### 1 INTRODUCTION

### 1.1 Project Overview

NextEra Blythe Solar Energy Center, LLC has completed construction of Units 1, 2, 3, and 4 of the Blythe Solar Power Project (BSPP or Project), a 485-megawatt photovoltaic (PV) solar power generation facility on over 2,000 acres of Bureau of Land Management (BLM) administered land in unincorporated Riverside County, California. The Project was initially approved by the BLM and California Energy Commission (CEC) as a 1,000-megawatt solar thermal energy generating facility before modifying the project to a PV solar facility. The completed BSPP PV facility was built within the planned footprint of the approved thermal energy facility. Construction of Blythe Units 1 & 2 included the solar arrays, support facilities, and shared linear facilities (shared with the neighboring McCoy Solar Energy Project). The BSPP Units 1 & 2 entered project operations on October 29, 2016.

NextEra Blythe Solar Energy Center, LLC finished construction of BSPP Units 3 and 4 in late 2020. These 2 units will be captured in the next reporting year (RY 2021) after they have been operational for 1 year.

### 1.2 Annual Reporting Requirements

The CEC Presiding Member's Proposed Decision for the modified project, which contained revised findings and the Conditions of Certification (COC), was approved by the Commission on January 15, 2014. COC COM-7 requires NextEra Energy Resources, LLC to submit an Annual Compliance Report (ACR) to the CEC Compliance Project Manager (CPM) throughout operations:

### COM-7: Annual Compliance Report

After construction is complete, the project owner shall submit searchable electronic ACRs instead of MCRs. ACRs shall be completed for each year of commercial operation, may be required for a specified period after decommissioning to monitor closure compliance, as specified by the CPM, and are due each year on a date agreed to by the CPM. The searchable electronic copies may be filed on an electronic storage medium or by e-mail, subject to CPM approval. Each ACR shall include the AFC number, identify the reporting period, and contain the following:

- 1. an updated compliance matrix showing the status of all conditions of certification (fully satisfied conditions do not need to be included in the matrix after they have been reported as completed);
- 2. a summary of the current project operating status and an explanation of any significant changes to facility operations during the year;

### Blythe Solar Power Project (BSPP) 2020 Annual Compliance Report

- 3. documents required by specific conditions to be submitted along with the ACR. Each of these items shall be identified in the transmittal letter with the condition it satisfies, and submitted as attachments to the ACR;
- 4. a cumulative list of all post-certification changes approved by the Energy Commission or the CPM;
- 5. an explanation for any submittal deadlines that were missed, accompanied by an estimate of when the information will be provided;
- 6. a list of filings submitted to, or permits issued by, other governmental agencies during the year;
- 7. a projection of project compliance activities scheduled during the next year;
- 8. a list of the year's additions to the on-site compliance file;
- 9. an evaluation of the Site Contingency Plan, including amendments and plan updates; and
- 10. a list of complaints, notices of violation, official warnings, and citations received during the year, a description of how the issues were resolved, and the status of any unresolved matters.

Additionally, certain COCs require annual reporting and/or development of a mitigation plan, which may also contain operations reporting requirements.

The Bureau of Land Management (BLM), as the federal agency responsible for management of public lands on which the project is sited, approved the modified BSPP in a Record of Decision (ROD) for the project on August 1, 2014, and authorized the construction of the project in a Right-of-Way (ROW) Grant (serialized as CACA-048811) on August 12, 2014. Appendix 5, Adopted Mitigation Measures, of the BLM ROD, contains all ROW grant holder-proposed Design Features (DF) and Mitigation Measures for the project. Design Features in the ROD incorporate the CEC's COCs, some of which require annual reporting.

The annual operations reporting requirements outlined in COM-7, the design features, mitigation measures, and additional COC reporting requirements applicable to the operating units are addressed in this Annual Compliance Report.

### 2 OPERATION STATUS

Units 1 and 2 of the BSPP entered the operations phase on October 29, 2016. Unit 3 and Unit 4 entered operation in the later part of year 2020. This ACR has been prepared to provide information about the status of operations activities as well as Conditions of Certification and Mitigation Measures which are applicable to the reporting period from January 1<sup>st</sup> through December 31<sup>st</sup> of 2020 for units 1 and 2. Units 3 and 4 will be captured in the next reporting year (RY 2021) after they have been operational for 1 year. No significant changes to the facility operations occurred during this reporting period.

