Very worried about this

I agree with the city to not allow the company to restart the power plant Until there is enough information about what happened. I wish they were shut down completely, since I think they are doing more harm to our health and environment, then the energy they provide. I know they will say anything to get this thing started, because they only care about the bottom line, profit, but is up to the elected officials to care for the people who elected them, and at least guarantee that they are running things safely and according to state and federal regulations.

Thanks to everyone who's interest is to take care of the residents of Hayward, we appreciate it.
