conducted 350 audits in total, comprising 4.3% of all projects submitted during the 2020 Annual Report period. This included 78 on-site audits and 272 paper audits. Of all completed acceptance tests since July 1, 2014, ICF has conducted 1,965 audits, or 4.7% of all completed projects, including 406 on-site audits. Please consult Appendix C for a list of all compliance forms reviewed per each audit conducted in 2020. Of the 350 projects reviewed by CALCTP under its QA program, 127 projects had a failed item or failed result. Most of the failed items were due to misunderstanding the changes to the 2019 California Building Energy Efficiency Standards. Of the 78 on-site audits conducted, seven projects had failed items and/or tests. Per the QA guidelines, CALCTP worked with the technician to remediate the issue and then retested the project.

Bullet Four: The number and type of acceptance tests performed in each local jurisdiction over the reporting period and to date.

As part of the requirements, CALCTP AT Employers must provide copies of lighting control acceptance tests conducted within 48 hours of completion. During 2020, CALCTP Lighting Control Acceptance Test Employers and Lighting Control Acceptance Test Technicians conducted 8,188 acceptance test technician projects, totaling 42,252 projects conducted since July 1, 2014. There was a 20% decrease in 2020 compared to 2019. While the COVID-19 pandemic was a partial contributor, the decrease was mostly due to the lack of acceptance testing required by AHJs. Specifically, some installers tried not to request acceptance testing services unless they were required by the AHJ. The heat map in Exhibit 2 provides a geographic breakdown of all projects submitted in 2020. Additionally, a list of these projects is provided in a separate excel file as part of this submission.

Exhibit 2. All Projects Submitted in 2020

Bullet Five: A signed certification to the CEC that the ATTCP continues to meet the requirements of §10-103.1.

The only modifications or deviations to the CALCTP application, approved by the CEC on November 16, 2014, are the revisions to the certification and recertification curriculum for acceptance test technicians and acceptance test employers. These revisions were developed to meet the new and amended acceptance test requirements set forth in the 2019 edition of Title 24. Revisions to the curriculum were approved by the CEC on December 2, 2019.

By the signature below, CALCTP certifies that it meets all requirements for this program, as specified in its application and its amendments to its application approved by the CEC.

I, Signatory, certify that ATTCP-CALCTP continues to meet the requirements of Section 10-103.1.

Mark V. Ouellette

Mark V. Ouellette
CALCTP Administrator on behalf of the CALCTP Board