### 3 CONDITIONS OF CERTIFICATION

Compliance with the CEC Conditions of Certification and the BLM's Record of Decision is categorized into the following sections, consistent with the CEC's Commission Decision structure: Compliance and Closure (Section 3.1), Engineering (Section 3.2), Public Health and Safety (Section 3.3), Environmental (Section 3.4), and Local Impacts (Section 3.5). Each of the COCs described below is presented for one, or both, of the following reasons: (1) the COC reporting requirement is specifically required to be addressed in the annual compliance report or (2) the COC is related to mitigation that was implemented during this reporting period.

### 3.1 Compliance and Closure

### 3.1.1 COM-5: Compliance Matrix

The Compliance Matrix is provided in **Appendix A**.

### 3.1.2 COM-11: Reporting of Complaints, Notices, and Citations

No complaints (including noise and lighting complaints), notices of violation, notices of fines, official warnings, or citations were received during this reporting period.

### 3.2 Engineering

#### 3.2.1 TLSN-2: Transmission Line-Related Complaints

No line-related complaints were received during this reporting period.

### 3.2.2 TLSN-4: Transmission Line Inspections

Inspections were conducted of the Transmission line. No combustible materials were found. As a result of the inspection no further actions were required.

## 3.3 Public Health and Safety

### 3.3.1 AQ-SC-6: List of Equipment

	Blythe	Vehicle and Equip	oment List	
Quantity	Description	Detailed Description	Manufacturer's VIN/Serial Number	Plant VIN
1	2015 Chevrolet Silverado 4WD Crew Cab	Site Manager's Vehicle	3GCUKPEH9FG419682	132008

1	2011 Ford F-450 Flatbed Auto-crane	Solar Field Maintenance Vehicle	1FDTF4GT7BEA76299	131128
1	2015 John Deere 5055E	Tractor	1PY5055EVGG100653	YX7A83

### 3.3.2 HAZ-1: Hazardous Materials List

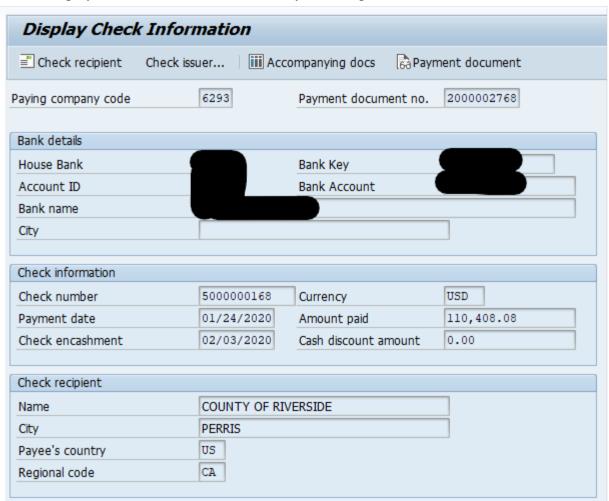

Included as **Appendix B** is the CERS Hazardous Material Inventory for the reporting year containing all hazardous materials contained at the facility.

### 3.3.3 HAZ-6: Operations Site Security Plan Implementation

All project employee background investigations have been performed and all contractors have provided signed statements certifying that background investigations have been conducted on contractors working onsite in accordance with the OSSP. In addition, the hazardous materials transport vendors have prepared and implemented security plans in accordance with the OSSP.

### 3.3.4 WORKER SAFETY-7: Riverside County Fire Department Annual Payment

Annual payment to the Riverside County Fire Department.

### Blythe Solar Power Project (BSPP) 2020 Annual Compliance Report

### 3.3.5 WORKER SAFETY-9: RCFD Inspection Fees

During this reporting period, no inspection fees were required in addition to the annual payment.

### 3.3.6 WORKER SAFETY-10: Heat Related and Valley Fever Incidences

During this reporting period, there have been no potential heat-related or Valley Fever incidents reported.

### 3.4 Environmental

### 3.4.1 BIO-2 through BIO-26: Biological Resources

During project operation, the Designated Biologist (DB) is required to submit record summaries in the ACR unless his or her duties cease, as approved by the CPM. The DB was on-call during this reporting period. The DB served as the lead biological contact for the project owner and the agencies. The Designated Biologist's Report follows.

