Install 90 Orange Chargers in the Golden Gate Transit Larkspur Ferry parking lot

Orange Outlet (OO)
<https://www.orangecharger.com/>

produces a "smart outlet" called Orange Charger (OC)
<https://www.orangecharger.com/outlet>

It tracks the electricity used and transfers payment from the user to the "owner" of the electricity. Similar to a parking meter, a phone app allows access to the electrical outlet. The GGH&TD could install 90 OC's on their 90 lighting poles in the Larkspur Landing Ferry parking lot for commuters use for 110v trickle charging.

OC is also the perfect HOA or Apt. solution since there is usually power available, and payment is the problem that OO and OC solve.
It works with existing 110v outlets. Everything else is handled by OO.
