Request root cause analysis and fix before restarting Cal Pine

To Whom It May Concern:

I am concerned that Cal Pine plans to restart its Russell City plant before performing a root cause analysis into its explosion last month that resulted in large metal shrapnel falling into the neighborhood. Although last month's event resulted in no injuries or deaths, without finding out what caused the catastrophe and making the appropriate fixes, there is a very good chance that another such event will occur. Any casualties that result in another such event would be 100% preventable via appropriate measures taken now.

Human lives, not to mention air quality and environmental safety, should have priority over corporate profits. Please do not allow the Russell City plant to be restarted until we are assured that it is operating soundly and in a way that will not cause harm to our city's air, water, and quality of life. Thank you.