# 1 Introduction

# 1.1 Project Overview

Blythe Solar Energy Center, LLC completed construction of Units 1 and 2 of the Blythe Solar Power Project ("BSPP" or "Project"), a 485-megawatt photovoltaic ("PV") solar power generation facility on over 2,000 acres of Bureau of Land Management ("BLM") administered land in unincorporated Riverside County, California. The Project was initially approved by the BLM and California Energy Commission ("CEC") as a 1,000-megawatt solar thermal energy generating facility before it was modified to a Solar PV facility. The completed BSPP Solar PV facility was built within the planned footprint of the approved thermal energy facility. Construction of Blythe Units 1 and 2 included the solar arrays, support facilities, and shared linear facilities (shared with the neighboring McCoy Solar Energy Project). BSPP Units 1 and 2 began operation on October 29, 2016.

Blythe Solar Energy Center, LLC recently finished construction of BSPP Units 3 and 4 in November 2020. These units will be captured in the next reporting year (RY 2021) after they have been operational for 1 year.

# 1.2 Annual Reporting Requirements

The CEC Presiding Member's Proposed Decision for the modified project, which contained revised findings and the Conditions of Certification ("COC"), was approved by the CEC on January 15, 2014. Certain COCs require annual reporting and/or development of a mitigation plan, which may also contain operations reporting requirements.

BLM, as the federal agency responsible for management of public lands on which the Project is sited, approved the modified BSPP in a Record of Decision ("ROD") for the Project on August 1, 2014, and authorized the construction of the project in a Right-of-Way ("ROW") Grant (serialized as CACA-048811) on August 12, 2014. Appendix 5, Adopted Biological Resource Mitigation Measures, of the BLM ROD, contains all ROW grant holder-proposed Design Features and Mitigation Measures for the project specific to biological resources. Design Features in the ROD incorporate CEC COCs, some of which require annual reporting.

The annual operations COC and ROD reporting requirements as they relate to biological resources are addressed in this Biological Resources Annual Compliance Report ("ACR") for Reporting Year ("RY") 2020.

INTENTIONALLY LEFT BLANK

# 2 Biological Resources Conditions of Certification

Compliance with the Environmental CEC COCs and the BLM's ROD specific to biological resources is categorized by COC title. Each of the COCs related to biological resources described below is presented for one, or both, of the following reasons: (1) the COC reporting requirement is specifically required to be addressed in the annual compliance report; and/or (2) the COC is related to mitigation that was implemented during this reporting period.

# 2.1 BIO-2 and BIO-4: Designated Biologist and Biological Monitor Duties

During project operation, the Designated Biologist ("DB") is required to submit record summaries in the ACR unless his or her duties cease, as approved by the Compliance Project Manager ("CPM"). The DB was on-call during this reporting period although no biological monitoring activities were required for operations. The DB served as the lead biological contact for the Project owner and the agencies. See the following sections for resource-specific compliance activities.

# 2.2 BIO-6, BIO-19, CUL-15, PAL-4: Worker Environmental Awareness Program (WEAP)

Personnel are required to undergo Worker Environmental Awareness Program ("WEAP") training prior to work at the BSPP. This is to ensure all Project personnel are made aware of the environmental, natural, and cultural resources that exist or may exist at the BSPP; requirements for implementing work practices designed to protect those resources; and penalties associated with violating those requirements. All personnel receiving WEAP training are required to sign in at the beginning of training and receive hardhat stickers to verify that they have received training prior to work on the BSPP. WEAP attendees are also required to provide weed wash certificates for personal vehicles and are provided with a sticker to place on their vehicle as a reminder to look under the vehicle before moving. Training rosters are maintained at the project environmental office and will be kept on file for 6 months following termination of the individual's employment.

# 2.3 BIO-8: Impact Avoidance and Minimization Measures

The DB is required to report compliance with avoidance and minimization measures implemented during operation and maintenance in the ACR, including a summary of revegetation activities for the year, a discussion of whether revegetation performance standards for the year were met, and recommendations for revegetation remedial action if warranted. The following provides a summary on how minimization measures were implemented at the BSPP for biological resources during this reporting period:

**Avoid Use of Toxic Substances**: Toxic soil binders were not used on the Project site. An approved palliative was applied to the main road for soil stabilization in order to reduce potential for fugitive dust.

