## **No time to waste in implementing Building Electrification**

CEC: thank you for the important work that you do. The importance of your work is no more relevant today, when we face a climate crisis.

Building decarbonization is key to achieving a zero-carbon future. Because of the longevity of buildings, to have any hope of taming our global temperature, we must NOT continue to build structures that emit carbon.

Granted, any change to the status quo is difficult. But it'll be even more difficult to adapt to an increasingly unpleasant climate. Let's stop it now.

So please mandate all-electric construction in this Title 24 update.

Thank you!
