Restart of the Calpine plant after explosion

As a life long resident of Hayward I strongly opposed the power plant from the start! It's far too close to residential houses and schools. Many residents were opposed to this plant being built but this company didn't care. They came and built it anyway even with strong opposition. And my biggest fear is that either an earthquake or an explosion would happen and endanger the city and its residents. And now look, on May 27 2021 there was an explosion of a steam turbine that sent shrapnel flying some 1200 ft away, possibly injuring residents and the general public. The company had no contingency plan, no way to ensure that should anything fly off there was a barrier to prevent flying objects to be caught not to mention no plan of action for the failure itself. And now they want to start up again using some crazy dumb way of using gas to instead of steam. They haven't found the cause of this first incident and yet here they are trying to force themselves open for business for what profits?? We residents DEMAND answers before they start up again because what if they do and there is an even worse explosion than this and children are killed? Are they going to try and sweep that under the rug too? I live only 2 miles away with my children and if anything happens with this God forsaken power plant I will SUE! I will sue the city, the county and Calpine and I will not stop until they are SHUT DOWN PERMANENTLY! Hayward never needed a power plant and this all comes down to money and greed! Nothing but BS businessmen that only care about profits and not people. Residents are expendable and nothing more than dollar signs to these A-holes! I plead with you to cut off Calpine from trying to restart the Russel City Energy Center. Do it for the children of the city of Hayward.