Minimize Lighting Impacts: Facility lighting is being maintained to prevent impacts to wildlife habitat.

**Avoid Vehicle Impacts to Desert Tortoise:** Signage has been placed along the ROW to notify motorists of the speed limit restrictions. In addition, stickers have been placed on all Project vehicles reminding personnel to look under their vehicle for desert tortoise before moving their vehicle.

Minimize Ponding Water: Panel washing application rates are limited to minimize ponding of water.

**Dispose of Road-Killed Animals:** Trained on-site personnel and/or operations staff perform regular inspections of the solar arrays, and wildlife mortalities and injuries are addressed in accordance with the Raven Management and Control Plan.

Minimize Spills of Hazardous Materials: Spill kits are being maintained to clean up any spills that might result during operation activities.

**Worker Guidelines:** The required WEAP training for all operations personnel and subcontractors includes information about worker guidelines and potential penalties associated with not adhering to these guidelines.

**Erosion Control:** The operations Designated Inspector is completing post-storm site inspections to identify any potential erosion control issues during operations.

Revegetation of Temporarily Disturbed Areas: The approved Revegetation Plan was implemented to restore all areas subject to temporary disturbance. The results of the implementation of this plan were detailed in the McCoy Solar Energy Project and Blythe Solar Power Project Habitat Restoration Installation Completion Report submitted under a separate cover on November 22, 2016. The third year of revegetation monitoring as described in the Habitat Restoration Plan occurred in 2019.

During each quarterly evaluation period, the revegetation areas met expectations for habitat development for the current stage of the program. The Final Revegetation Report was submitted in June 2019.

# 2.4 BIO-9: Desert Tortoise Surveys and Fencing

The operations Designated Inspector conducted inspections of desert tortoise fence integrity throughout the reporting period as required by the COC BIO-9 and the approved Storm Water Damage Monitoring Response Plan. In general, the tortoise exclusion fencing was in good condition, and no areas of concern were reported during this reporting period. There were no living, injured, or deceased desert tortoise observed during this reporting period.

# 2.5 BIO-13: Raven Management and Control Plan

As part of the ACR, the DB is required to provide a report that includes a summary of the results of raven management and control activities for the year, a discussion of whether raven control and management goals for the year were met, and recommendations for raven management activities for the upcoming year. The following provides a summary of the results of raven management and control activities for the fourth year of operation in 2020.

#### Avian and Wildlife Carcass Removal

Trained on-site personnel and/or operations staff perform weekly inspections of the solar arrays, and wildlife mortalities and injuries are addressed in accordance with the Raven Management and Control Plan. In accordance with the Biological Opinion and the Special Purpose Utility Permit, wildlife mortalities are reported on a monthly basis. All avian mortalities are collected, bagged, labeled, and kept in a designated on-site freezer. In certain occurrences of observed avian listed species mortalities, disposition requires further direction from the relevant agency. In these cases, the carcass is covered under a protective cover, such as a weighted bucket, until instruction is received.

#### Summary

Impact avoidance measures are being implemented in accordance with the Raven Management and Control Plan. These include minimizing the ponding of water during operation activities such as washing panels, ensuring each operations employee and visiting workers receive WEAP training, and removing wildlife carcasses to reduce the site's attractiveness to ravens. As indicated by the limited raven use of the Project site during point count surveys, no additional measures are recommended during the 2021 operations year.

# 2.6 BIO-14: Weed Management Plan

The DB is required to provide a report in the ACR that includes a summary of the results of noxious weeds surveys and management activities for the year, a discussion of whether weed management goals for the year were met, and recommendations for weed management activities for the upcoming year.

General site monitoring of the operating facility was conducted by designated on-site personnel on an ongoing basis. The monitoring program included the following components:

- Weed identification training was provided.
- Vehicle and equipment use was limited during operations and maintenance. Workers parked at designated paved areas. Equipment needed for repair or maintenance was cleaned off site prior to entering the facility.
- Inspections of bare ground or regularly disturbed areas that interface with natural habitats (e.g., access road and perimeter fence) at were conducted least once during the summer/fall and winter/spring growing seasons.
- Weed control was conducted as needed by Project personnel or a trained and certified professional
  whenever notified by the Biological Monitor or Environmental Compliance Manager of the presence of
  weeds but was not conducted more often than every other week during the growing season (March through
  August) and once a month otherwise.

