Please don't restart the Russel City Energy Plant

The power plant has had a violent explosion with fairly heavy parts being flung quite a long distance. Additionally, this power plant was placed in Hayward and yet the power it produces as a "peaker plant" is solely for the benefit of the peninsula (across the bay). Additionally this power plant emits large amounts of particulate particles that I do not believe were properly analyzed. So we in Hayward get the pollution without any benefits from this plant. This sounds like a bad deal for us. Please do not allow this plant to restart without a full accounting to demonstrate its safety. Thank you.
