## **Calpine restart**

I don't believe Calpine should be allowed to restart their operation. I have complained to the city of Hayward in the past about Calpine polluting the air in the area of their operation.

I live less the 5 miles from their plant and on more than one occasion have been subjected to bad air due to their operation. As stated I complained to the City of Hayward about the smell, and they and Calpine both denied any issues with the air quality. I believe Calpine purges their system systematically. Its happened during the late afternoons, early evening, between 4 to 6 pm usually in the summer months. An the heaviest during the early morning hour usually around 1am at in the winter months. On one occasion it started around 1am and lasted till around 6am. I had difficulty breathing due to COPD condition.

Calpine should definitely not be allowed to restart due to the health problems they can create