Weed control applications were completed with use of a herbicide mixture consisting of Roundup Pro Concentrate and Garlon 4 Ultra. The weed control applications were completed in July 2020 over an approximately 383 acre area within Unit 1 and was also completed in August 2020 over an approximately 343 acre area within Unit 2.

# 2.7 BIO-17: American Badger and Desert Kit Fox Impact Avoidance and Minimization Measures

At the conclusion of construction activities on the Project site, multiple kit foxes remained on site. In accordance with the Desert Kit Fox and American Badger Mitigation Monitoring Plan, passive relocation will not occur during operations and maintenance unless (1) injuries or fatalities occur as a result of the Project; (2) there is the possibility of injuries or fatalities; or (3) the fox is problematic for Project operation. No kit fox injuries or fatalities were recorded during this reporting period, and no concerns about kit fox safety or operations activities were reported.

# 2.8 BIO-18: Burrowing Owl Impact Avoidance, Minimization, and Compensation Measures

COC BIO-18 requires that the DB provide a report in the ACR for the first 5 years following the start of operations that describes the results of monitoring and management of the burrowing owl burrow creation or enhancement areas identified prior to excluding burrowing owls from active burrows. No burrowing owls were relocated or excluded from burrows, and no artificial burrows were constructed during Project construction. As a result, no post-relocation monitoring is required. In addition, no observations of burrowing owls were made within the Project site during this reporting period.

# 2.9 BIO-19: Special-Status Plant Impact Avoidance, Minimization, and Compensation

COC BIO-19 requires the completion of an annual report to monitor effectiveness of protection measures for all avoided special-status plants, including the implementation of required enhancement/restoration activities. The CPM determined that COC BIO-19 does not require any action during operations for BSPP Units 1 and 2 until further construction is required (see Section 5).

# 2.10 BIO-22: Change of Conditions Notification

In order to minimize and mitigate impacts to jurisdictional waters, the Project owner is required to, "notify the CPM and CDFW [California Department of Fish and Wildlife] of any change of conditions to the project, impacts to state waters, or the mitigation efforts. The notifying report shall be provided to the CPM and CDFW no later than seven days after the change of conditions is identified. A copy of the notifying change of conditions report shall be included in the annual reports or until it is deemed unnecessary by the CPM and CDFW." There have been no changes to the conditions or impacts to jurisdictional waters by the Project during this reporting period, and no change of conditions notification reports to include in this ACR.

# 2.11 BIO-24: Golden Eagle Annual Inventory

The Golden Eagle Annual Inventory is required for the first 2 years after commercial operation begins. The purpose of the inventory is to determine golden eagle territory occurrences within 1 mile of the Project area. The second and final Golden Eagle Annual Inventory during the operations phase of the Project was completed in 2018. The 2018 Golden Eagle Inventory Report was included in the previous ACR.

# 2.12 BIO-25 and BIO-26: Evaporation Pond Monitoring and Couch's Spadefoot Toad Protection and Mitigation Plan Implementation

The DB is required to conduct site visits to the evaporation ponds during each year they are in operation. No Couch's spadefoot toads were identified on site during project construction. No compensatory mitigation is required, and no evaporation ponds were built during construction of Units 1 and 2. The CPM determined that COCs BIO-25 and BIO-26 do not require any action during operations for BSPP Units 1 and 2 until further construction or evaporation ponds are built (see Section 4).

INTENTIONALLY LEFT BLANK

# Project Incidents and Corrective Actions

No non-compliance incidents or corrective actions were issued or identified during this reporting period.

INTENTIONALLY LEFT BLANK

# 4 Post-Certification Changes

A list of CPM-approved Post-Certification Changes to the operations of the BSPP is included here:

- The CPM determined that COCs BIO-19, BIO-25, and BIO-26 do not require any action during operations for Units 1 and 2 until further construction or evaporation ponds are built.
- The CPM confirmed on August 7, 2017, that a Spill Protection Control and Countermeasure ("SPCC") Plan is not required at BSPP and that the Oil Spill Plan submitted by BSPP is equivalent to the SPCC Plan and acceptable for the purpose of meeting HAZ-2 SPCC requirements.
- The CPM confirmed on January 3, 2017, that the Provisional Closure Plan required by COC COM-15 can be submitted 1 year after the start of commercial operation and that the 60-day reference in the COC verification should be disregarded. This plan will be prepared and submitted within 1 year after the final constructed unit (anticipated to be Blythe IV) begins commercial operation (commercial operation occurred November 2020) and will incorporate all four units of BSPP.
- The CPM confirmed in a letter received on April 21, 2020 that the Avigation Easement required by COC TRANS-8 was no longer required.

INTENTIONALLY LEFT BLANK

### Blythe Solar Power Project (BSPP) 2020 Annual Compliance Report

### 3.4.2 SOIL AND WATER-1 & 19: Erosion Control and Drainage

In accordance with the approved Storm Water Damage Monitoring and Response Plan, the operations Designated Inspector is completing post-storm site inspections to identify any potential erosion control issues during operations. During this reporting period, the Designated Inspector found no breaches or damage to the Permanent Security Fence/Desert Tortoise Fence. No panels or support structures were damaged or eroded past the Minimum Depth Stability Threshold.

### 3.4.3 SOIL AND WATER-4 & 5: Groundwater Monitoring

The 2020 fourth quarter Groundwater Monitoring Report was submitted under a separate cover in January 2021.

### 3.4.4 SOIL AND WATER-9: Notice of Extraction and Diversion

A copy of the Notice of Extraction and Diversion filed during the reporting year is included as **Appendix C**.

# 3.4.5 WASTE-7 & WASTE-10: Hazardous Waste Generation Reporting and Solid Waste Disposal Actions

No waste was generated during the reporting year.

Table 1
Waste Generation, Management, and Disposal Summary

Waste Type	Volume or Weight	Disposal/Recycling Facility	Disposal Action
None			

### 3.5 Local Impacts

#### 3.5.1 VIS-1: Surface Treatment

All surfaces remained in good condition and no preventative maintenance activities occurred during this reporting period. There are currently no scheduled maintenance activities planned for 2021.

### 3.6 Project Incidents and Corrective Actions

No non-compliance incidents or corrective actions were issued or identified during this reporting period.

### 4 CONDITIONS OF CERTIFICATION CHANGES

A list of CPM approved Post-certification Changes to the operations of the BSPP is included here:

- The CPM determined that COCs BIO-19, BIO-25, and BIO-26 do not require any action during operations for Units 1 and 2 until further unit construction or the evaporation ponds are built.
- The CPM confirmed on 8-7-2017 that an SPCC Plan is not required at BSPP and that the Oil Spill Plan submitted by BSPP is equivalent to the SPCC Plan and acceptable for the purpose of meeting HAZ-2 SPCC requirements.
- The CPM confirmed on 1-3-2017 that the Provisional Closure Plan required by COC COM-15 can be submitted one year after the start of commercial operation and that the sixty-day reference in the COC verification should be disregarded.

#### ANNUAL NOTICE OF GROUNDWATER EXTRACTION & DIVERSION FOR 2020

Water Right ID G334539

Primary Owner CHARLYN MOSLEY

#### INVOICE

Your Notice of Groundwater Extraction & Diversion (G334539) has been successfully submitted.

Please mail a check or money order for the \$50.00 filing fee along with a printout of this invoice to the following address:

State Water Resources Control Board Division of Water Rights PO Box 2000 Sacramento, CA 95812-2000

Check or money order should indicate your recordation number(s) and be made payable to: State Water Resources Control Board.

Do not send cash.

DEADLINE: Payment must be postmarked no later than June 30th in order to be recorded.

THIS SPACE FOR OFFICE USE ONLY	R	AMT:

### ELECTRONIC PAYMENT/AUTOMATIC CLEARINGHOUSE (ACH)

If you are paying electronically, include your groundwater recordation number when submitting your payment. Click the following link to visit the <a href="SWRCB Make a Payment webpage">SWRCB Make a Payment webpage</a>. Select the "Application Fees" box, then scroll to the bottom of the page and enter your application number **RAG33453920**.

After printing this invoice screen, please click the 'Return to List of Reports' button below to view reports for this Recordation Number. The listing will give you the option of printing the submitted report for your records.
